

University Party Again Leads in Membership

University party once again led in the number of students registering at final political party registration Sunday night. A total of 1067 registered as members.

Campus party registration totaled 111 and Liberal party, 46.

Commenting on the large number of students registering,

Soph Board To Give Gift To Asians

The Sophomore Class Advisory Board announced plans recently to give a belated Easter gift to Asian children.

Near the end of April, a Sophomore Project Day is planned. Elizabeth Pan, co-chairman of the project, has said the day will consist of gathering, packing and sending books to the Asia Foundation which has accepted books from 18 eastern countries, and which has supplied over 1000 school rooms with these books.

A dual purpose will be served by this project, Miss Pan said. These are to unite the sophomore class and to promote American prestige abroad.

All sophomores will be asked to take part in collecting any type of text or literary book published after 1945.

In other business, membership in the National Student Association was discussed. Janis Somerville, chairman of the investigation committee, said, "A letter is being sent to all schools of comparable size in the region, which belong to the NSA, in order to determine the benefits which Penn State would receive by becoming a member." Miss Somerville also said that "so far it seems that small liberal arts colleges do benefit by belonging, but that it is hard to tell right now whether or not it would be a worthwhile organization for a large school like Penn State to join."

The board is combining with Delphi Hat Society to sponsor the program for the orientation of foreign students. David Walker, chairman of the committee, said that tremendous response has been received so far and that it looks as if the entire program will be a success.

Home Ec Promotions

Two promotions for faculty members in the College of Home Economics have been announced.

Dr. Daniel F. Hobbs, Jr., instructor in family relationships, has been named assistant professor of family relationships, effective Sept. 1, while Dr. Helen E. Buchanan, also instructor in family relationships, has been named assistant professor of family relationships, effective Feb. 1.

Michael Dzvonik, chairman of University party, said that "student apathy towards student government isn't all it's trumped up to be."

Campus party elected Dennis Eisman as clique chairman of the party and William Laman as vice clique chairman.

Other Campus party officers elected Sunday are: corresponding secretary, Sandra Tait; recording secretary, Barbara Krauth; treasurer, Ralph Friedman; senior class clique chairman, Thomas Loman; junior class clique chairman, Harriet Emdur, and sophomore class clique chairman, Susan Ondenheimer. All officers ran unopposed.

Liberal party members will probably elect a chairman to replace Earl Gershenow, who resigned last week, before elections, according to Dale Harris, acting chairman of the party.

Concerning the proposed SGA reorganization, the Liberal party steering committee advocated three changes: that nominations for SGA officers and Assemblymen be held by parties as in the past; that it be made possible to recall SGA officers by popular vote; and that the supreme court justice have a seat on the University cabinet.

Campus party adopted as a plank of its platform that all Campus party candidates who are elected will pledge to conduct a referendum of student opinion on whether or not they have fulfilled their responsibilities as student representatives.

Final nominations for All-University offices will be held April 9. Students must have registered at either the primary or final registration to vote in party nominations.

Arch Show to Be Held

Senior students in landscape architecture unveiled their plan for redevelopment of the central campus Sunday in the main lounge of the Hetzel Union.

Partly Cloudy Skies Seen for Departure

Partly cloudy, windy and mild weather should prevail throughout Pennsylvania today as thousands of University students leave campus for the Easter vacation.

All roads in Centre County are in good condition according to State Police.

Whether bound for home or Ft. Lauderdale, students are likely to encounter pleasant travelling conditions. A few light showers are expected in the eastern half of the state this morning, but strong winds should be the only unpleasant wather phenomenon in the Commonwealth this afternoon.

Somewhat cooler temperatures are forecast for tonight and tomorrow, but travelling conditions, both by plane and auto, should remain excellent. Skies across the Commonwealth today should range from mostly cloudy in the northwest to partly cloudy in most other areas. Mostly cloudy skies in eastern counties early today will be replaced by rapid clearing during late morning. Temperatures should range between 55 degrees in the extreme north to near 70 in the Philadelphia area. A high of 64 is expected in this area.

Tonight should be partly cloudy and cooler with low readings ranging from 30 in the northwestern part of the state to 45 in the southeast. A minimum of 38 is predicted for State College.

Some cloudiness is expected throughout the state tomorrow with a trend toward thickening clouds in southwestern counties during the day. Tomorrow's high temperatures will range from the middle 40's in northern counties to the middle 50's in the southeast.

News and Views

News and Views, a publication of the College of Home Economics, will go on sale at the Hetzel Union desk and the home economics living center on April 5.

Seminar to Hear Gunn

John B. Gunn, a staff member of the IBM Research Center at Poughkeepsie, N.Y., will address the Electrical Engineering Seminar to be held at 4:15 p.m. today in 207 Electrical Engineering.

His subject will be: "A New Type of Parametric Effect."

What's it take to make the right connection?

Plenty! Consider the problem. Western Electric manufactures the switching systems which connect some 60-million Bell telephones throughout the U. S. The average call over today's electromechanical system requires 420 relay operations. All together, this interconnecting equipment makes up the heart of what is, in effect, the world's largest machine.

That's where Western Electric and you come in. The switching equipment for this "machine" involves an enormous manufacturing job carried on by our plants throughout the country. Because of the size and service requirements involved, we require quality standards far exceeding those of ordinary manufacturing. The size of this job presents an unusual challenge to the engineer who may save the Bell System many thousands of dollars by even a small cost-reduction step.

While today's switching calls for a priority on engineering, tomorrow's will be even more exciting. For even now the revolutionary Electronic Central Office is under field trial and promises to remake the world of telephony. Future Western Electric engineers, working closely with their counterparts at Bell Tele-

phone Laboratories, will concentrate heavily on developing manufacturing methods for this ECO equipment.

Your Western Electric assignments may cover many of our other responsibilities as the world's leading communications manufacturer. Perhaps you'll work on advances in microwave transmission, or even on satellite communications.

Joining Western Electric may well be your right connection.

Opportunities exist for electrical, mechanical, industrial, civil and chemical engineers, as well as physical science, liberal arts, and business majors. For more information, get your copy of "Western Electric and Your Career" from your Placement Officer. Or write College Relations, Room 6106, Western Electric Company, 195 Broadway, New York 7, N. Y. And be sure to arrange for a Western Electric interview when the Bell System recruiting team visits your campus.

Principal manufacturing locations at Chicago, Ill.; Kearny, N. J.; Baltimore, Md.; Indianapolis, Ind.; Allentown and Laureldale, Pa.; Winston-Salem, N. C.; Buffalo, N. Y.; North Andover, Mass.; Omaha, Neb.; Kansas City, Mo.; Columbus, Ohio; Oklahoma City, Okla.; Engineering Research Center, Princeton, N. J. Teletype Corporation, Skokie, Ill., and Little Rock, Ark. Also Western Electric distribution centers in 33 cities and installation headquarters in 16 cities. General headquarters: 195 Broadway, New York 7, N. Y.
