

Panther QB's Fit Any Situation

No matter what the situation, Pitt has a quarterback for it.

Ed Sharockman is the runner; Jim Traficant the passer; and Dave Kraus is the strategist.

All three have had their moments this year even though Pitt's record is only 4-2-3.

Last Saturday against Army, Sharockman salvaged a tie for Johnny Michelosen's Panthers when he ran back an intercepted pass 39 yards for a touchdown.

He is Pitt's fourth leading ground gainer with a 5.4 average on 216 yards in 40 trips.

Traficant, possibly the most dangerous of all, is a sophomore who has thrown four touchdown passes this year. In addition, he's completed 29 passes in 57 attempts for 407 yards.

Kraus was the number one signal-caller when the season began, but Traficant's air arm and Sharockman's running have dropped him to number three.

However, he still plays quite a bit and when the Panthers are in trouble Michelosen often goes to the calm junior in an effort to get the Pitt attack rolling.

All three signal-callers will have some added responsibility tomorrow when the Panthers close out the season against Penn State in Pitt stadium at 1:30.

The reason is that Pitt's lead-

ing ground gainer, Bob Clemens, is out with a leg injury.

One of the famed C-boys, the junior halfback pulled some ligaments in practice this week and he isn't expected to be ready by game time.

John Yaccino, a junior halfback from Hazleton, Pa., will probably take Clemens' place in the starting lineup.

The other C-boys—fullback Jim Cunningham and halfback Fred

Cox—will try to make up for Clemens' absence.

Cox ruined State last year with an 86-yard touchdown run while Clemens chipped in with a 35-yard TD dash.

This season Cox is Pitt's second leading ground gainer with 289 yards in 75 carries. Cunningham has gained 260 yards in 77 carries.

Downes Confident

LONDON (AP) — Terry Downes, British middleweight champion, confidently predicted "I can beat Pender with a bit to spare."

Paul Pender of Brookline, Mass., agreed to defend his version of the world middleweight championship against Downes in Boston Jan. 21.

White for Hodges?

LOS ANGELES (AP) — The Mirror said that the Boston Red Sox "have now indicated they are ready to make a swap of 33-year-old catcher Sammy White for Jim Gilliam or Gil Hodges."

Environment for Exploration

The John Jay Hopkins Laboratory for Pure and Applied Science at General Dynamics' General Atomic Division in San Diego, California, is a modern center of research and development, where new ideas and techniques are vigorously pursued. Here, strong engineering and development activities are matched with broad basic theoretical and experimental research to create an ideal environment for productive efforts in the nuclear field.

Here, advanced work is underway on the High Temperature Gas-cooled Reactor (HTGR), which promises to be a major short cut to the nation's goal of economic nuclear power. The prototype HTGR plant will be constructed by 1963 for Philadelphia Electric Company and High Temperature Reactor Development Associates, Inc.

Here, engineers and scientists work in a creative atmosphere on other advanced programs, including the MGCR gas-cooled reactor and closed-cycle gas turbine system for merchant ship propulsion . . . TRIGA reactors for training, research, and isotope production, which are now being installed on five continents . . . small nuclear power systems . . . test reactors . . . nuclear power for space vehicles . . . thermoelectricity . . . controlled thermonuclear reactions.

Rapid expansion of these programs has led to increased engineering activity and created openings for men, preferably at the graduate level, who seek a high degree of individual responsibility coupled with unusual opportunities to demonstrate their initiative and ability.

Nuclear Engineers, Metallurgists, Ceramists, Mathematicians - Programmers, and Experimental and Theoretical Physicists are invited to consider opportunities now existing in varied program areas. Please contact the placement office to arrange an appointment with the General Atomic representative who will be at your campus on **NOVEMBER 18**

**Beauty
without tears**

New

AR-EX Hypo-Allergenic

- Mascara
- Eye Pencil
- Eye Shadow

If you have experienced stinging, smarting or irritation from usual eye make-up, try new AR-EX hypo-allergenic eye beauty aids. Recommended by doctors. As glamorous as they are safe—in fashion fresh shades.
