

# Prof Aids Afghans With Simple Devices

An iceless icebox copied from a 1915 Farmers Bulletin was one of several simple machines introduced to the people of Afghanistan by Dr. Rose Cologne, professor of education on leave from the University. Dr. Cologne also introduced a hand-powered washing machine which was an innovation

for these people. Dr. Cologne is visiting the country as a member of the Columbia team to plan for the development of a College of Home Economics at the one university in Afghanistan.

A handicraft workshop for elementary and secondary students was set up in a rented building. Looms, sewing machines, knitting needles and crochet hooks are being used by the girls in the school to learn handicraft techniques.

One of the projects Dr. Cologne undertook was the introduction of coal and wood stoves. The Afghans, with the help of the Russians, had previously developed a stove. But Dr. Cologne said that anyone who has had some experience with an American coal or wood stove could quickly see at least ten "bugs" in the Russian stove.

Dr. Cologne pointed them out and as a result the Institute Director ordered two wood and coal stoves from Sears and Roebucks to be inspected by Afghan engineers.

Dr. Cologne said that the top people in education realize the pressing need for home economics education. The women who are literate, totalling two per cent, have a so-called classic education but other women need to know the basic facts about food, nutrition, clothing, shelter, child care, sanitation and health.

The original cast of building the Armory in 1888 was only \$20,000.

# G. W. Sullivan, '19 President, Dies in Texas

George W. Sullivan, '19, formerly assistant director of the Department of Public Information and a former State College business man, died Dec. 13 in Corpus Christi, Texas, at the age of 62.

He received his bachelor of science degree in horticulture from the University. While at the University as a student, Sullivan was president of the senior class, editor of The Daily Collegian, a member of Sigma Nu and Alpha Zeta fraternities and a member of Lion's Paw.

He was named an instructor in English in 1919 and served as assistant director of the Department of Public Information from 1920 to 1927.

From 1927 to 1933, Sullivan was manager of the Warner Brothers theaters in State College.

Survivors include his widow, Emalyn and two sons, Robert C. and William A., all of Corpus Christi.

The Cornell University Laboratory of Ornithology has more than 4,000 tape recordings of the calls of more than 600 species of birds.

# Councils OK Constitution For MRC

Officers of the Men's Resident Area Councils approved the constitution for the proposed campus-wide Men's Resident Council at a meeting on Dec. 20.

The constitution will be submitted to the University Senate Committee on Student Affairs at its next meeting, George Henning, temporary MRC chairman, said yesterday.

The proposed legislative body will be composed of officers and representatives of the resident area councils. According to the constitution, it will, "legislate for and unify the men living in the residence halls" and "coordinate the policies of the University administration with the men living in residence halls."

The MRC will include two subordinate bodies—a judicial board and a social board. The judicial board will decide the constitutionality of the MRC procedural rules, excluding individual disciplinary cases, and suggest legislation to the MRC concerning standards of conduct of male residents. The duty of the social board will be to coordinate the social activities of the areas.

The council will contain the executive and judicial chairmen of the areas as well as one representative-at-large in each living area for each 500 male residents.

# Chem Prof Receives AF Research Grant

Dr. Philip S. Skell, professor of chemistry, has received a one-year \$14,639 grant from the Office of Scientific Research of the United States Air Force to support his research in the field of free-radical chemistry.

# Walkers Thank Caroling Students

President and Mrs. Walker today expressed their appreciation to students for the carol singing and other evidences of good-will extended to them during the Christmas season.

President Walker said his chief regret was that a heavy travel schedule took him off campus many evenings during the weeks preceding Christmas, and prevented him from greeting all the groups that visited his home to sing carols.

"My wife and I enjoy these sings very much," he said, "and we appreciate especially the good-will that inspires them."

# English Plant Pathologist To Give Two Lectures

Dr. Eric W. Buxton, mycologist in the department of plant pathology of the Rothamstead Experiment Station in Herts, England, will present two lectures on the mechanism of variability of pathogenic fungi tomorrow.

The lectures are scheduled for 4:15 p.m. and 7:30 p.m. tomorrow in 220 and 112 Buckhout.

# Course Lengthened-

(Continued from page two) ginning in June. About 36 more indicate they may possibly enroll for the term.

Another factor in a possible low summer enrollment involves the teachers doing graduate work who now compose the largest part of the HomeEc student body in the summer. Many of these are women with families who may not want to spend as much as ten weeks away from home.

Until more students indicate a willingness to attend the summer term most HomeEc sequences will have to be run on a three-term basis, although courses will be offered by the college each term, Dr. Houghton said.

# Vacation Safety--

(Continued from page one) installing a television set.

Last year, three students were injured and six others involved in an accident near Lock Haven while on the way home for vacation.

An accident during the Christmas in 1956 took the lives of two University students and in 1957 one student was killed and three others injured during the vacation.
