

Rising Service Cost May Increase Fees

Rising shipping, food, labor and service costs were cited by both Robert C. Proffitt, director of Food Service, and Otto E. Mueller, director of Housing, as reasons why a raise in the board and room fee is foreseeable.

A possible raise in room and board fees by next semester

was announced Tuesday by Albert E. Diem, vice-president for business administration. A definite decision will not be made until Dec. 1, Diem said yesterday.

Both department heads agreed nearly every effort has been made to reduce costs by cutting down on operational expenses. For Food Service this had included cutting the amount of service in the cafeterias, eliminating table service and closing the employee dining halls.

Housing has been reducing the ratio of employees to students by means of different work schedules and equipment, as an effort to maintain services at the same cost to students.

There are still ideas for further economizing, however, which are just in the "thinking stage," Proffitt said.

One of these is to have more of the food preparation done centrally in the Foods Service Building.

Students can help cut down on housing maintenance and upkeep costs by being less wasteful, Mueller said. Turning off lights and water when not using them, not dragging mud into the residence halls and not abusing the furniture are all measures which can cut down on expenses, Mueller said.

The \$365 - \$410 fee for room and board which each resident student pays goes for labor, salaries, food, utilities, repairs and maintenance, trash and garbage disposal and other operational expenses. Part of the fee must also be used to retire the bond issue.

Greek Week Posters Due Tomorrow

Posters for Greek Week must be turned in by 5 p.m. tomorrow to the Hetzel Union desk to be eligible for the contest. Carol Goehring, poster co-chairman, announced yesterday.

Posters will be displayed in the HUB from Oct. 9 to Oct. 15. Judging is scheduled for Saturday, Oct. 15. The two winning posters will be displayed in the Book Exchange windows during Greek Week, Oct. 16 to 25.

Greek groups may also gain five extra points by creating a window display in the stores of downtown merchants. These displays will not be judged, but the committee must be notified of the location of the display in order for the group to receive credit.

Window displays may go up Oct. 12 and must be up by Oct. 15. They must be dismantled by Tuesday, Oct. 25.

Posters must be no larger than 20 by 25 inches and must follow the Greek Week theme "Great Greeks — past and present." Each poster should include the dates of Greek Week. The name of the contributing group may, or may not, be directly included in the design, but must be somewhere on the poster for identification.

Kennedy Talk Will Be Heard By Students

A motorcade to Johnstown to hear Sen. John F. Kennedy, Democratic presidential candidate, will be one of the highlights of the pre-election program sponsored by the Students For Kennedy and Johnson group.

The group will provide transportation for any students interested in attending the Oct. 15 speech, Donald Lipson, co-chairman, said.

Sen. Joseph S. Clark (Dem.-Pa.) has accepted an invitation to address University students on Oct. 18. However, Lipson explained, the organization is still trying to find a suitable meeting place as the University will not permit the use of campus facilities unless a Republican of equal stature is also available.

Other tentative plans of the organization include a Miss Young Democrat contest and a panel discussion of political campaign issues by five students from each party.

Departure time and place of the motorcade will be announced at a later date by the Students for Kennedy and Johnson.

Biology Prof to Speak At Forestry Convocation

John Patrick Guckin of the University of Alaska will give an illustrated talk on Alaska for the Forestry convocation to be held at 11 a.m. Wednesday in 121 Sparks.

Guckin has been teaching biology to academically talented students in Anchorage, Alaska, for the past three years.

Breakfast Line--

(Continued from page seven) 8 and 8:15 a.m. and none of these students could be trying to make an 8 a.m. class, Proffitt said.

If enough pressure is brought to bear, there will be no other alternative but to reduce the number of choices and to eliminate second helpings — actions which would speed up the lines. Proffitt said. Food Service hopes not to have to do this since it knows the students enjoy choices and seconds, Proffitt added.

8,000 Management Opportunities!

That's right. There will be 8,000 supervisory jobs filled from within the Western Electric Company by college graduates in just the next ten years! How come? Because there's the kind of upward movement at Western Electric that spells executive opportunity. Young men in engineering and other professional work can choose between two paths of advancement—one within their own technical field and one within over-all management.

Your progress up-the-ladder to executive positions will be aided by a number of special programs. The annual company-wide personnel survey helps select management prospects. This ties in with planned rotational development, including transfers between Bell Companies and experience in a wide variety of fields. Western Electric maintains its own full-time graduate engineering training program, seven formal management courses, and a tuition refund plan for college study.

After joining Western Electric, you'll be planning production of a steady stream of

communications products—electronic switching, carrier, microwave and missile guidance systems and components such as transistors, diodes, ferrites, etc. Every day, engineers at our manufacturing plants are working to bring new developments of our associates at Bell Telephone Laboratories into practical reality. In short, "the sky's your limit" at Western Electric.

Opportunities exist for electrical, mechanical, industrial, civil and chemical engineers, as well as physical science, liberal arts, and business majors. For more information, get your copy of *Consider a Career at Western Electric* from your Placement Officer. Or write College Relations, Room 6106, Western Electric Company, 195 Broadway, New York 7, N. Y. Be sure to arrange for a Western Electric interview when the Bell System team visits your campus.

Principal manufacturing locations at Chicago, Ill.; Kearny, N. J.; Baltimore, Md.; Indianapolis, Ind.; Allentown and Laureldale, Pa.; Winston-Salem, N. C.; Buffalo, N. Y.; North Andover, Mass.; Omaha, Neb.; Kansas City, Mo.; Columbus, Ohio; Oklahoma City, Okla.; Engineering Research Center, Princeton, N. J. Teletype Corporation, Skokie, Ill., and Little Rock, Ark. Also Western Electric distribution centers in 32 cities and installation headquarters in 16 cities. General headquarters: 195 Broadway, New York 7, N. Y.
