

Disciplinary Action

Sub-Committee Acts Against 24 Students

The Senate Sub-Committee on Individual Discipline has taken action against 24 students during the last week, according to a report issued by the Dean of Men's Office.

Four students were suspended from the University until 1962, one received a suspended suspension and two students were placed on disciplinary probation for stealing.

Students Cleared By Deans' Offices In Cliff Accident

No disciplinary action will be brought against the 11 students accompanying a sophomore coed who fell from a 100-foot cliff on a private picnic last Friday night, according to the offices of the dean of men and dean of women.

Marilyn Weiss, sophomore in art education from Boiling Springs, attending a picnic with 11 other students, slipped from the edge of a cliff near Fishermen's Paradise, south of Bellefonte.

Leroy S. Austin, associate dean of men, said the accident was investigated by his office and the mishap was not caused by an irresponsible act on anyone's part.

"It was merely an unfortunate accident and we do not plan on taking any disciplinary action," Dorothy J. Lipp, dean of women, said.

All the men attending the picnic were members of Beta Theta Pi fraternity, Paul Kemmerer, president of the fraternity, said. He added that the picnic was not fraternity sponsored.

The IFC Board of Control is investigating the accident but has not yet reached a decision, Gary Robinson, chairman of the board, said.

Miss Weiss is reported in "satisfactory condition," by Centre County Hospital officials.

AWS Forms Available For Summer Program

Applications for the Association of Women Students summer program are available at the Hetzel Union desk, according to Ruth Rilling, AWS president-elect.

Applications must be returned to the HUB desk today. Interviews are scheduled for Monday and Tuesday, Miss Rilling said.

The summer program will be staffed by a steering committee of 6 or 8, and several committees and sub-committees, she said.

Prof Gets Fulbright Grant

Dr. Vernon W. Myers, associate professor of physics, has been awarded a Fulbright grant to lecture at the University of the Philippines in Manila, during the 1961-62 academic year. He has been given a leave by the University.

Program Will Assist Teachers

The French Institute will conduct a 36-week training program at the University to acquaint French teachers with new methods of language instruction, according to Dr. Simon Belasco, Director of the Institute.

The Institute will be held from Sept. 20, 1961, to May 30, 1962.

Belasco said that 23 teachers, chosen from public and private secondary schools throughout the nation, will participate in the program.

The purpose of the training program, he said, is to acquaint these people, already proficient in French, with new methods of teaching the language so they can improve their teaching techniques and increase their own knowledge of French.

The University is the site of one of the two academic French Institutes in the United States that offer such training programs, he added.

In the past participants in the program have been recommended to teach at summer French Institutes at American universities.

In discussing the new teaching methods, Belasco said students can learn the language with greater speed through the use of certain mechanical devices such as tape machines, which supplement class work.

This audio-lingual approach will lessen the time it normally would take to learn a language through the traditional way with books and drill, he added.

Two students were placed on suspended suspension until the end of the fall term for visiting a private apartment occupied by women students and for drinking illegally, the report said.

Charged with drinking on University property, nine students were placed on disciplinary probation until the end of the fall term.

The sub-committee put two students on suspended suspension for breaking rules in the residence halls and showing disrespect for their residence hall counselors.

For the same offense, four others were given disciplinary probation. One probation will extend until the end of this term, two until June 1962 and the other until the end of the winter term 1962.

Monroe E. Newman, chairman of the sub-committee, said "the University is going to continue to view seriously all violations of local, state and federal laws and of University regulations." He also said that "we are not treating these violators any more severely but all along we have considered these offenses a serious matter."

Heinz Warneke is the sculptor of Penn State's famous Nittany Lion Statue.

Registration by IBM Possible in Future

By JO ANNE MARK

Students are now being taught by IBM machines, they are rushing sororities by IBM machines and if University officials have their way, soon they will be registering by IBM machines.

Martin L. Zeigler, director of student affairs research, said yesterday that a completely electronic registration is in sight.

The Department of Student Affairs Research and the Data Processing Service have developed a "data flow system" which will eventually eliminate a great portion of statistical cards at registration, Zeigler said.

Student affairs research, Zeigler said, plans to gather all pertinent information about a student prior to his freshman year. He said that this will eliminate asking the same questions semester after semester.

"However, arrangements will be made for changes," he said.

At present, students are required to fill out cards with information such as religious preference, marital status, parents, home address and fraternity affiliation at each registration.

This information will be compiled and will be available throughout a student's years at

the University. It will eventually be deposited in the alumni records, he said.

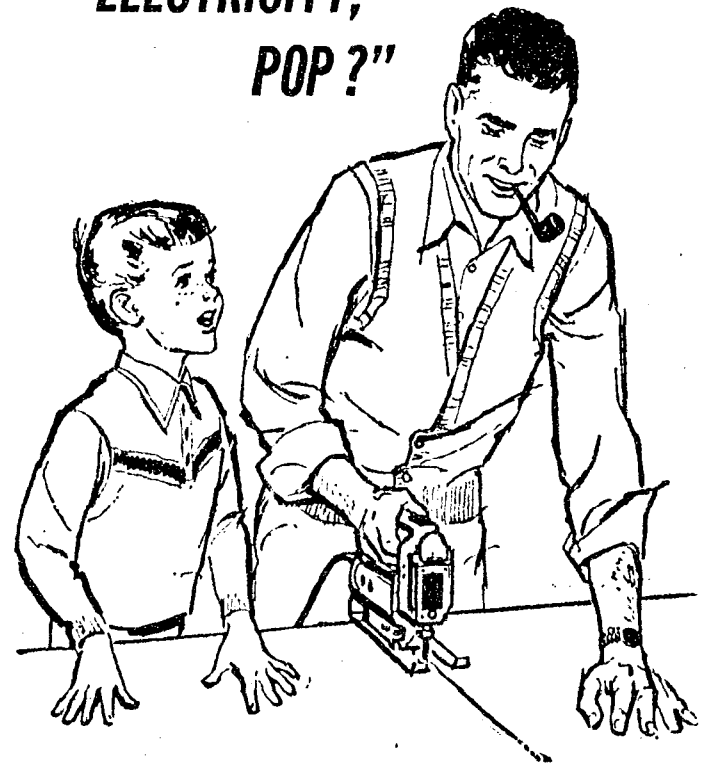

Zeigler also said that the department plans to conduct a student opinion survey.

"It will be a study of student attitudes toward higher education, the University, the faculty and administration and life in general," he said.

"We would also like to embark upon a study to see how these attitudes change from the freshman to senior year," he added.

"WHAT IS ELECTRICITY, POP?"

It's heat, son, that cooks our food. Light that brightens our homes. Power that runs these power tools.

But the wonderful thing is that we don't have to know just what it is to take advantage of it. We don't even have to go and get it, like food and clothes—it comes to us!

By the time you're grown up, there will be lots of new wonderful things it will be doing for us. And you know something, son? The more of it we use, the less the average price per kilowatt-hour!
