

Players to Present Final Performance

The Penn State Players will present their final performance of Peter Ustinov's "Romanoff and Juliet" at 8 p.m. tonight and tomorrow at Center Stage.

Directed by Warren Smith, associate professor of theatre arts, the play mixes a love affair with international politics in a satire on Russian-American relations.

Tickets for both performances can be obtained at the Hetzel Union desk today and tomorrow.

The next Player show, "Summer and Smoke," by Tennessee Williams, will open Dec. 2 for a six weekend run at Center Stage.

The University has the only Mineral Industries Art Gallery in the world. It was established in 1930.

Pleasantly Mild Weather Will Continue Today

Little change in the weather is expected for the next few days. A storm system that is just moving inland from the Pacific onto the West coast of Canada may bring cloudiness and precipitation to this area by Sunday afternoon.

The local forecast indicates a continuation of the sunny and mild weather today. The maximum temperature will be near 53 degrees.

Mostly cloudy and cool weather is predicted for tonight and a low of 36 is expected.

Tomorrow should be partly, breezy and cool with a high temperature of 50 degrees.

Two Delegates Chosen

Gerald Logue, junior in engineering science from Parker, and Richard Westrick, sophomore in electrical engineering from Allentown, have been named co-chairmen for the All-University Career Day, Stephen Brown, chairman of Inter-College Council Board, said yesterday.

JACK SAVED HIS COMPANY \$10,000 ON HIS FIRST ASSIGNMENT

While Jack Trabert was in college he had some definite career ideas. He knew what he wanted—a job with a payoff for good judgment and hard work.

With a B.S. in Business Administration from the University of Nebraska, Jack knew he could look in many directions. And he did. He talked to 20 companies. And then in August, 1957, joined Northwestern Bell, in Omaha, Nebraska.

His chance to show what he could do was not long in coming. On his first assignment Jack came up with answers that made it possible to handle long distance calls made at night in the Omaha area with less force and equipment than was needed under the old system. This resulted in a \$10,000 annual saving.

Next, Jack worked on a training and devel-

opment program for "mark sensing"—a new method for mechanized processing of long distance charges.

Today, Jack has an important role in planning and developing telephone facilities to keep pace with Omaha's ever-increasing need for long distance services.

Jack puts it this way—"If a guy can keep his average up, there are places to go in this outfit. A man doesn't have to wait around for opportunity to knock—he has all he can handle right from the start."

If you want a job in which you're given a chance to show your stuff, and held strictly accountable for your decisions, right from the start—then you'll want to visit your Placement Office for literature and additional information.

"Our number one aim is to have in all management jobs the most vital, intelligent, positive and imaginative men we can possibly find."

FREDERICK R. KAPPEL, President
American Telephone & Telegraph Co.
