The Administration Versus Politics

Why doesn't our administration ask that we bring members of the Socialist, America First and Gold Standard parties to campus?

After all, if administrators are so concerned with keeping the University out of politics, that they demand Sen. Joseph S. Clark (D.-Pa.) make sure a Republican is here before he sets foot on campus, why are they not demanding equal time for all the parties?

Tsk, Tsk, men, someone just might write a letter of complaint to the New York Times. And what about those profs sporting . . . or . . . buttons — isn't our administration going to put a stop to it.

My goodness, they are practically broadcasting that they support one of those men. Isn't it bad enough that they should have made any judgment upon those men at all?

Perhaps, the administration ought to clean all those potentially subversive men out of the Political Science Department. They teach you the basic ideas behind political parties, explain the differences, and perhaps some slant their lectures.

And those history instructors, some of them even come right out and say they favor one of those political parties.

What is the administration going to do about those students who are "actively" campaigning for . . . or . . . on the University campus?

As long as the administration is going to do a job—ignoring the most important thing on the National scene—why should it be so picayunish about the whole thing.

It should expell voting students, abolish political science and history and perhaps philosophy too—those thinking guys are dangerous.

Then our administration could say to the world, "look at the unbiased, objective school we run." And the world would answer, "Yes, but who cares about a Farmer's High School?"

Campus Beat

World Series Vs Football, Dinner Lines

It was nice to see such a large crowd at Beaver Stadium for the game with Missouri. Too bad we didn't come out on top in the scoring column. I wonder how long it will take to drive from the stadium to the center of town next year when we play teams like Army, Navy and Syracuse and the crowds will be even larger. It took me over an hour to make that short trip on Saturday. Maybe somebody in the engineering department can think up a solution to this pressing problem.

Many of you will probably be in the same predicament I will be in this afternoon. That being whether to watch the World Series or listen to the football game. I think I have solved the problem. I am going to watch the baseball game on television and keep my portable radio nearby so I can listen to the football game.

Chalk one up for the Campus Patrol. One of their duties is to make the flow of traffic smoother. The other day a patrolman in the car stopped to talk to the one on the motorcycle and thus blocked both lanes of Pollock Rd. Although they saw cars lining up behind them, they didn't move until they finished their conversation and there was a long line of cars.

Aside to the Patrol. What happened to the television set that was stolen from Beam Hall last year?

"Line jumping" is becoming more difficult in Waring Dining Hall. Dormitory counselors are being stationed along the lines to see that nobody "sneaks in." Even students who leave the line only to check their mailboxes or buy a paper are made to go to the end of the line.

Cheering Contests, An SGA Function?

by nicki wolford

That our Student Government Association is concerned with school spirit is nice. That SGA wastes time on cheerleading bills when it should be devoted to more important issues such as discrimination, food service, etc., is not so nice.

This cheerleading, oops cheer writing, contest could and should be handled only by the cheerleaders and/or the Block 'S' Club. (We understand that fostering school spirit is their reason for existence.)

Part of the justification for the "importance" of the bill introduced on Thursday at the Assembly meeting was that Penn State only has four cheers, the latest originating in 1953 and the other three in 1947.

This in itself does not mean Miss Wolford that our student government has been lax. Writing cheers is hardly its function. It does mean that we have had unimaginative cheerleaders — or at least cheerleaders without much initiative — and a rather

er disorganized Block 'S' Club.

No wonder students groan "Not that one again" as our cheerleaders take the field, not only will they hear (many don't yell) the same cheer but they will be watching basically the same motions used year after year, cheer after cheer.

That the idea a cheer writing contest had to originate at Encampment ought to have been enough to make these two groups realize they hadn't been doing their jobs.

Didn't the workshop send its report to the groups responsible for implementing their suggestions? This should have been enough.

But no, our Student Government Association, seemingly unwilling to plunge into the real work awaiting it, degenerates into a group of people content to sponsor contests and to do as little as possible toward fulfilling their real function.
