

Senate Discusses University Issues

The length of Thanksgiving vacation, compulsory or elective ROTC and compulsory physical education for veterans are among the many issues which are handled by the University Senate each year.

The Senate, composed of members of the faculty and administration, has the final authority on all questions which pertain to the educational interests of the University subject to the jurisdiction of the Board of Trustees.

The decisions of the Graduate School may be reviewed by the Senate and are subject to the approval of the Board of Trustees.

In case of a question of jurisdiction, the power of decision rests with President Eric A. Walker.

The bulk of the work of the Senate is done by 14 standing committees which study problems in their particular fields and submit reports for approval at the monthly Senate meetings.

For example, the Senate Committee on Courses of Study reviews all changes made by colleges in their courses and curriculums. The committee then submits a final list of these changes to the Senate for approval.

Students sit as non-voting members on those committees whose decisions most directly affect students such as calendar and class schedule and student affairs.

The student appointments to the calendar committee are usually made by the Student Government Association president.

The SGA president and vice president and the president of the Women's Student Government Association sit on the student affairs committee.

This committee serves as an agency where student suggestions or complaints may be submitted for committee consideration.

Other Senate committees include, academic standards, admissions, athletics, educational policy, extension policy, faculty affairs, military instruction, research policy, rules, scholarships and awards, committees.

-I see by the papers where a woman filed suit for divorce because her husband was careless about his appearance. He hadn't shown up in nearly two years.

Turnabout Day Sun to Shine For Freshmen

Today, Freshmen, in case you haven't noticed, the sun shines for you alone. After days of harassment and misery at the hands of the illustrious upperclassmen, your chance has finally come. Today is your day of revenge, for today is Turnabout Day. During the hours of customs today, you can subject the exalted upperclassmen to the same treatment they have given you.

Frosh, be proud to wear your customs. Today they are a benefit instead of a detriment. You will experience a feeling of power as you see the look of terror on the faces of superior seniors. And you'd be surprised how many upperclassmen don't know how many steps are in front of Sparks.

Letter--

(Continued from page four)

to our mashed potatoes and generally inconvenience us to an exasperating degree. We would like to see customs reduced to a period no longer than five and one-half days. Also, the namecards could be reduced to a card no more than four inches by four inches worn on shirt or blouse.

We are NOT bitter "Frosh", in fact we would like to congratulate most of the upperclassmen on their fine sportsmanship.

-Several members of the Class of '64"

-A man whose normal weight is 150 pounds would weigh about 50 pounds if all the water in his system were dried up.

WRA Votes To Continue Open House

The open houses held each Friday and Saturday night in White Hall have been put on a trial basis for the next month, due to the small number of coeds participating in these activities offered by the Women's Recreation Association.

The executive board of WRA passed this decision at a meeting last night in an effort to determine the future of both the open houses and the proposed Co-Rec Nights for men and women students.

WRA sponsors swimming, bowling, table tennis, fencing and bridge for coeds on weekend nights. Facilities are also available for basketball, badminton and volley ball. The open houses will continue on the same basis for one month in the hope that participation will increase.

Only teams consisting of sororities, town groups or dorm living units will be allowed to take part in WRA intramurals. The board ruled out the possibility of clubs entering teams and intramurals will continue according to the rules stated in the handbook.

No decision was reached on the WRA annual service project. The purpose of this project is to benefit the underprivileged children and families in the area.

Mueller Gets Physics Award

Dr. Erwin W. Mueller, research professor of physics, was recognized yesterday by the Instrument Society of America for his work in the development and practical use of the field ion microscope.

At a luncheon held in New York, Mueller received the Society's Distinguished Achievements Award consisting of a commemorative plaque, a certificate and a cash gift.

With several additional physical efforts discovered by Mueller, the field ion microscope is a refinement of the field electron microscope also invented by Mueller in 1936. The German C. F. Gauss Medal was awarded to him in 1952. Dr. Mueller's latest work involves the study of atomic defects in the structure of metal crystals.

Press Releases New Issue

The newest publication of the Pennsylvania State University Press is "Proceedings of the 13th National Conference of Administration of Research."

AMERICAN POET—Marianne Craig Moore, Pulitzer Prize winner and noted poet, will appear at 8:30 tonight in Schwab in the first performance of the 1960-61 Artists' Series.

Zelko to Give Lecture

Harold P. Zelko, professor of speech, will lecture and conduct a one-day program on "Communications in Management" at Wright-Patterson Air Force Base in Dayton, Ohio.

The course is a part of the executive development program of the Air Force and is attended by senior officers of the Air Force, Army, and Navy.

Panofsky to Go Abroad

Dr. Hans A. Panofsky, professor of meteorology, will spend the fall semester studying atmospheric turbulence at the University of Cambridge, England, on a Guggenheim Fellowship.

During the spring semester he will serve as visiting professor of meteorology at the University of Minnesota.

Hort Show Will Be Held On Homecoming Weekend

As one of the highlights of the Homecoming celebration, Horticulture Club will present the 47th annual Hort Show in the Stock Judging Pavilion.

The show's "Panorama of Horticulture" will feature seven general areas in the field. Each area will have its own separate display for the purpose of acquainting the public with the various phases of horticulture.

The displays include flower arrangement, plant breeding, fruit and vegetable processing, a fruit display, ornamental shrubbery and landscape architecture.

Approximately 500 chrysanthemum plants, ornamental shrubs and 90 evergreens within the pavilion will aid in tying the various displays into the main theme.

A tree reaching to the top of the pavilion, a pool, and a stone wall

will be featured in the dedication display at the front of the building.

Manager of the show is A. David Horne, senior in agriculture from York.
