

### University to Join With Nuclear Firm To Build Reactor

The University has become a participating member of the Saxton Nuclear Experimental Corporation. The corporation awarded a \$500,000 sub-contract for the second phase of construction of a nuclear reactor being built at Saxton.

The reactor will be used to study the process of generating electric power by nuclear means. By becoming a member of the corporation the University will be able to use the facilities for teaching and research.

The first phase of the project, the building of a 110-ft., 262-ton containment vessel, was recently completed by Bethlehem Steel Co. The second phase will include concrete work inside and outside the containment vessel, construction of two additional buildings, erection of structural steel, and foundation works for the waste disposal system.

### New Stadium--

(Continued from page one) taken up for the most part by season ticket holders.

In future years such football powers as Navy, Army, Syracuse, California, Air Force, U.C.L.A., Rice and Oregon will appear at Beaver Stadium.

Beaver Stadium was named for former Governor James A. Beaver. He was past president of the University's Board of Trustees and was a leader in the early growth of the school.

—How things change! Nowadays when the doctor finds a patient in a rundown condition, he prescribes less golf and more time at the office.
