

June Grads May Check Placement

Students who are graduating next semester should begin looking into career opportunities now, Robert G. Schnelle, assistant head of the University's placement service said recently.

In the placement office are job files which a student may consult, containing information from various companies and descriptions of the types of employment they offer, he said.

"Students can also consult the bulletin board in the Placement Bureau which has a list of the companies that will be sending representatives in the spring to interview graduating seniors," Schnelle said.

Interviews will be held from Feb. 13 until the end of the first week in May.

The Placement Bureau is also sponsoring a Career Exposition, which will be held in the Hetzel Union Building April 11 and 12.

This exposition is run by students selected by the student council of each college. The students contact employers from government jobs, private industry and non-profit organizations, to get representatives.

Each representative explains to interested students what his field offers to college graduates, Schnelle explained.

Although the Placement Bureau does not place people in the field of education, there will be representatives from this field at the exposition, he said.

"The greatest demand for employees is in the technical field, such as engineers and scientists," Schnelle said, "but there are also many positions available in sales and in finance."

"The Placement Bureau aids approximately 75 per cent of graduating students, by giving them vocational help, maintaining job files and obtaining interviews for them," he said.

AgEd Senior Wins \$75 Prize For Algae Talk

Thomas Roberts, senior in agricultural education from State College, was awarded \$75 as first prize last week in the Guldin Speaking Contest. Roberts' topic was "Algae As Food."

David Graham, senior in zoology from New Canaan, Conn., received the \$50 second award for his speech, "Of Mice and Men." Richard Marshall, junior in agricultural education from Hershey, won the \$25 third place prize.

Dale Steadman, senior in agricultural education from Tryonville, Paul Semmel, senior in agricultural education from Schnecksville and Earl Harbaugh, senior in general agriculture from Ronzerville were awarded \$10 each for the fourth, fifth and sixth places.

The contest was sponsored by the Coaly Society and made possible by the Paul R. Guldin Fund.

Christian Association To Sell Seidel Prints

The University Christian Association has several original prints by Herbert Seidel for sale.

The prints are of a Biblical theme and can be seen in the UCA office in 209 Chapel. The prices vary from \$3 to \$9 per print.

Seidel, a recognized Biblical artist who lives and works in East Germany, is in serious financial need and will receive the proceeds from the sale.

LION GETS A FACE WASHING: Two Oregon cheerleaders, Nancy Coffen, left, and Bonnie Dean, take advantage of the large piles of snow around Philadelphia Stadium to wash the Lion's face Saturday before the Liberty Bowl game.

Heavy Snows-- Council Plans Course Study

(Continued from page one) Allentown-Scranton area by middle or late afternoon.

Those students who live in eastern sections of the state will probably be able to reach home before the worst strikes, if they leave by early this afternoon.

All students who will be leaving late this afternoon, tonight and tomorrow will be faced with falling snow, blowing and drifting snow and sub-freezing temperatures.

Today's mercury readings will range from 20 degrees along the northern tier of counties to about 30 degrees in the south. Tonight's lows will range between 10 in the north to 20 in the south. Tomorrow's high temperature will range between 15 and 25 degrees.

The local forecast calls for cloudy and cold for today with snow this afternoon. The high reading will be about 26 degrees.

Snow, possibly heavy at times, windy and cold weather is due tonight. The low should be about 18.

The snow should taper off to flurries early tomorrow with a total accumulation of 3 to 5 inches. It will remain windy and cold and the high should be about 23 degrees.

The Chemistry-Physics Student Council decided Wednesday to evaluate several chemistry, physics and chemical engineering courses.

The courses involved include Chemistry 1 and 20, Physics 235 and 400 and Chemical Engineering 30 and 402. Council members will pass out questionnaires in recitation sections for majors only, the week after Christmas vacation.

Council President Steve Brown stressed that the planned evaluation is meant to lead to the compiling of constructive criticism only, which would help professors and administrators to see the student viewpoint regarding course content.

In other business, the council discussed the possibility of giving scholarships and/or loans to chemistry-physics majors. A committee report on this subject will be read at the next meeting.

About 15 billion milk cartons are used annually in the United States.

SYSTEMS ENGINEERING

CAN START HERE... OR HERE... OR HERE... OR HERE... OR HERE... OR HERE

If you are completing studies in engineering, economics, math, science or business, have maintained high averages and are interested in a rewarding professional career leading to management, IBM Systems Engineering may be just the career for you.

What does an IBM Systems Engineer do? He studies problems in industry, science, business and government, and then organizes the most modern electronic data processing techniques and machine systems to solve them. He works at the source and with top executives in the organizations concerned. The problems are fascinating and exciting—and include automation of: process control and manufacturing operations, inventory control document preparation, satellite tracking,

highway planning, weather forecasting, and complete business control systems for utilities, transportation, banking and insurance, to name but a few. New techniques of automatic data processing are making headline news almost daily.

Your present training, combined with one of the most comprehensive training programs conducted by any company, may put you in a position to join this fast-growing new profession with virtually an unlimited future. Openings will exist in all principal U.S. cities. See your Placement Director for additional information about IBM and to arrange for an interview. Or feel free to write or call me:

Mr. S. F. Davis, Branch Manager, IBM Corporation, 206 Main Street, Johnstown, Pa., JO 7-5181

You naturally have a better chance to grow with a growth company
