

Party Finance Bill May Go to Court

If the students do not vote for the deletion of the Student Government Association finance bill in the coming elections, it will be brought before the SGA Supreme Court, Richard Snyder, chairman of the proposed Liberal party said last night.

The bill, which has been put on the ballots as a student referendum, gives the SGA Elections Commission power to spend \$700 for party or independent campaign publicity. Liberal party endorsees, campaigning as a group of independents, have refused to accept any of the allocated money, and have decided to go without commercial publicity.

Mr. X Tells Piddle Party Purposes

In keeping with the mystery surrounding the Piddle party platforms distributed last week, an anonymous caller telephoned radio station WDFM late Saturday night to "explain" the Piddle party.

In a taped phone conversation the caller who claimed to be active in the Piddle organization said that the platforms were written as a satire on campus politics and the purpose of the anonymous "platform committee" was to amuse and to "get team-type interest in student affairs."

The spokesman said that no plans for unveiling the secrecy surrounding Piddle party is anticipated. When asked if the party would run student government secretly if ever in office, the caller said that he doubted if the administration would approve of student government being run by the "underground."

WDFM spokesmen Roland King and Dennis Foianini asked the caller about the number of platforms distributed and were told that the total was approximately 1000. The caller also said, in reference to an inquiry of local printers by The Daily Collegian, that the platforms were not printed in town.

The caller also said that "Collegian bloodhounds" posed a threat to organization secrecy.

Snyder said that the bill had been "flagrantly violated" when the Elections Commission printed Campus and University parties' platforms in The Daily Collegian. He said that when the independent candidates decided not to accept SGA money, "they thought they would only be losing poster displays and radio time."

The bill states "that commercial radio time and printed poster displays . . . are to be the only commercial publicity allowed during the campaign."

Robert Umstead, Elections Commission Chairman, said that he had originally planned to put the platforms on the posters, but that the printer said it would be impossible to put both the pictures of the candidates and the platforms on one poster.

After consulting with the chairmen of both University and Campus parties, Umstead said, it was determined "that the general intent of Assembly in passing the bill was to inform the student body as well as possible." Since "there was not much time," Umstead said he decided "to interpret the Collegian as a poster" and place the party platforms in it.

Dennis Eisman, Campus party chairman, said that he pressured for Collegian space, and that he felt the independents should not object since they could have accepted the money and had their platforms in the paper also.

Cheng to Speak In New York

Dr. Tien-Hsi Cheng, professor of zoology, has been invited to lecture at a symposium on Science in Communist China Dec. 26 and 27 in New York City.

The symposium is sponsored by the American Association for the Advancement of Science and is financed by the National Science Foundation. At the symposium Cheng will also serve as a representative of the American Institute of Biological Sciences.

Cheng's lecture at the symposium follows a six-month leave-of-absence for teaching and lecturing in the Far East and Europe. From February until June he taught biological sciences in Hong Kong. While in the Far East he served as advisor on educational research and worked with an advisory board to translate Chinese scientific publications into English.

Stevenson Will Lead Religious Study Group

Dr. W. Taylor Stevenson, instructor in religious studies, will lead the study sessions for students at 6:30 p.m. Sunday and on Dec. 18 at St. Andrew's Episcopal Church parish house.

The theme of the sessions will be "Advent: The Beginning of a New Relationship" and will deal with the area of personal, business and classroom relationship as compared with the Christian idea of personal relationship.

Northwestern Prof To Speak Tonight

Dr. Donald T. Campbell, psychology professor at Northwestern University, will speak on "Quasi-Experimental Designs for Use in Natural Social Settings" at 8 p.m. tonight in 111 Boucke.

The topic will concern the problems in devising and interpreting research in field situations.

Campbell received his bachelor's, master's and doctoral degrees from the University of California, and has had articles published in both the "Psychological Review" and the "Psychological Bulletin."

Spenser Will Discuss Careers in Government

C. E. Spenser, a representative from the Social Security office, will speak on "Careers in Government" at 7 p.m. Monday in 303 Willard.

Juniors interested in summer job employment will have a chance to learn what opportunities are available if they take the Civil Service exam.

Spenser will also discuss permanent jobs in all branches of government work.

His talk is sponsored by the Liberal Arts Student Council.

the people of

AEROSPACE CORPORATION

are creating a climate conducive to significant scientific achievement

"Essentially, this corporation will be people—people of the highest quality. The United States Air Force recognizes that men of great scientific and technical competence can perform at their best only when they can exercise their initiative to the full under leadership which creates the climate for creativity. We expect Aerospace Corporation to provide that kind of environment."

SECRETARY OF THE AIR FORCE

Among those providing their leadership to this new non-profit public service corporation are: Dr. Ivan A. Getting, president; Allen F. Donovan, senior vice president, technical; Jack H. Irving, vice president and general manager, systems research and planning; Edward J. Barlow, vice president and general manager, engineering division; and Dr. Chalmers W. Sherwin,

vice president and general manager, laboratories division.

These scientist/administrators are now selecting the scientists and engineers who will achieve the mission of Aerospace Corporation: concentrating the full resources of modern science and technology on rapidly achieving those advances in missile/space systems indispensable to the national security.

The functions of Aerospace Corporation include responsibility for: advanced systems analysis; research and experimentation; initial systems engineering; and general technical supervision of new systems through their critical phases, on behalf of the United States Air Force.

Aerospace Corporation is already engaged in a wide variety of specific systems projects and research programs—offering scientists and engineers the opportunity to exercise their full capabilities, on assignments of unusual scope, within a stimulating environment.

Immediate opportunities exist for MS and PhD candidates completing requirements in engineering, physics, and mathematics, and interested in:

- Theoretical Physics
- Experimental Physics
- Inertial Guidance
- Propulsion Systems
- Computer Analysis
- Applied Aerodynamics
- Space Communications

Those capable of contributing in these and other areas are invited to direct their resumes to:

Mr. James M. Benning, Room 148
P.O. Box 95081, Los Angeles 45, Calif.

AEROSPACE CORPORATION

A new and vital force engaged in accelerating the advancement of space science and technology
