

## Warming Trend Promises High In Upper 30's

The three M's—melting snow, milder temperatures and mellow sunshine—tell the story of today's weather in this area.

Warmer air that has been creeping northeastward across the interior of the nation during the past few days reached Central Pennsylvania yesterday afternoon and the mercury responded actively.

The high temperature was 36 degrees, some 14 degrees above Wednesday's high.

The upward trend in temperature will probably continue into tomorrow, but events now occurring between 10,000 and 20,000 feet over the Pacific Ocean indicate that colder-than-normal weather will return to this area by late Sunday.

The forecast for today calls for partly cloudy skies and slightly milder temperatures. The high temperature should be near 40 degrees.

Tonight will be partly cloudy and continued rather cold. A minimum of 25 is expected.

Considerable cloudiness is predicted for tomorrow and temperatures will be similar to those of today. A high of 38 is expected.

### Stewart Earns Award

Malcolm Stewart, senior in geology from Plainfield, N.J., has been named recipient of a Mobil Oil Company scholarship.

The award totals \$800. Half of the amount was given to Stewart while the other half was awarded to the geology department.

January GLAMOUR transformed Leslie Ann Schultz of State College from a cute girl to a beauty. See how you can bring out your best features in the current issue of GLAMOUR.

LIBERAL ARTS Student Council Lecture Series, Tuesday, Jan. 10. Speaker will be Dr. Philip Young, professor of Literature. Topic—Story of an American Myth: Pocahontas. HUB assembly room, 7:30. Reception and refreshments 8:30, HUB lounge.

WILL TYPE thesis, term papers; experienced. AD 8-8170.

RUSS HURLEY and the "Song Smiths" featuring music in rustic rhythm for dancing and parties. Clearfield PO 6-3436.

## Fraser to Open As 2-Way Road

Fraser Rd., the one-block street between Sparks and West Halls, is now opened to two-way traffic.

It is hoped the change from one-way to two-way traffic, will develop a more orderly flow of traffic in the area and relieve pressure of traffic on the west side of campus, Albert E. Diem, vice president for business affairs said.

No parking will be permitted on Fraser Rd. and faculty members who have previously parked there have been assigned to other areas. Parking in Area 12, the courtyard next to Thompson Hall, is not affected.

### Views on Finals--

(Continued from page five) the pro-finalists to a 5-1 victory. But, he added, they should be designed as comprehensive tests of a whole course. He also said that exemptions should be "rare."

On the subject of cutting final exams, Roland L. Hicks, associate professor of journalism, reminds our readers:

"Only God and the Dean can give dispensations and I would suggest that you see the Dean first."

The total value of all university buildings and equipment is \$109,000,000.

## Nuclear Director Co-Authors Course

Forrest J. Remick, acting head of the Nuclear Reactor Facility at the University and the Curtiss Wright Nuclear Research Laboratory at Quehanna, is one of the contributing authors in the new advanced Nuclear Engineering Technology Home Study Course being offered by the Capitol Radio Engineering Institute in Washington, D.C.

The institute's educational program is intended to give the technical person a useful working knowledge of advanced nuclear technology. The course is intended for use by technicians and graduate engineers unfamiliar with the technological developments in this new field.

### ROTC--

(Continued from page one) with addition of faculty members in military science who might not measure up to University standards.

Dr. Howard A. Cutler, assistant to the vice president for academic affairs, explained the appointment of these instructors and added that the University has turned down applications presented by the Department of Defense which did not measure up to University standards.

## Pi Lambda Theta Initiates Members

These informal conversation groups around the fire will continue during January and February. Refreshments will be served.

### Liberal Arts Student Council LECTURE SERIES

Speaker: Dr. Philip Young  
 Professor of Literature

Topic: Story of an American Myth: Pocahontas

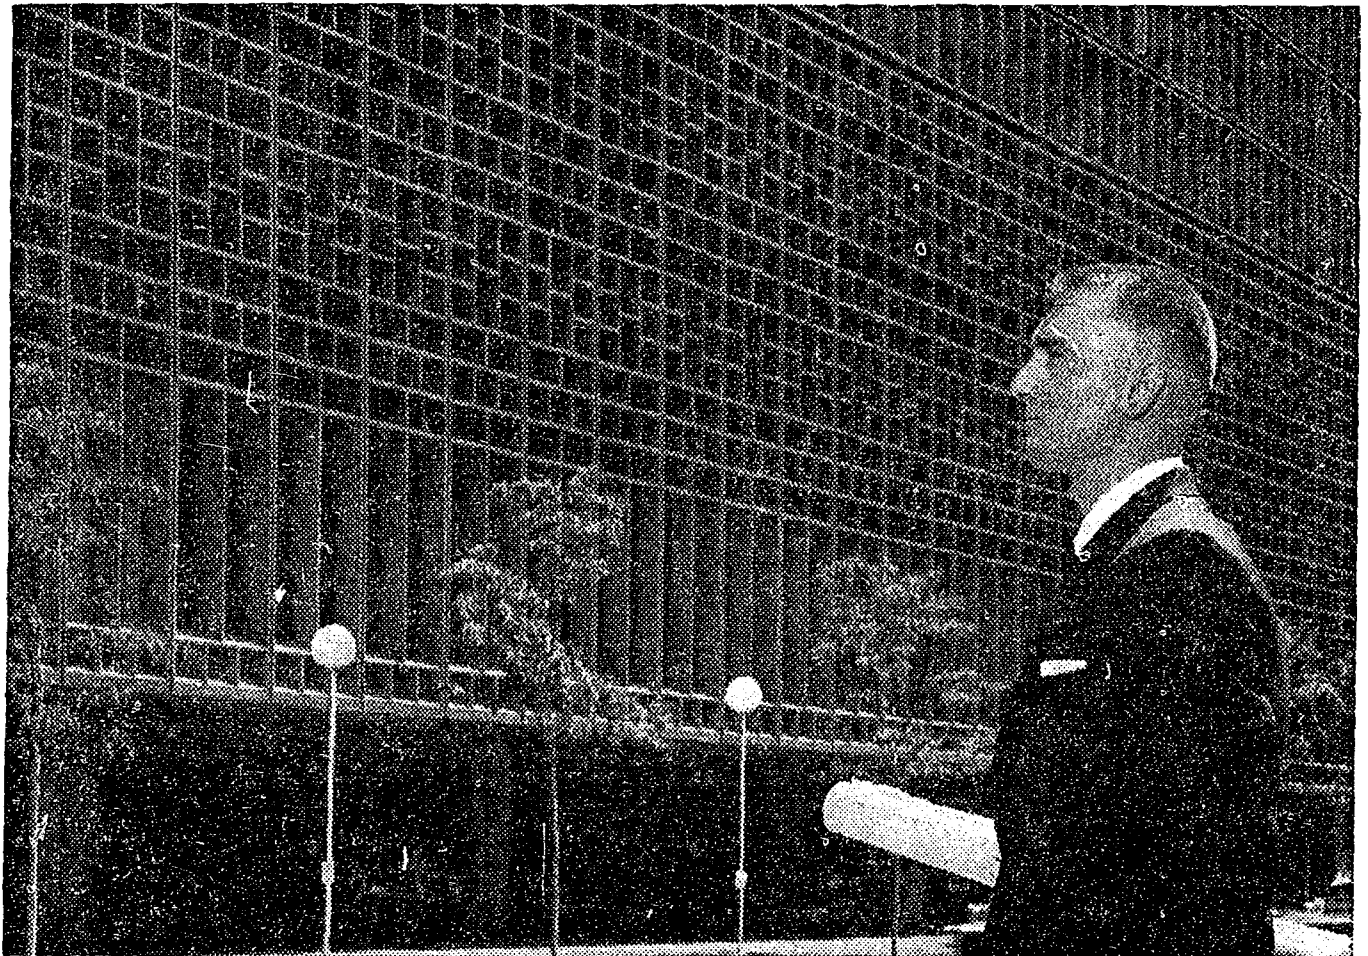

Tuesday, Jan. 10

HUB Assembly Room

7:30

Reception and Refreshments

HUB LOUNGE — 8:30

## "FIND THE ANSWER, JIM—AND BRING IT BACK"

When Jim Boardman took his B.S. in Electrical Engineering at Colorado State, there was one idea uppermost in his mind. He wanted a job in which he could work his way into management via the engineering route. As he puts it, "I didn't want to stick with straight engineering all my life."

After talking to eight other organizations Jim joined The Mountain States Telephone & Telegraph Company. He soon got the kind of action he was looking for.

His first assignment: How best to improve widely scattered rural telephone service all over Colorado—a sticky engineering challenge. He was given a free hand to work out his own procedures. His boss simply said, "Find the answer, Jim—and bring it back."

Six months later, Jim turned in his recommendations. His plan was accepted.

Next stop: Colorado Springs. Here Jim worked out a plan to expand telephone facilities for this burgeoning community. This plan, too, is now in operation.

Today, at 24, Jim has an important role in planning where, how much, and what kind of telephone service is needed in the Denver area.

Here's how Jim puts it: "We get tough assignments—but we also have the freedom to take hold and do a job. I think the future here is unlimited. If a man wants to do it—it's there to be done."

If you're a guy who can "Find the answer—and bring it back"—you'll want to get with a company where you have the chance. Visit your Placement Office for literature and additional information.

"Our number one aim is to have in all management jobs the most vital, intelligent, positive and imaginative men we can possibly find."

FREDERICK R. KAPPEL, President  
 American Telephone & Telegraph Co.
