

Ballet Group Thrills Rec Hall Audience

By ANN PALMER

The opening curtain of the National Ballet of Canada's performance on Sunday night caused "oohs" and "aahs" to come from the audience which nearly filled Recreation Hall.

The stage was set in the manner of a small Galician village complete with wooden balconies and provincial painting decorating all parts of the set. The dancers performed in the midst of these life-like structures which represented the open square of the village.

The ballet itself was a display of color, light liveliness and fantasy, featuring the skilled dancing of the company soloists, Sylvia Mason and Grant Strate.

There was some disappointment among the audience when the program revealed that prima ballerina Lois Smith and premier danseur David Adams were not going to dance.

However, they did attend the performance and were thrilled by the warm response it received. Miss Smith later explained that she and Adams had danced in Baltimore the previous night and

that it was the custom for the solo parts to rotate with two other couples.

Miss Smith was very excited about the audience's acceptance of the ballet. "They are just wonderful," she said, "And I'm having lots of fun myself!"

The company is in its first week of a six-week tour around the Southern United States.

"We have just enough people to travel in two busses, but it gets terribly tiring traveling all over the country for such long distances," she commented.

Miss Smith and Adams have been with the Canadian National Ballet since its beginning in 1951. The company is currently celebrating its tenth anniversary with the present tour.

Fraternities To Sponsor Workshops

The Interfraternity Council will hold workshops from 8 to 8:30 tonight for fraternity officers, according to Gene Chaiken, IFC Workshop Chairman.

Chaiken said the purpose of the workshops is to provide leadership training and to discuss adaptation of the fraternity system to the University's four-term plan effective this summer.

Officers of participating fraternities will meet at the following houses: presidents, Tau Kappa Epsilon; treasurers, Delta Chi; caterers, Beta Sigma Rho; house managers, Sigma Alpha Epsilon; pledge masters, Phi Epsilon Pi; rush chairmen, Phi Sigma Delta.

Social chairmen, Zeta Beta Tau; scholarship chairmen, Phi Gamma Delta; public and alumni relations chairmen, Acacia; pledge presidents, Delta Tau Delta; and chaplains, Delta Phi.

A banquet for all fraternity presidents and advisors, officers of the council and representatives of the dean of men and dean of women's staff will be held at 6 p.m. tomorrow at the Nittany Lion Inn.

1960 Encampment To Hold Reunion

The 1960 student encampment, Gandel said. Groups will meet with their original workshop on Thursday in dining rooms B and C of the Hetzel Union building. They will discuss the results of last encampment and discuss what happened to their suggestions.

Those who attended the encampment last summer are invited to attend, chairman Robert after the meeting. Refreshments will be served after the meeting.

PIFFER'S: Your one-stop music center on Benner Pike. Guitars, banjos, complete music line accessories. Open daily from 9-8 except Wednesday. Piffer Music Center. Phone EL 8-3441.

Is your future up in the air?

As communications needs of our nation become steadily greater and more complex, the Bell Telephone System is continuing its pioneer work in microwave by "taking to the air" more and more to get the word across.

To this end, Western Electric—the manufacturing arm of the Bell System—has the monumental task of producing a large part of the microwave transmission equipment that knits our country together by shrinking thousands of miles into mere seconds.

In spite of its great technological strides, the science of radio relay is a rapidly-changing one. And new break-throughs and advances are common occurrences. A case in point: our Bell System "TH" Microwave Radio Relay. This newest development in long-distance telephone transmission will eventually triple the present message-carrying capacity of existing long-haul radio relay installations. A full-scale system of 6 working and 2 protection channels—can handle 11,000 telephone messages at the same time.

To make microwave work takes a host of special equipment and components: relay towers, antennae, waveguides, traveling wave-tubes, transistors, etc. But just as important,

it takes top-caliber people to help us broaden our horizons into such exciting new areas as communication by satellites!

And microwave is only part of Western Electric's opportunity story. We have—right now—hundreds of challenging and rewarding positions in virtually all areas of telephony, as well as in development and building of defense communications and missile guidance systems for the Government.

So, if your future is "up in the air," you owe it to your career to see "what's up" for you at Western Electric.

Opportunities exist for electrical, mechanical, industrial, civil and chemical engineers, as well as physical science, liberal arts, and business majors. For more information, get your copy of "Western Electric and Your Career" from your Placement Officer. Or write College Relations, Room 6106, Western Electric Company, 195 Broadway, New York 7, N. Y. And be sure to arrange for a Western Electric interview when the Bell System recruiting team visits your campus.

Principal manufacturing locations at Chicago, Ill.; Kearny, N. J.; Baltimore, Md.; Indianapolis, Ind.; Allentown and Laureldale, Pa.; Winston-Salem, N. C.; Buffalo, N. Y.; North Andover, Mass.; Omaha, Neb.; Kansas City, Mo.; Columbus, Ohio; Oklahoma City, Okla.; Engineering Research Center, Princeton, N. J. Teletype Corporation, Skokie, Ill., and Little Rock, Ark. Also Western Electric distribution centers in 33 cities and installation headquarters in 16 cities. General headquarters: 195 Broadway, New York 7, N. Y.
