

Grads Get Letters Explaining 4 Terms

Letters have been sent to all active graduate students outlining alternate credit arrangements during the transition from a semester plan to the four-term system, according to H. K. Schilling, dean of the Graduate School.

No changes are contemplated in degree requirements, financial aids or content of courses, the letter states. However, since the change may affect the programs now planned by some graduate students, the "University feels obligated to provide alternative arrangements wherever feasible and academically sound," it continued. Students who had planned to complete their programs by attending summer sessions only and whose remaining requirements are to be met by course work rather than research are most likely to be affected.

The seven major policies adopted by the Graduate School are:

- Students who need 15 or more credits to complete their program will be expected to adjust to the new calendar and attend regular terms.
- Students who attend the 1961 summer term and still need one to five credits at the end of the summer may complete their work off-campus by means of projects or research courses offered by Continuing Education or transfer credits.
- Students who lack from seven to 10 credits by June, 1961, should plan to complete their requirements during a summer term.
- Special efforts will be made to help students who have met all other degree requirements but still lack six credits or less at the beginning of June. Individualized programs may be arranged for such students.
- Students registering for such individualized programs will be

expected to register in the usual fashion in person on June 13 and 14.

• All students who anticipate difficulty due to the calendar change should consult with their advisers as soon as possible.

• Unless a graduate student asks his major department and advisor for help in program revision by April 1, it will be assumed that he intends to complete his graduate program by attending the regular University terms.

Prof Writes History Article

Dr. Ira V. Brown, professor of American history, is the author of an article, "Pennsylvania and the Rights of the Negro, 1865-1887," published in the January issue of "Pennsylvania History."

Colder Weather Expected Tonight

Cloudy skies which prevailed in Pennsylvania yesterday prevented temperatures from rising above the middle and upper 30's. However, sunny skies to the east and north of the state allowed mercury readings to reach into the middle and upper 40's.

A new mass of arctic air will reach the local area around noon today and temperatures will turn colder this afternoon and tonight. The forecast is for mostly cloudy and windy weather today with a few snow flurries. The high temperature should be about 37 degrees.

Partly cloudy and colder conditions are predicted for tonight and a low of 18 is expected. Tomorrow should be partly cloudy and cold with a high of 32. Sunday should be cloudy and cold with a chance of snow.

SGA Names Steinhauer--

(Continued from page one) at this point by Donald Clagett, vice president and chairman of Assembly, who said that Williams' statements were not pertinent to the discussion.

Joan Cavanaugh (I.-Jr.), chairman of rules committee, asked for a vote of approval after saying that "Mr. Haber has more con-

tacts with Dr. Walker and the trustees and this is the best way to get things done. We put it through once with Simon and it did not go through. Can we vote?"

The appointment was approved unanimously.

The TOP name in Missile Inertial Guidance—AC SPARK PLUG seeks top talent!

AC SPARK PLUG, THE ELECTRONICS DIVISION OF GENERAL MOTORS, has immediate, permanent positions in Milwaukee, Los Angeles, Boston and Flint. If you have a BS, MS or PhD degree in EE, Physics, Math or ME, you may qualify...

You can find a challenge and opportunity for advancement at AC. You will be working on such projects as MACE, THOR, POLARIS, the ultra-sophisticated TITAN system and complex Bombing Navigation Systems.

AC and GM will assist your career progress through graduate study at universities in nearby locations. In addition, you will have the opportunity to take exclusive on-the-job course work on the advanced state of the art.

These training programs are now available in Milwaukee:

ENGINEERING PROGRAM—For men whose career aim is design and development of inertial guidance equipment. All recent college graduates will enter this one year career acceleration training program with formalized classroom instruction. This instruction will be in conjunction with rotating job assignments. These assignments, in Manufacturing, Reliability and Engineering areas, will provide a smooth transition from academic learning to career development.

FIELD SERVICE PROGRAM—formalized two-to four-month classroom and laboratory training on missile inertial systems and bombing navigation systems. After completion of training program, assignments are to both domestic and foreign sites.
