

# Phil Prof To Lecture On Aesop

Dr. Henry A. Finch, professor of philosophy, will speak on "Plain Morals for Dizzy Minds in Aesop and His Fables" at 7:30 tonight in the Hetzel Union assembly room.

Finch's talk which will open a lecture series titled "Introducing the Liberal Arts College," is open to all students and faculty members. Following the lecture a reception will be held in the HUB lounge, to enable those attending to speak personally with Finch. Refreshments will be served at the reception.

The series, which is sponsored by the Liberal Arts Student Council, will consist of at least one lecture each month by a liberal arts professor. The next lecture will be given by Dr. Philip Young, professor of literature, on Jan. 10.

Finch earned his bachelor of arts and doctor of philosophy degrees at the University of Pennsylvania where he was a Harrison Fellow in Philosophy. He is presently chairman of the humanities staff in the general education program.

# Phi Sigma Kappa Adopts Italian Boy

The 34 members of Phi Sigma Kappa fraternity will "play papa" this year to an 11-year-old Italian boy named Angelo Ricci.

Phi Sigma Kappa has financially "adopted" Angelo through the Foster Parents' Plan of New York. Under the plan, the fraternity has promised to contribute \$15 a month toward the child's support for one year.

This is the fraternity's fourth year of participation in The Foster Parents' Plan. Last year Phi Sigma Kappa aided in the support of a 10-year-old Greek boy.

The plan is an independent, government approved relief organization designed to help orphaned or otherwise destitute children. The adoption program is financial, not legal.

The foster parent promises to contribute \$15 monthly for at least one year. Of this sum the child receives \$8 each month as an outright cash grant. The remainder is used for periodic food and new clothing packages, translations of letters, medical services and education.

Phi Sigma Kappa receives mail from Angelo about once a month during the year. Corre-

spondence between the parent and the child is handled by the plan office and is translated both ways.

Angelo comes from a poor Italian family. His father, a farm laborer, died several years ago leaving a widow and three sons. His long illness with TB completely exhausted the small savings the family had been able to set aside. In addition the family has the added burden of Angelo's uncle who is a deaf mute.

The family lives in a small agricultural village which has a scarcity of employment but a surplus of farm hands. Angelo's mother and uncle work in neighbor's fields but their combined income averages only \$10 a month.

The University owns 8979 acres of land, 236 of which includes the main campus.

# WDFM Adds Weekly Opera

University radio station WDFM has added a new feature to its current broadcasting schedule—the presentation of operas direct from the stage of the Metropolitan Opera House in New York City.

The opera performances will be broadcast on Saturday afternoons for 20 consecutive weeks. The series began last Saturday with Verdi's "Nabucco" and will continue this Saturday with Puccini's "Manon Lescaut."

WDFM is one of more than 110 network radio stations currently scheduled to broadcast the operas and one of four educational stations added to the network during recent weeks.

Regular opera intermission features will be "Opera News on the Air" and "Opera Quiz." "Biographies in Music" will also be featured in intermissions of four-act operas.

# Albers Attends Clinic

Dr. Vernon M. Albers, chief scientist at the Ordnance Research Laboratory, will attend a Navy Research and Development Clinic to be held in Pensacola, Fla., this week.

Albers will present a paper on underwater acoustics at this conference.

# Pollard to Speak

Dr. Ernest C. Pollard, visiting professor of biophysics, will speak at the annual Founders Day banquet of Phi Beta Kappa, national scholastic honor society, 6:30 p.m. Tuesday at the Autoport.

He will speak on the subject, "To What Extent Can the Physical Sciences Explain Life Processes?"

Currently on leave from Yale University, Dr. Pollard is president of the Biophysical Society.

FRESHMEN! UPPERCLASS men living in the dorms—buy your corsage now for the Mil Ball. Student Floral Agents will be located in all the dining halls. Convenient service, prompt delivery.

TONIGHT Dr. Henry Finch, professor of Philosophy will speak on "Plain Morals for Dizzy Minds: Aesop and his Fables" in the HUB assembly room at 7:30 p.m. Refreshments at 8:30 p.m.

CHRISTMAS CHEER Collection Boxes available in dorms and fraternities; Dec. 8-9.

Telephone engineer Bill Pigott, left, and helicopter pilot plan aerial exploration for microwave tower sites.

# "I ENGINEERED MICROWAVE TOWER LOCATIONS ON MY FIRST ASSIGNMENT"

When Bill Pigott knocked on the door of Pacific Telephone, he had two big assets. One was an electrical engineering degree from Seattle University. The other was a craving to jump right into vital engineering problems.

It was not long before Bill was exploring Washington's rugged Cascade Range in a helicopter to find sites for microwave relay towers—part of a multimillion dollar telephone construction job. Today, it's considerable satisfaction to him to see these towers spanning the mountains, knowing that his planning helped put them there.

Other important assignments followed: engineering maritime radio systems, SAGE systems—figuring engineering costs for Air Force Titan missile bases.

"Our people respect a man's engineering training—you really get a chance to show what you've got on the ball," Bill says. "I was up to my neck in tough engineering problems right from the start."

If you want a job where you put your training to work from the day you hang up your hat—you'll want to visit your Placement Office for literature and additional information.

"Our number one aim is to have in all management jobs the most vital, intelligent, positive and imaginative men we can possibly find."

FREDERICK R. KAPPEL, President  
American Telephone & Telegraph Co.
