

Editorial Opinion

Longer Periods Needed

While eyes of students and faculty alike are focused on the University's investigation of quarter and trimester systems in an effort to decide whether to adopt a year-round academic schedule, we should not forget that there is another important phase to this investigation.

A year-round academic schedule is not the only change the University is considering in order to cope with the problems of the expanding campus and bloating enrollment.

Another important change being considered is that of lengthening the class period. Various plans are being perused such as 75-minute classes with 15 minutes between classes.

With the campus physically expanding to the point where it is impossible to cross from one end to the other in 10 minutes a longer break between classes must be set up.

The first such time change has already been made. ROTC classes at Wagner Military Science Building, a 20-minute walk from the center of campus, will begin at 7:50 a.m. instead of 8 a.m. and be dismissed 10 minutes earlier so the cadets can get to their next class on time.

The expanding campus dictates this need for more time between classes and the most efficient way to provide this is to set up longer class periods with classes meeting fewer times each week.

Goldwater Sees Demos Keeping Senate Control

By KAY MILLS
Collegian Washington Correspondent

Sen. Barry Goldwater (R.-Ariz.) said recently that it will be "at least two elections" before his party can hope to regain control in the Senate.

He added, however, that this outlook was "very optimistic."

Goldwater, chairman of the Republican campaign in the Senate, said that the GOP will not regain the majority it lost in 1954 "unless something catastrophic happens" to the opposition. He said it would take "another Eisenhower type election."

He did say that "if Nixon is elected and has a good administration," the minority's task of rebuilding its power would be easier.

The Arizona conservative added, "If we win the seats we expect to this fall, we will still need 12 to 14 for a majority."

The Republicans concede that it is a mathematical impossibility for them to win all the seats necessary for a Senate majority this Nov. 8. Too many southerners are up for re-election.

Although they predict a Nixon victory, they remember that the Senate is not easily swept along by the tide to the White House as is the House of Representatives.

This factor has contributed to the Democratic Congress-Republican administration deadlock for the past five and a half years.

Interpreting

Cuba Example Of Red Intervention

By J. M. ROBERTS
Associated Press Analyst

U. S. Secretary of State Christian A. Herter has now defined what President Eisenhower was talking about when he said establishment of a Communist base in the Western Hemisphere would not be tolerated.

The secretary says the Fidel Castro regime in Cuba displays a pattern leading to such a status.

Any Communist regime established "in any one of the American republics would in effect constitute foreign intervention in the Americas as defined in our numerous agreements and treaties," Herter says.

"Any such regime would automatically become an operational base of the propagation of Communist ideas, for infiltration, subversion and interference in the internal affairs of all the Americas, designed in the last analysis to overthrow by force every government in this hemisphere."

Anyone can see the Castro regime heading in the this direction, Herter says, citing examples of the Communist pattern, as well as Castro's repudiation of democratic principles announced in the early days of the revolution.

He refers to Castro tendencies and Castro patterns as though there still is a line remaining to be crossed. His supporting argument, however, taken with the known facts about Castro's supporters and the July 24 Movement throughout Latin America, indicates a clear feeling that the line already has been crossed.

On that point, however, the

United States is going along with the desire of other members of the Organization of American States to give Castro a last chance to extricate himself from the arms of Moscow if he will. Castro says positively and bitterly that he will not, OAS or no OAS.

Eventually, then, whether the OAS is willing to be so direct, or whether the United States will have to act alone, the Castro regime will have to be classified for what it is and steps taken to end the toleration.
