

Over 800 Men Rush Fraternities

About 800 men registered for fraternity rushing Sunday night at a special rushing orientation meeting.

Approximately 60 more registered yesterday, Martin Leshner, in charge of fraternity public relations for the Dean of Men's office said last night.

Registration, however, is not necessary for rushing, Leshner emphasized. It merely puts a rushee's name on the lists of houses to which he has not been invited, he said.

This is the first time registration has been tried for fraternity rushing, he added. The Panhellenic system has used it for a number of years but it has never been adopted by IFC.

Starting Friday the fraternity Rush Chairmen use the registration cards which will be filed alphabetically in the IFC office, Leshner said. All cards must be used in the office and none may be removed, he added.

Any men interested in rushing who did not register and would like to do so, may still register by going to the IFC office, he said.

Rushing counseling is another new feature innovated this year, Leshner said. Any rushee who would like general information or who has questions that he doesn't want to ask at the house may call the dean of men's office and make an appointment for counseling.

Rushees are especially cautioned to rush for a long time and be very sure of their preferences before cutting a group, he said. Since rushing does last for such a long time, the rushees should take advantage of this, he added.

Rushees are also encouraged to go to rushing smokers and other parties open to all rushees, he said. No invitations are needed to attend these events and in this way a rushee gets to know more groups, he said.

4 Readers To Perform In Workshop

Several poems and short stories will be presented by members of the University Readers at the weekly workshop at 4:15 p.m. Thursday in 309 Sparks.

The meeting is open to all students.

Janet Bauer, sophomore in arts from Pittsburgh, will read "Sixteen" by Maureen Daly. Charles Coughlin, junior in arts and letters from Easton, will present two poems by James Wendel Johnson, "The Creation" and "Go Down Death."

Helen Jewells, sophomore in arts and letters from Tamaqua, will read a short story by Bella Cohen entitled "The Laugh."

Two other members of the group will present readings at 9 p.m. tomorrow at the Hillel Foundation.

Mary Louise Pappas, senior in arts and letters from Villanova, will read Steven Vincent Benet's "The Sobbin' Women." Margaret McPherson, senior in arts and letters from New Park, will present "Louisa, Come Home" by Shirley Jackson.

Prof Asked to Comment On Welsh Phil Paper

Dr. Henry W. Johnstone, Jr., associate professor of philosophy, who is spending this year at Trinity College in Dublin, Ireland, was invited to comment on a paper by Professor J. R. Jones of Swansea (Wales) entitled "Are Intentions Dispositions?"

The paper was read at the opening meeting of the Dublin University Metaphysical Society recently.

Choir Will Make 4th European Tour

By CAROL KUNKLEMAN

All aboard for London, Paris, Vienna! This fall will be familiar to members of the University Chapel Choir touring Europe this summer from July 17 to Aug. 26.

The tour marks the fourth time the choir has been abroad. Other trips were made in 1955, '57 and '59. During

these tours the group visited famous European cities such as the three mentioned plus Iron Curtain cities such as Warsaw and Prague.

They also made concert appearances in churches and schools such as King's College Chapel, Cambridge; the Royal Academy of Music and Westminster Abbey, London; and Canterbury Cathedral, Oxford.

"The value of going with the tour is that so many avenues of personal contacts are open to us and not to average tourists," Mrs. Willa Taylor, director of the Chapel choirs, said.

Mrs. Taylor said that these contacts are possible because officials of cities and schools welcome the choir as official American representatives.

The Mozart Festival in Salzburg, the Wagner Festival in Bayreuth and the Edinburgh Festival in Edinburgh have been sched-

uled for the tour.

Choir concerts will be given in London, Geneva, Vienna and Prague.

Accompanied by Mrs. Taylor and James W. Beach, assistant director of the Chapel choirs, plus members of the Chapel staff, the group will fly to London from New York via BOAC Britannia Turbo-jet.

Applications for the trip are available at the Chapel. Members of all the Chapel choirs are eligible for the tour. The cost will be approximately \$1000, Mrs. Taylor said.

Since many members and potential members have expressed interest in the tour tryouts will be held, she said.

All applications, plus a contract signed by the choir member and his parents and an initial payment fee of \$100 must be returned to Mrs. Taylor by Dec. 1.

WDFM to Air Elex Returns

WDFM will begin broadcasting the election returns at 9 tonight on a special program called "Campaign '60—Results."

Appearing on this program will be H. Eugene Goodwin, director of the School of Journalism. Goodwin traveled with Vice President Nixon as a reporter for the Washington Star in 1956 when Nixon was campaigning for the vice presidency. He will offer comments and interpretations of the results.

Stephen Milner, WDFM news director, and Neal Friedman, WDFM news broadcaster, will announce the returns as they are available.

WDFM will maintain a direct line from the Bellefonte County Court House for the Centre County returns.

Ad Fraternity Holds Initiation

The Donald W. Davis chapter of Alpha Delta Sigma, men's professional advertising fraternity, held a breakfast initiation recently.

Initiated at the breakfast were James Constein, Eugene Downer, Ronald Goodyear, Wayne Hillinski, Richard Mears, William Nace and Jack Randinelli. Also initiated as a professional member was Edwin Hirsh, a graduate of the University and now advertising manager for Parent Metals, Inc.

During pledge week, the pledges wore signs which advertised local businesses. First place was awarded to Randinelli advertising for the A Store; second place, Mears for Centre County Film Lab, and third place, Downer for Balfour jewelers.

Solid opportunities with solid state devices

A big part of Western Electric's job is to manufacture the miniature "new arts" products that are changing the science of communications. It's a job which offers you a challenging career—a chance to plan new methods of mass producing ever-improving kinds of transistors, ferrite devices, diodes, special purpose electron tubes, etc.

You'll be with a company that is expanding rapidly in this field. At present our Allentown and Laureldale, Pa., plants are devoted exclusively to making electron devices, and a big new plant is under construction in Kansas City. The needs of the Bell Telephone System for these products are increasing daily and will multiply enormously with the introduction of Electronic Central Office switching now nearing trial operation.

These devices are changing the scene at all our manufacturing plants as they go into the startling new communications products developed by our associates at Bell Telephone Laboratories. From microwave transmission equipment to submarine cable amplifiers, our products call

for creative production engineering, installation planning, and merchandising methods. Our job for the Bell System and the U.S. government has grown to the point where we are now one of the nation's "Top 11" in industrial sales. And your chance to play an important part in our future growth is solid!

Opportunities exist for electrical, mechanical, industrial, civil and chemical engineers, as well as physical science, liberal arts, and business majors. For more information, get your copy of *Consider a Career at Western Electric* from your Placement Officer. Or write College Relations, Room 6105, Western Electric Company, 195 Broadway, New York 7, N. Y. Be sure to arrange for a Western Electric interview when the Bell System recruiting team visits your campus.

Principal manufacturing locations at Chicago, Ill.; Kearny, N. J.; Baltimore, Md.; Indianapolis, Ind.; Allentown and Laureldale, Pa.; Winston-Salem, N. C.; Buffalo, N. Y.; North Andover, Mass.; Omaha, Neb.; Kansas City, Mo.; Columbus, Ohio; Oklahoma City, Okla. Engineering Research Center, Princeton, N. J. Teletype Corporation, Skokie, Ill., and Little Rock, Ark. Also Western Electric distribution centers in 32 cities and installation headquarters in 16 cities. General headquarters: 195 Broadway, New York 7, N. Y.
