

Operation Clean-up Education, To Hit Stone Valley MI Election Dates Set

Conventional fall housecleaning tools—mops and brooms—will be replaced by rakes, shovels and shears as students and faculty members begin Operation Clean-Up at Stone Valley this Saturday.

The housecleaners will work to the staccato rhythm of Gene Kelly's voice broadcasting the Lion-Illinois game over a public address system and will enjoy a free hot-dog roast at the end of the day.

Stone Valley Area Scales On Display

Two scale models of the Stone Valley Area have been set up on the Hetzel Union ground floor.

One model is of the entire area and is done in colored felt, terry cloth and bias tape. Featured in the model are the sites of the civil engineering, mineral industries and forestry camps. This model gives the observer an idea of the size and extent of the land owned by the University.

The second model is a projection of the recreational area featuring the 70-acre lake area. The base of this model is clay of varying shades of green and brown.

Duane Alexander, chairman of the SGA Stone Valley Committee, said that the displays were set up to acquaint the student with the area and the facilities to be offered.

When the area is completed there will be facilities for swimming, boating, camping, fishing, hunting, hiking and a cabin for year-around use.

Curtin Rd. Will Close, Traffic to Be Rerouted

Curtin Rd. will be closed to all traffic between Shortlidge Rd. and Entrance Rd., from 8:30 a.m. until 4:30 p.m. tomorrow.

Traffic will be detoured via Park Ave. while excavation for utility lines is made on Curtin Rd., near the U.S. Pasture Research Laboratory.

The project, sponsored by the Student Government Association, is part of an all-out effort to prepare parts of the recreation area for use in the winter and summer of 1961.

Since Saturday is Greek Week Work Project Day, some Greek groups will be assigned to the area. The Forestry Club and the Outing Club have also offered their assistance.

Duane Alexander, chairman of the SGA Stone Valley Committee, said that work will be supervised by qualified students and faculty members.

Scrolls, senior women's hat society, will sponsor a concession stand which will operate during the afternoon. Funds collected from the sale of coke, sandwiches and candy will be used to support the three scholarships offered by Scrolls each spring.

The scholarships, which pay full tuition, are open to girls of third semester standing. They are awarded on the basis of scholarship, need and character.

The Association of Independent Men will provide bus transportation to the area. Buses will leave from the Pollock area parking lot between 1 and 1:30 p.m. Saturday.

Student Education Group Will Meet Tomorrow

The Pennsylvania Student Education Association will meet at 7:30 tomorrow night in 106 Home Economics.

A discussion of "Legal Aspects of Teaching" will be followed by a question and answer period.

Those who have not already joined PSEA will have an opportunity to do so at tomorrow night's meeting.

Applications for education council are available at the HUB desk, the education council announced last night at its meeting.

All freshmen in education can apply for the nominations and applications must be returned to the HUB desk by Oct. 26, after which screening for the selection of candidates will be held by council.

Elections will be held Tuesday and Wednesday, Nov. 1 and 2, at the HUB. On Nov. 3 a meeting will be held at 4 p.m., Nov. 2 in freshmen of education council to orient them to the group.

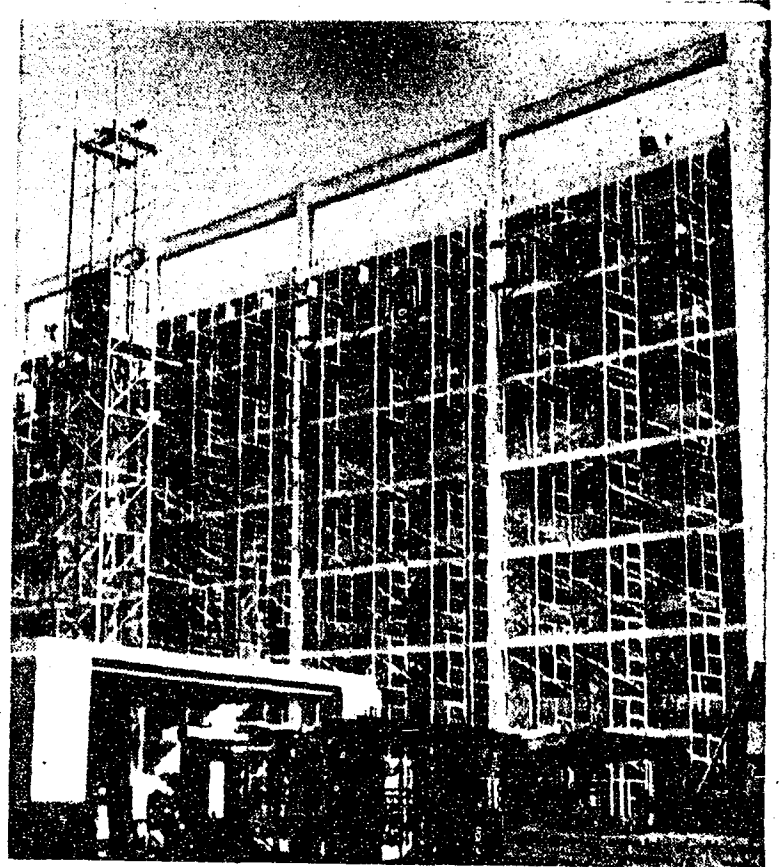

In other business, it was announced that the second coffee hour sponsored by the council will be held at 4 p.m., Nov. 2 in dining room "C" of the HUB. Lu-rene Jochem, senior in home economics from Pompton Lakes, N.J., will be the speaker.

It was also announced that the first Pennsylvania State Education Association will meet at 7:30 p.m. Thursday in 106 Home Economics South. The speaker will discuss legislation that concerns education in the state. The year's program will be set up at this time.

Mineral Industries Student Council scheduled Nov. 1 as the date for election of freshman members. Nomination blanks are available in the lobby and on the bulletin boards of Mineral Industries.

Also at the meeting last night, the council announced 10 nominees from the College of Mineral Industries for the 1960-61 edition of "Who's Who In American Colleges." They are Gary Bergholtz, Eugene Grummer, Stephen Kirsch, Eric Kreidler, Joel Myers, Jeffrey Parsons, William Rovesti, George Sabol, William Shenk and Otis Slagle.

Early plans for the English Channel tunnel between England and France were held up in the 1880s by the cautious British military who feared an invasion from the continent into Victoria Station.

THE UNIVERSITY'S NEWEST DORMS are rapidly nearing outside completion. The Turf Plot Residence Halls will be ready for occupancy next fall.

Glubb Will Open Lecture Series

The 1960-61 University Lecture Series will open Nov. 3 with Lt. Gen. Sir John Bagot Glubb speaking on "The Middle East -- Storm Center of the World."

Two other speakers have also been scheduled. They are Norman Cousins, editor of the Saturday Review, Feb. 24, and James Reston, head of the New York Times Washington bureau, April 25.

All the lectures are scheduled for 8:30 p.m. in Schwab. Plans for ticket distribution to students and sales to faculty members and non-students will be announced later.

French-Language Film To Be Shown Tonight

A French-language film, "The Foxiest Girl in Paris," has been scheduled to be shown by the French Institute at 8:45 tonight in the auditorium of Home Economics South.

While the film is intended primarily for students of French, others interested may attend. Attendance will be limited to 200.

Shortlidge Rd. at College Ave.
OPEN UNTIL 8 P.M.

Columbia - Southern Chemical Corporation

INTERVIEW DATE: OCT. 21

Opportunities available in six plants: New Martinsville, W.Va., Harberton, O., Lake Charles, La., Corpus Christi, Tex., Bartlett, Calif., and Beauharnois, Quebec, Canada.

Producers of heavy industrial chemicals: soda ash, chlorine, caustic soda, anhydrous ammonia, titanium tetrachloride, and other chlorinated products.

Research, analytical, plant problems, supervision, design, maintenance, plant layout, and standard procedure opportunities open for men in these categories:

BS, MS, PhD Chemists; BS, MS Chemical Engineers; BS, MS, Electrical & Mechanical Engineers; BS Industrial Engineers.

Blough Discusses Economics

The relationship of economics to world peace was discussed by Roy Blough, professor of economics at Columbia University.

Blough addressed the first meeting of the graduate school Lecture Series with a speech entitled "Nationalism and Organized World Economy."

A problem in international trade has arisen out of the development of the national states in the past 300 years, he said.

There is no longer the international world super power common in the days of both economic and political empires, Blough explained.

Under the old world trading empires, there was an uneasy peace, but trade was carried out with regulation, he said. The Soviet Bloc of today closely resembles the empire system,

however, it is not completely such.

"We must find a pattern for dealing with the economic system of today," Blough said.

The United Nations gives much aid to the weaker, smaller and newer states; this aid helps to speed up the formation of national states, he said.

The main problem with world economics today, according to Blough, is a cultural lag brought about by technological advance and a rapid burst in population growth.

Advances in the field of medicine have drastically cut the world's death rate. The birth rate, however, remains the same as before when many births were necessary due to a high infant fatality rate, he said.

The major proportion of the "population explosion" is affecting underdeveloped countries.

Technological advances such as the development of synthetics al-

so affects these countries. Malaya, cited as for example, has relied heavily on its export of raw rubber. The market for this commodity has fallen off considerably due to synthetics, Blough added. There is much economic pressure on these countries to catch up with their population growth. They must upset their present economic systems to do this, Blough said.

With industrial development in these countries, the United States faces strengthened competition in the world market, he said. "This country used to have the world's most advanced technology; we taught others, and now, they too have it," Blough said.

These nations are ready to enter the competition with older industrialized nations. Even the USSR is ready now to enter trade, whether for political or economic reasons; we don't know, Blough added.

Have Fun
ROLLER SKATING
all sessions supervised
There's music, laughter and all the ingredients for a perfect time on a date. Skating's great sport, inexpensive and wholesome entertainment.
HECLA PARK
15 miles east of State College on Route 64
Wed., Fri. & Sun. Nights 8 - 10:30 p.m.
