

# Committee Restores Fraternity Charter

The charter of Delta Tau Delta fraternity was officially restored at noon Wednesday by the Senate Committee on Student Affairs, Wilmer E. Wise, assistant to the dean of men, announced yesterday.

The fraternity will be on probation until Oct. 10, 1961.

# Senate Gets 3rd Party Application

The proposed Liberal party's application for charter will be discussed Wednesday by University Senate Subcommittee on Organization Control according to Dr. Alexander Black, chairman.

Under Senate regulations, any student organization must be chartered in order to be recognized by the University. This involves presenting a constitution, bylaws, officers and advisors' names to the Senate Student Affairs Committee.

The committee then refers charter or constitutional changes to the Organization Control Subcommittee which reviews the group's petition. The subcommittee then makes its recommendations to the full committee.

Richard Snyder, Liberal party chairman, said he has encountered nothing but enthusiasm and encouragement from University officials and that he sees no reason why the charter would not be approved.

Liberalites can be optimistic after President Walker's remarks about the party, said Snyder. President Walker, in a campus radio broadcast Wednesday, said that the Liberal party was just as practical as the other parties and, "if the students want it . . . good luck."

## Circa to Accept Entries

Manuscripts for Circa, the University literary magazine, will be accepted at the Hetzel Union desk.

Any University student may submit a manuscript. Manuscripts will be returned to the author if accompanied by a stamped self-addressed envelope.

## Correction

The name of Anna Yachwan, editor, was inadvertently missed yesterday in the list of new officers of Pi Omega Phi, professional business education fraternity.

Wise said. This will mean that the fraternity will be under close supervision, but will be able to participate in all regular fraternity functions, Wise explained.

In restoring the charter, the committee requested that the fraternity abide by the rules of the borough, commonwealth, and nation, Wise said.

At the end of the probationary period, the fraternity will be required to submit written evidence that it is following the proposals it submitted to the committee for the operation of the fraternity.

Before the charter could be restored, the fraternity had to submit proposals to the committee on its operations—financial, social, rushing, etc. These proposals were submitted last Thursday and the final plans were approved Wednesday.

The Delta charter was suspended May 24 by the Senate Subcommittee on Group Discipline on charges of holding an unauthorized Sunday jam session and in view of other offenses committed by the house during the year.

It was decided that the jam session was a violation of a directive issued in the spring of 1959 by Dean O. E. Edward Pollock, former assistant to the dean of men in charge of fraternity affairs. The directive stated that Sunday afternoon "jam sessions" at fraternity houses were no longer approved social functions.

# Den's Hours Remain in Doubt

The meeting to decide if the Lion's Den in the Hetzel Union Building should stay open until 11 p.m. permanently on weekdays has been postponed.

The meeting was postponed, according to Robert C. Proffitt, director of Food Service, because persons who must attend are out of town this week.

The meeting with students who proposed the late hours and Food Service representatives will be held in the early part of next week.

The Lion's Den will continue to be open until 11 p.m. on weekdays until a definite decision is made.

Lake Winnebago, Wis., is the largest inland body of fresh water totally within the boundaries of one state. It is 28 miles long and 12 miles wide.

# Cheering Students Choke College Ave.

By NICKI WOLFORD  
Assistant Editor

A crowd of 200 PSU students literally took over College Wednesday night holding up traffic while they chanted "We want Syracuse."

Exhibiting true Penn State spirit as the word of the Nittany Lion's orange coat spread over the campus, the men started a pep rally which lasted from 11:30 p.m. to about 1 a.m.

The rally, which one boy described as "just spontaneous" and another claimed started in Nittany 32, apparently did begin in the Nittany area moving to the North and West Halls and back to the Pollock area.

Receiving a "slightly cold" welcome from the Pollock residence counselors, the undaunted men began their march up College Ave.

At the foot of the Mall, the rally turned up toward the Lion. Reaching the freshly washed symbol of our best, they were greeted by the men from Hickory House stretched out on blankets for the night's guard.

Peter Olsen of Birch House was quick to explain that the men in his house were organ-

ized into teams of three men who were to guard the Lion in two hour shifts.

Several members of the group doubted that the Orangemen were actually here — noting that "if they had done it, they would've used something a little more tough to get off."

While the boys were at the Lion a campus patrolman drove up and asked if a counselor was with them. Settling for a residence hall president, the patrolman explained that complaints about the yelling had been registered by town residents in cars and the "girls' dormitories."

"I don't care how much walking around they do; but tell them to cut out that yelling," the patrolman said.

The rally men started back to Nittany in smaller groups, picking up more men along the way.

At Nittany, a short distance away from a number of grim, tired looking counselors, the group gathered with the intention of getting into the Pollock quadrangle.

As they moved in for the final push into the Pollock area, however, they were met by more counselors flashing lights and a car filled with the counselors' "reserves."

The boys didn't seem to fear (Continued on page twelve)

# Kenney Presents Talk At Engineering Forum

E. S. Kenney, research associate with the Nuclear Reactor Facility, presented a talk at Lansdale Tuesday at the Engineering Forum sponsored by the Philco Corporation, on "Radiation — Aid or Adversary."

Mr. Kenney discussed the fact that radiation is fast becoming a necessary part of our lives. He outlined benefits and the hazards which will face mankind and how man will have to control this new environment.
