

'62 Class Gift Totals \$4,200

Donations for the 1962 Class Gift Fund now total \$4,202.81, Robert F. Beam, director of the alumni fund, said yesterday.

This total, together with \$119 in pledges and possible contributions throughout the academic year, will be spent on the 1962 Class Gift.

Funds For Construction Approved

Sixteen construction projects with a total price tag of over \$16 million were authorized for the University Saturday when Governor David L. Lawrence signed a bill boosting the borrowing limit of the General State Authority.

The GSA constructs all buildings on campus with the exception of residence halls.

The bill was passed by the legislature earlier this month.

Eleven of the projects are either construction of new buildings or additions or alterations to existing buildings. The other five projects concern plans for future facilities.

New buildings authorized are a life sciences building, costing over \$2 million, a service and general stores building, to be built on the periphery of campus, probably near Beaver Stadium, at a cost of slightly above \$2 million, and the second unit of the Educational and Psychology Center on the former Beaver Field, costing over \$1 million.

In addition an extension conference center to replace the present temporary facilities behind the health center will be built at a cost of nearly \$2.5 million.

A \$700,000 computer facilities center will be built to house the University's business machines.

Armsby, Patterson, Weaver, McAllister, Home Economics and the Service Building will be altered.

Also, money has been authorized for the planning and design for the completion of Willard and Pattee Library and for the construction of a forestry center and a physical sciences building.

The planning and design of the final unit of Rec Hall was okayed and the construction of an extension to the main unit was authorized.

New sheep and beef cattle barns will be built at a cost of over \$1 million.

The Class of '62, Beam said, is the first class to purchase its gift solely with its own funds since the Class Gift Program was initiated in 1959.

The Class Gift Program, which is directed by a committee, headed by the president of the senior class and made up of the presidents of the junior, sophomore and freshman classes, was begun with the fall registration in 1959. The Class of 1960, under president, Theodore Haller, initiated the program.

Beam said that because the classes of 1959, 1960 and 1961 did not, under the new program, have an adequate time to collect enough money for a class gift, the president agreed to supplement the donations of these classes with University funds.

The class of 1959 received, from the University, three dollars for every one donated; the class of 1960, two dollars, and the class of 1961, one dollar.

It is expected, Beam said, that the class of 1963 will have approximately \$8,000 in the gift fund at its graduation. The 1963 fund now totals \$6,488.35.

The 1964 fund, which now totals \$5,376, should reach \$9,000 before the class graduates and the 1965 fund, which now totals \$3,036, should total \$10,000.

After 1965, each class gift fund should reach \$10,000, he said.

Beam said that it is the wish of the class presidents that the class gift projects be well along in progress by the time each class graduates. It is for this reason, he said, that the Class of 1962 will probably vote on a project at the winter term registration.

AWS Extends Deadline Date

The application deadline for positions on the Association of Women Students Community Councils has been extended by the AWS Senate until Friday.

Judith Allen, elections commission chairman said this action was necessary because not enough women students were aware that applications were available.

AWS voting will be held in the dining hall areas on Oct. 5. All women students may vote by presenting their meal tickets and matriculation cards.

Polls will be open from 11 a.m. to 1:30 p.m. and from 4:45 to 7 p.m.

First Department Completes Program of Self-Evaluation

The first phase of a massive self-evaluation program appraising University departments has been completed, Dr. M. Nelson McGeary, program head, said yesterday.

McGeary said evaluation of the Department of Petroleum and Natural Gas Engineering was completed last Wednesday. An oral report of the analysis will now be presented to President Eric A. Walker and later a written report will be submitted. All reports will be confidential, McGeary said.

Scrutinizing the department were a group of specialists in the field of petroleum and gas engineering, headed by H. G. Botset of the University of Pittsburgh. Each of the University's 65 departments will be inspected by experts in the specified fields, McGeary said, and reports on each of them will be presented to the President.

The program is expected to be completed in 1965, and is in preparation for the Middle States Association evaluation in 1966, McGeary said. The University is approved by the association for accredited courses in individual colleges.

"The President should be com-

mended for encouraging the University to go ahead on its own," McGeary said. "Through this evaluation we will be able to determine how our individual departments rate with the very best in the country."

Experts visiting the departments will be asked to make suggestions for improvement and to cite good points of existing practices, he said.

One or two evaluations will be scheduled monthly. The next evaluations will be done by the Department of Geography, sociology in the Department of Sociology and Anthropology, and rural sociology in the Department of Agricultural Economics and Rural Sociology. Scheduled dates for the analysis are Oct. 16-18.

McGeary said that the program's plans call for all the evaluations to be made in three days, with three or four experts doing the evaluation.

Scheduled for appraisal in November is the Department of Chemical Engineering. McGeary said that no other departments have been scheduled as yet for the months following November, but that a complete schedule is expected to be drawn up in the near future.

Enrollment--

(Continued from page one) spring semester basis, a 1,000 person decrease in the number of registrants was usually expected, he said.

The decrease was due to the number of students graduating at the end of the fall semester, Bernreuter said, and not enough freshmen entering the University for the spring semester to neutralize the decrease.

Bernreuter said University officials are expecting the same sort of decrease to occur for the winter term because of the number of students graduating after the fall term and fewer freshmen enrolling for the winter term.

The fact that many students attended the summer term this year will mean that they will be eligible to graduate in March, he said.

'Investing in Stocks'

A new class will be registered this Wednesday & Thurs. evenings, Sept. 27-28, 7-9 at the junior high school auditorium. Classes will meet Wed. evenings, 7:30 to 9: for 8 weeks beginning Oct. 4. Fee: \$5.00 for State College Area residents; \$6.00 for others. Materials are supplied. No examinations. Instructor: Richard O. Byers. (Course outline by weeks)

TYPES OF SECURITIES — RISKS AND REWARDS

Listed vs. Unlisted (over-the-counter) securities. Bonds—Government, Municipal, Corporate. Classes of stock. Effect of splits, rights, warrants.

HOW TO FOLLOW THE MARKET

Charting stock action by line and point and figure. The Dow Jones and other averages. Other technical factors which tell you what is really going on.

SOURCES OF INFORMATION

Where to find the facts about the Economy, Industry, and Companies. How to read the financial page. Evaluation of Investment services and opinion columns.

HOW TO READ AND INTERPRET FINANCIAL REPORTS

Income statements and balance sheets. Nature of capitalization. Price-Earnings ratio, book value, cash flow, leverage.

METHODS OF INVESTING

Mutual Funds and closed-end trusts. The monthly Investment Plan. Investment Clubs. How to handle your own investments.

THE STOCK EXCHANGES AND YOUR BROKER

How the stock exchanges work. How orders are executed. Role of odd lot dealers and specialists. How to read the ticker tape. Broker services and commissions. How over-the-counter securities are bought and sold.

SETTING YOUR INVESTMENT OBJECTIVE

Investing in relation to savings, insurance, and retirement plans. Income vs. capital appreciation. Effects of inflation and deflation. Psychological factors.

SOME OF THE FINER POINTS

How to speculate. Protecting profits and cutting losses. Stop orders. Buying on margin. Selling short. Capital gains and other tax considerations. Some "do's and don't's."
