

Guide Book To Colleges Available

The latest edition of American Universities and Colleges, a reference guide containing several facts about higher education in this country, is available for student use in the Division of Counseling office, 401 Old Main, or at the Reference Desk of the Library.

The book, compiled by the American Council on Education, contains information on higher education programs throughout the states, the evolution of higher education in the United States and administration and support of higher education.

A section is devoted to the federal government and higher education including the provisions of the National Defense Education Act of 1958 which authorizes the controversial "loyalty oath" loan fund.

There is a report on accreditation and lists of all the schools accredited by the ACE in the various professional fields. There are also summaries on all ACE accredited institutions according to states.

In the book are tables of earned doctorates by institution from 1861 to 1958 and other selected shorter periods of time.

The tables list doctorates earned, broken down into categories according to sex, year, subject, or combinations of these factors.

Class Selects Art Of Grad Students

Paintings by two graduate art students at the University have been selected as Clearfield High School's senior class gift.

"Power Station" by Hugh Gibbons and "Hatteras" by Mrs. Rosemarie DiMinno McKowen, described by art critics as "extremely fine examples of today's art," were selected by the senior class officers because they "reflected the art of the times."

The paintings were presented to the newly-constructed high school in the hope they would serve as the beginning of an art collection that will someday line the halls.

Both Gibbons and Mrs. McKowen were graduated from the University and are working on their master's degree in studio art.

Falkie Receives Mining Fellowship

Thomas V. Falkie, Ph.D. candidate from Mt. Carmel, is the holder of the International Minerals and Chemical Corporation graduate fellowship in mining at the University.

Falkie graduated from Mt. Carmel High School and received his B.S. at Penn State in 1956.

He is past president of Theta Delta Chi, social fraternity, and belongs to Phi Eta Sigma, Tau Beta Pi, Sigma Gamma Epsilon, Phi Kappa Phi, the Mineral Industries Club, the Graduate Student Association and the AIME Mining Society.

Gazette

TODAY
Mateer Playhouse, "Twelfth Night," curtain time 8:40, Rt. 305 at Noff Mills.
Swimming for men and women, 4 and 8 p.m., Glennland Pool.

Tennis for women, 4 p.m., Nittany Courts.
Golf for women, 4 p.m., Holmes Field.
Artists Series, Richard Dyer-Bennet, 8 p.m., Pavilion, no admission charge.

MATTIL

STAHL

LINDSAY

Mattil, Stahl, Lindsay Named As New Department Heads

Three new department heads have been approved by the Executive Committee of the University's Board of Trustees.

Dr. Edward L. Mattil, associate professor of art education, was named head of the department of art education to fill the position held by Dr. Viktor Lowenfeld until his death May 25.

Dr. C. Drew Stahl, associate professor of petroleum and natural gas engineering, was selected to head that department, effective Sept. 1.

Dr. Robert W. Lindsay was elevated to the position of head of the department of metallurgy, succeeding Dr. Amos J. Shaler who has resigned from the faculty. Lindsay had been serving as acting head for the past year.

Mattil was first named to the faculty at the University in 1948 when he was appointed assistant professor of art education on a part time basis. At that time, he had been serving as head of the art department of the College Area Joint Schools in State College.

A graduate of the State College High School, he received his bachelor of science degree from the University in 1940. His master of arts degree in fine arts and doctor of education degree in art education were also conferred by the University.

His research has been concerned with encaustics as a painting medium, centrifugal casting in silver and gold, relationship of creative products

to social adjustment in children, and the effects of depth and breadth approaches to the teaching of art at the junior high school level.

He has published in various popular and professional journals, edits the magazine "Everyday Art," and has published two books.

Stahl, a native of Altoona, will succeed Dr. Robert L. Slobod who has resigned as department head in order to concentrate primarily on certain research activities.

Stahl completed his undergraduate and graduate work in petroleum and natural gas engineering at the University. He received his bachelor of science degree in 1947, his master of science in 1950, and his doctor of philosophy degree in 1954.

He was named to the faculty in 1947 as a research assistant, was named research associate in 1950, instructor in 1954, and in 1957 was named to his present position as associate professor of petroleum and natural gas engineering.

His research has been primarily in the field of multiphase flow in porous media and he has published more than 50 technical papers on his research.

Lindsay, professor of metallurgy, first joined the Penn State faculty in 1943. He resigned in 1957 to accept a position as supervisor of research on constructional alloy steels with the research and development department of the Crucible Steel Co. of America, but returned to the University June 1, 1959.

A native of Boston, Mass., Lindsay was graduated from Tufts University with a bach-

3 Firms Support Metallurgy Project

Grants from three firms have been awarded in support of the Cooperative Program in Metallurgy, conducted this year under the direction of Dr. R. W. Lindsay, acting head of the department.

The Reynolds Metal Company has awarded \$500; The Ford Motor Company \$800; and the International Nickel Company \$800, in support of this program.

The Cooperative Program includes 15 other metals industrial firms in Pennsylvania and other states, and has supported research at the University since 1936.

The money is used to sponsor major research projects, launch new faculty members in research, pay salaries of graduate assistants, provide undergraduate scholarships, and purchase supplies and equipment.

Professors Publish History Manual

Wallace F. Workmaster, curator of Pennsylvania Historical Collections at the Library and Dr. Robert W. Iverson, specialist in the social sciences with the Center for Continuing Liberal Education, are the authors of a study manual, "Everyone His Own Historian: A Guide for Studying History Around You."

Published by the Center for Continuing Liberal Education, it will be used in conjunction with an adult education course in state and local history to be offered throughout Pennsylvania during the coming academic year.

EUTAW HOUSE

BUILT IN 1823

We specialize in . . .

Thick Prime Steak
Shish-K-Bob
Seafood

. . . and your favorite beverage

For the finest in food served in a luxurious atmosphere; try the Eutaw House. Second home of Penn Staters for over a century.
