

Lion Gymnasts Hope to Start On Comeback Trail Saturday

By JOHN MORRIS

A defeat usually doesn't do much good, but coach Gene Wettstone hopes that his Penn State gymnasts are an exceptional case.

Wettstone watched Navy rout his previously unbeaten G-men, 58½-37½, Saturday to boost the Middies into the favorite's role for the EIGL crown.

But now the veteran coach is hoping that this year's team can rebound like last season's squad, which came back to win the NCAA championship after an early season dual meet loss.

Army upset the Lions, 54½-41½ at West Point early last year and went on to win the Eastern crown, but the Nittanies came on strong to cop national honors.

Army invades Rec Hall Saturday and the Lions would like nothing better than to avenge last year's defeat.

"We'll really have to be up against Army," Wettstone said.

The Cadets have a strong group of lettermen back from last year's well-balanced squad, and the Lions will have to give scoring star Greg Weiss more

GERRY SCHAEFER

support if they hope to win. The Lions won their first two meets of the season, but Weiss has been Wettstone's only consistent performer. The stern-faced junior had two firsts and a sec-

ond in a losing cause against Navy.

"This year's team is different from last year's team," Wettstone said. "Last year we had three guys who could lead and inspire the team."

The three — Weiss and the "Golddust Twins," Jay Werner and Lee Cunningham — carried the bulk of the scoring for the Lions.

With Werner and Cunningham gone, the Nittanies lack the all-around strength which made them so tough in previous years.

"This is basically a young team," Wettstone said. "With the exception of the rope climbers we have mostly sophomores and a few juniors."

One of those juniors — ringman Gerry Schaefer — has been a big scorer for State.

Schaefer took first on the flying rings in the Temple and Springfield wins, but Van Temple edged him out, 274-272 at Navy.

Schaefer pulled a muscle in his left leg practicing his fallaway dismount Saturday, but he should be ready for the Army meet.

Ohio State Has Little Trouble 'Getting Up' for Key Games

By FRITZ HOWELL

COLUMBUS, Ohio (AP) — Coach

Fred Taylor needs no needle, emotional or otherwise, in pregame buildups to keep his brilliant Buckeye basketballers on the victory trail.

The Ohio State mentor, surveying the team's 21-game winning streak, the unblemished 16 conquests this year, the 1960 national championship and current unanimous No. 1 ranking, said:

"Frankly, I like it up here. So do the boys.

"When you are on top, you're everybody's target. Every team we play is sky high. We have to be just as high—but we do it naturally, by just accepting the challenge.

"Winning is nothing new to our five starters. All were all-Ohio high school players. There's no friction anywhere.

"In addition to their ability,

our boys have intense pride in their record. They know that one slip can shove them off the top. With that knowledge as an incentive, they need no pep talks."

Jerry Lucas, the all-America junior and Olympic star, is Ohio State's marked man. As a rule five defenders collapse on him every time he's within range of the basket — which opens pathways for some of his friends.

So big Jerry, despite his 25-plus scoring average, spends much of his time passing off or grabbing rebounds. That's the type of team play which has paid off. In most of the contests each of the five starters has scored in double figures—and any of them can break a game open at any time.

RCA, builder of Tiros Satellite, needs young engineers today for spectacular achievements tomorrow

Tiros has broadened man's scope of the heavens and earth. From an orbiting observation post high in the sky, it transmits a new wealth of meteorological information to earth-bound stations below.

Tiros is only one of many RCA successes in the wide, wide world of electronics. And as the horizons of electronics steadily expand, the need for more and more competent and creative engineers increases in direct ratio. That's why RCA, now in the forefront of electronic progress, offers such tremendous opportunities for Electrical Engineers, Mechanical Engineers, and Physicists.

If you already know what you want to do in engineering... and are qualified, RCA can offer you direct assignments in your chosen field, and back you up with training and guidance by experienced engineers.

If you're not quite sure which direction you want to go... RCA's Design and Development Specialized Training will help to point the way. You'll receive full engineering salary while you progress

through engineering assignments that give you a clear picture of various fields you might choose.

Or, if you'd like to continue your graduate study... RCA will pay full cost—tuition, fees and approved text—while you go to school or study two days a week, and work at RCA three days.

These are only a few of the many reasons for getting all the facts about a career with RCA. See your placement officer now about getting together with an RCA representative, for an interview on:
