Flying Club Plans To Buy Airplane

By JOAN MEHAN

Working under the premise that with capable instruction almost anyone can learn to fly, the student flying club is now planning to give its members flying instructions at reduced rate by purchasing its own airplane.

Robert Joyce, acting president, said the club will put a down payment on an Aeronca Champ airplane this weekend so that members will be able to start flying as soon as possible. Joyce added that if the club gets 50 members they will purchase another plane. He reported that the membership is growing rapidly.

The membership fee is $60 which goes toward the purchase of the plane, insurance and hanger facilities. Each member will receive a share of the club when it incorporates. It will be possible for a member to sell his share for $60 if he wishes to leave the club or graduates.

Monthly dues of $3 will be charged for long-term maintenance costs of the airplane, Joyce announced.

Joyce said that with the reduced rates the club will offer its members, student pilots can fly for $6 per hour including instruction. Licensed pilots and students who have soloed can fly for $3 per hour. At Peterson Memorial Field where the flying will be done, there are six certified Federal Aeronautical Association (FAA) instructors available.

Joyce said that he and Herbert Shaw, executive committee member, received moral support when President Eric A. Walker reacted favorably toward the idea of a flying club on campus.

clause, said Barry Flashman, vice chairman.

"If we decide to revise our constitution again," he said, "I am going to ask for a written statement as to what they want from us—we thought we had already compiled with their requests."

The present constitution requires that all prospective members be screened and voted on by a 10-man membership committee.

Diem Will See Student Groups

Albert E. Diem, vice president for business administration has announced that he would be available to student groups for discussion concerning programs for which he is responsible.

These areas of responsibility include, in part, campus patrol, physical plant, purchasing, food service and housing.

Diem said that he would personally meet with the interested groups as far as his schedule would permit. If a conflict of schedules arose, Diem said he would be willing to assign an associate familiar with the topic to be discussed to appear in his place.

These discussions will help the administration and students to work together to achieve common ends, Diem said.
