

Student to Compile List for Campaign

Ronald Sheetz, junior in secondary education from Bellefonte, is compiling a list as part of the "Write to Your Representative" campaign.

The list, which will contain the names of the state representatives and senators, their counties or districts and their

Fraternities Reinstated By Council

Lambda Chi Alpha, Theta Delta Chi and Sigma Nu were re-instated yesterday by the Interfraternity Council, Ben Bronstein, secretary-treasurer of IFC, said.

These three fraternities were suspended from IFC activities at the Monday meeting of the IFC. The groups had failed to pay bills owed to the council.

According to IFC regulations, a fraternity is eligible for suspension if it has failed to pay bills owed to the IFC for more than two months. After payment the fraternities were automatically re-instated.

The official fraternity pledging date quoted in yesterday's Collegian as 12:01 a.m., Feb. 25 should have read 12:01 a.m. Feb. 26.

Nominations for IFC offices will start at the Feb. 27 meeting and close at the March 13 meeting with self-nominations from the floor. Nominees for the offices of president, vice president and secretary-treasurer will be named.

All nominees should be past or present presidents of their fraternities or a member of one of the IFC standing committees, Ronald Novak, IFC president, said.

Excavations have shown that Stone Age people lived in Russell Cave near Bridgeport, Ala., for more than 9,000 years.

Student Council Will Sponsor Coffee Hours

The Education Student Council last night announced that it will sponsor its first evening Coffee Hour in March with Dr. Clarence Berguson, professor in visual arts, scheduled to speak on the "School System in the Soviet Union."

In other business, the council chose several committee chairmen. Among these were Coffee Hours, Barbara Maley, junior from Verona, N.J., and Ann Farnsworth, freshman from DeWitt, N.Y.; Daily Collegians to Student Teachers, Barbara Reese, junior from Philadelphia; Reorganization of Council for Four Term Plan, Jacqueline Wenk, sophomore from Sayville, N.Y.; and Monitor Editor, Susan Houston, junior from Harrisburg.

The council also recommended check lists for advisors to aid them in determining what credits upperclassmen must have.

The Agriculture Student Council decided last night to hold an open house for high school students April 7 and 8 in cooperation with the councils of Mineral Industries and Chemistry and Physics.

Lattman Discusses Scientific Progress

By SUE TAYLOR

Geniuses are the men who are remembered throughout time, Dr. Lawrence Lattman, associate professor of geomorphology, said at the liberal arts lecture last night.

"As we look back in history, we see that the contributions that have meant something were made by geniuses," Lattman said in the third of the lecture series.

"An excellent way to study science is to attach it to human beings," he said.

"The start of science was in Greece, where there was a great variety of men," he said.

Such men as Euclid, Pythagoreas and Aristotle gave their contributions to the world.

"Science vanished during the Dark Ages," Lattman said, "but during the Renaissance it came alive again."

It was at this time that Francis Bacon, one of our greatest scientists, appeared, Lattman said.

"Bacon formalized the scientific method—the keystone upon which science is built," he continued.

"This method entails first gathering information, then forming the hypothesis, deducing several conclusions, and then testing these predicted conclusions," Lattman said.

"In England, Isaac Newton, in a period called 'the 18 golden months of science, laid the foundation for the classical concept of mechanics," he said.

When Newton's theories had been proved correct, men began applying his fundamental laws to everything, according to Lattman.

"Today, however, most people accept the probabilistic concept that laws work most of the time, but we can't expect them to work all of the time," he said.

"Albert Einstein disagreed with this concept, saying, 'I can't believe that God plays dice with the universe.'" "There is a strong possibility that Einstein is right," Lattman said, "since repeatedly throughout science the minority has been right."

"But today we are in a state of flux. The only thing we really know is that we've got a lot to learn," he concluded.

Cincinnati originally was called Losantville or "the town opposite the mouth of the Licking River."

Harrisburg addresses is part of an effort to get a full appropriation from the state for the University so that student tuition will not be raised next fall. It will appear in The Daily Collegian when completed.

Sheetz said a flood of letters from students could not be ignored by representatives.

"The boys down there would know something is up," he said. Sheetz, who also wrote a "Letter to the Editor" which appeared in Friday's Collegian, is scheduled to appear before the SGA Assembly Thursday night to present an outline of his campaign.

If the Assembly supports the plan, Sheetz said he will start the campaign next Monday and continue it for one week.

Sheetz said he hopes to be able to have banners placed on the mall and posters on campus bulletin boards, and to have announcements in political science classes urging students to write letters.

Interested students may be visiting residence halls to acquaint students with the campaign and copies of the list will be distributed to residence halls and fraternities, Sheetz said.

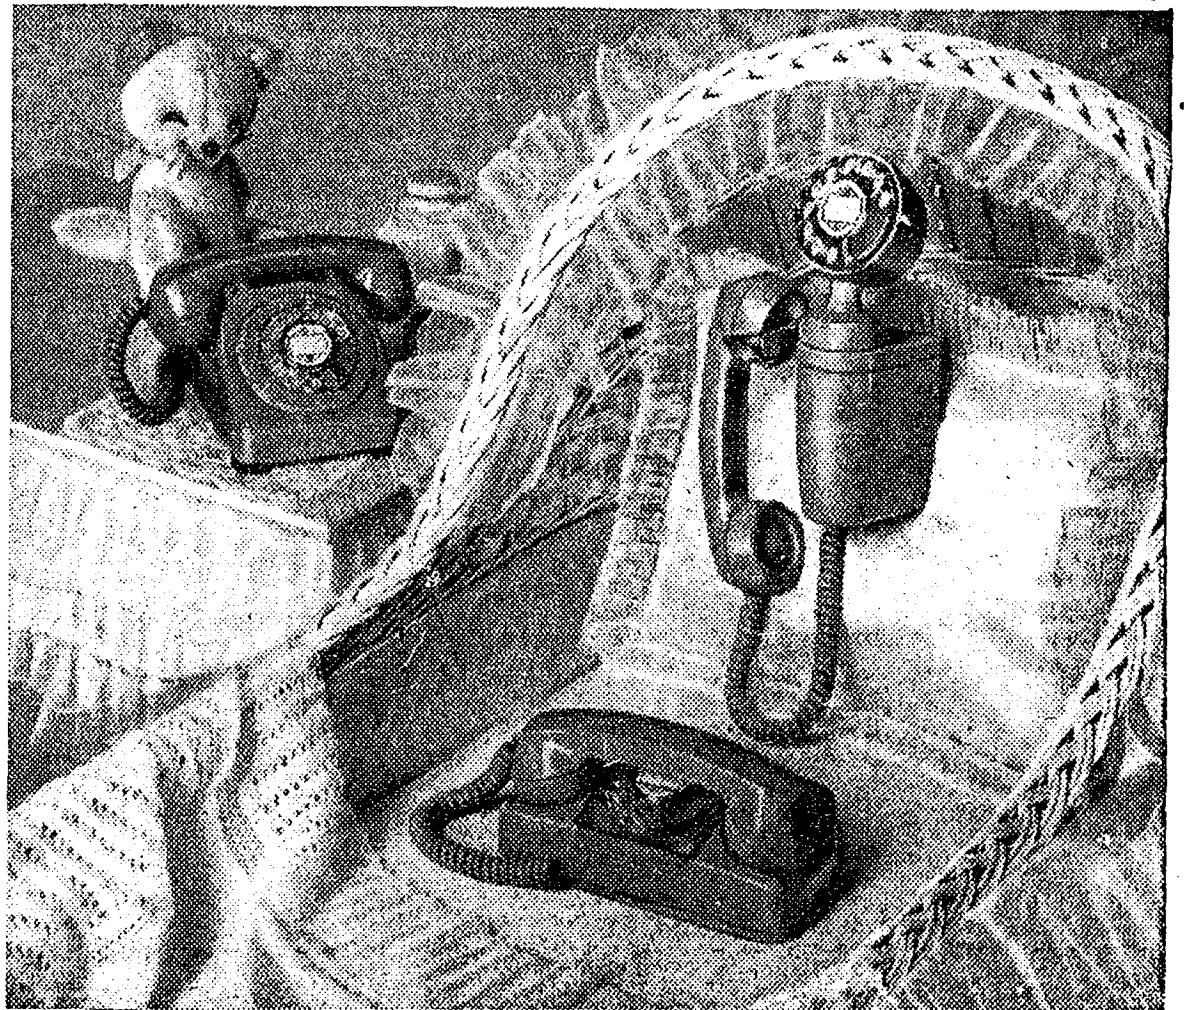

Sheetz said he talked to Sen. Jo Hays (D-Centre) about the plan and to Dr. Robert G. Bernreuter, vice president for academic affairs, who termed it a "good idea."

"They (the representatives) will see that the student body is not sitting back and saying 'we'll get what you give us,'" Sheetz said.

Jobs in Camps, Resorts Available for Students

Students interested in jobs in private and service camps for this summer should consult the Office of Student Aid, 218 Willard.

Over 100 camps and 25 resorts have openings in arts and crafts, athletics, food service, riding and other areas.

New additions to the family!

The two new telephones in the bassinet are the result of a perfect marriage of research and design. They illustrate the way Gen Tel constantly strives to make the telephone an ever more convenient and helpful service of modern life.

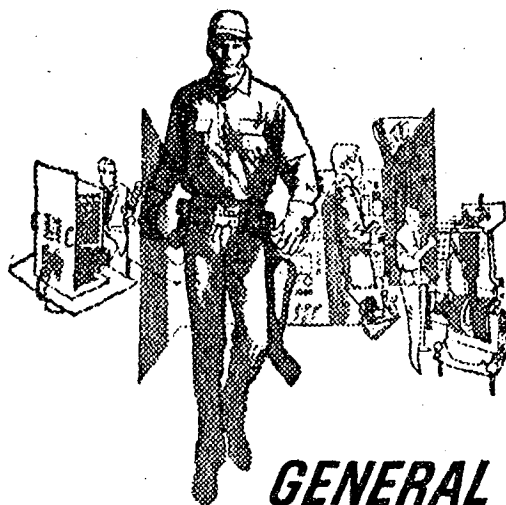

The Starlite* phone in the foreground is a new "compact"—only half the size of a standard desk phone. Its PANELESCENT® (electroluminescent) dial glows in the dark for easy dialing, and can be turned up to serve as a night light.

The Space-Maker* phone can be hung anywhere—on posts and in tight corners. Both dial and handset can be adjusted to fit the space and the convenience of the user.

These new and modern phones for the home were developed by our subsidiary, Automatic Electric, largest supplier of telephone equipment to America's Independent telephone industry.

They are but two examples of how General Telephone & Electronics works to improve equipment and advance communications for the home, for industry and national defense—both here and abroad.
