

# Booters Meet Pitt In Season Finale

Special to the Collegian

PITTSBURGH, Pa., Nov. 18 — Penn State and Pitt are just about out of the running for a berth in the NCAA regional soccer tourney coming up next week. But you can bet there will be no dull moments when these two traditional rivals clash this morning at 10:30 here.

Last year the Panthers downed State, 1-0, in a defensive battle and this year's game may prove to be another low-scoring affair.

Both teams have top notch goalies, a strong defense, and relatively weak attacks.

Lion goalie Dave Grubbs has been hampered by injuries again this year, but when he's fit, he ranks with the best in the East.

Pitt goalie George Zanicopoulos was honorable mention All-American last year.

State's defense was pretty generous in the first four games this year, giving up a total of 16 goals for an average of four scores per game.

But with Grubbs and Lion full-backs Wayne Rodgers and John Miller working together in the last four contests there has been considerable improvement. State has allowed only eight goals against such powerhouses as Maryland, Navy, Temple and Army.

On the other hand, the Lion offense has been a disappointment, scoring only 11 goals all year.

Before last Saturday's game with Army, State still had hopes for a winning season but the Cadets eliminated any possible chance with a 3-1 victory.

Lion coach Ken Hosterman is taking it all pretty philosophically, though.

Disregarding our bad start it turned out to be a pretty good year after all," he said yesterday.

"After last year's record (2-7), our boys lacked confidence at the beginning of the year. But they found themselves in the Maryland game and we've been going good since then."

After losing a close game to the Terps, State pulled upsets over Navy and Temple before running into a roadblock against Army.

Hosterman will use the same lineup against Pitt that he used against the Cadets last week.

Howie Farrer will start at center-forward with Glenn Ream and Lou Van Rafelghem winging him.

Val Djurdjevic and Gene Rai-

VAL DJURDJEVIC

ford get the nod at the inside posts.

Carlos Astiz, Bill Rierson and Jay Stormer are at halfback with Miller and Rodgers at fullback. Grubbs will be the goalie.

## Washington State End Seeks Record

By THE ASSOCIATED PRESS  
If Washington State's Hugh Campbell catches just one pass against Washington today, he'll have an NCAA record.

Campbell, a sophomore, already has tied the major college record of 61 catches in a season, shared by Dave Hibbert of Arizona (1958) and Chris Burford of Stanford (1959).

His 807-yard gain on receptions is only 57 short of the record set by another Washington State catcher, Ed Barker, in 1951 with 864.

Campbell isn't threatening the touchdown pass record, but he's leading in that department with 9 to 7 for New Mexico State's Pervis Atkins, who has caught only 22 passes.

# Missouri Can Clinch 'Big 8' Title

By The Associated Press

Surprising Missouri, the nation's top-ranked college football team, goes after the Big Eight Conference title today while harboring even more fervent hopes of clinching its first national championship as a host of teams wind up the 1960 season.

The Tigers (9-0) already have an Orange Bowl bid locked up and can concentrate on a perfect season against the Jayhawks, who have lost to Iowa and Syracuse, and tied Oklahoma. Even if Kansas should win, and Jayhawks are 7-point underdogs, an NCAA ban on post-season play nullifies its bowl hopes.

Iowa, second-ranked and with at least a share of the Big Ten title sewn up, plays Notre Dame (1-7) while Minnesota tries to get a tie for the Big Ten crown against Wisconsin.

More important to the Gophers (7-1) is that a victory could mean a ticket to the Rose Bowl. Minnesota has beaten Iowa (7-1) and this could turn out to be the determining factor in choosing between the two.

Oldest player on Penn State's football squad is sophomore center Joe Galardi. He's 23 and a U.S. Navy veteran.

# Cage Clinic Will Be Held Here

Two of Pennsylvania's leading high school basketball coaches, Frank Mastrocola of Altoona and Tom Carmody of Bethel, will divulge some of their success secrets during the annual Penn State Basketball Clinic at Rec Hall Nov. 26.

John Egl, Penn State basketball coach, Ernest B. McCoy, Penn State athletic director, and John Solic, president of District Seven PIAA basketball officials, also will speak.

Mastrocola, who will pilot the Altoona High five for the first time this year, compiled an amazing record at the helm of Altoona's Roosevelt Junior High School cagers over the past decade. Enroute to a record of 140 wins against 27 losses, his teams boasted several undefeated seasons, winning the last 99 games in 101 starts.

At the helm for Bethel Senior

High School for the first time in 1956, Carmody notched only two victories against 29 defeats. Two years later his record climbed to 13-12 and in 1959-60 reached a respectable 21-5.

During the past season, Bethel was undefeated in Section 13 WPIAL play with 14 consecutive victories, but was eliminated from further competition in the playoffs by virtue of a 53-43 loss at the hands of Farrell High School, the ultimate state champions.

## Matthews to Meet Cuban

PHILADELPHIA (AP) — Promoter Al Lewis announced yesterday he had signed Len Matthews, the No. 1 lightweight contender, and Cuban Champion Doug Vailant to head a program of four, ten-round bouts at Convention Hall Dec. 6.

## LUTHERAN STUDENT ASSOCIATION

### "ON BIRTH CONTROL"

Speaker: The Rev. Gerard Ream, Roman Catholic Chaplain

Sunday, Nov. 20 - 6:15 p.m.

412 W. College Ave.

Everyone Welcome!

## Zeroing in on the future

At Gen Tel, our aim is to develop the supercommunications system that will be needed to meet the demands of tomorrow. And we're constantly shooting new ideas at this target.

In our 24 research laboratories, more than 3500 scientists and engineers have their sights set on entirely new concepts in order to achieve these results.

Example: a task force of General Telephone & Electronics scientists, working in the unexplored areas of electroluminescence and photoconductivity, have developed an operating model of a switching device with no moving parts, that may revolutionize telephone communications. It is a thin wafer only 3 inches square that may someday connect and disconnect up to 10,000 telephone lines.

Meanwhile, this new discovery holds promise of having numerous applications in other fields, including switching and read-out devices for electronic computers.

Research is but one of the many areas in which General Telephone & Electronics is thinking and working ahead — not only to meet today's communications needs, but tomorrow's as well.
