

Director of Broadcasting Views Closed TV Circuit

By MAXINE FINE

The observation of closed circuit television in operation was the object of a visit to the University by George Carlton Sampson, Director of School Broadcasting in Administrative Education in Trinidad.

Sampson is visiting the United States on a Leaders and Specialists Scholarship offered

by the State Department.

In commenting on closed circuit television the visitor said, "This to me is an ingenious device which increases efficiency with apparent economy of effort, economy of time and economy of faculty manpower."

"The producers and directors and studio staff evince a very efficient coordination with the performing professor and a very nicely arranged and balanced sequence of audio and visual material, not excluding the personality of the professor," he said.

Secondly, he noted interest in the teacher-training and general education methods as practiced in this country.

"These interests and pursuits, Sampson continued, "take me to several cities and towns, universities and schools throughout the length and width of your magnificent country."

In referring to the students he has seen on campus, Sampson said, "I have seen them at play, I have seen them in discussion groups and in their classrooms. The whole composite picture gives the impression that the future of America, judging from the students here, may be very well assured and favorably secure, at least as far as self-discipline, intellectual pursuits and harmonious personal relationships are indicated."

Sampson said he felt he will certainly be aided in his work by his observations at the University.

Parmi Nous Will Meet

Parmi Nous, senior men's hat society, will meet at 10 p.m. today at Theta Delta Chi fraternity.

Temperature Falls Abruptly

Cool air overspread Pennsylvania early yesterday bringing an abrupt change in temperature.

Unseasonably warm weather had prevailed in this area since late last week. Mercury readings reached the upper 80's Sunday and again Monday.

Yesterday afternoon's temperatures were in the upper 60's

This trend toward cooler weather will be temporarily reversed today and tomorrow, but the coldest weather of the young fall season will probably reach this area late tomorrow night or early Friday.

That cold air brought heavy snow to parts of Montana yesterday afternoon, and sub-freezing temperatures are expected in the Northern Plains early today.

The local forecast calls for bright sunny weather today with comfortable afternoon temperatures. A high of 73 degrees is expected.

Tonight should be clear and chilly with a low of 46 degrees. Gradually increasing cloudiness and slightly warmer weather is expected tomorrow, and showers may develop late in the day.

A high temperature of 75 is predicted for the afternoon.

Showers tomorrow evening will be followed by windy and colder weather early Friday.

Painters Protect Lion and Obelisk

Painters hit the Lion Shrine and the Obelisk again recently.

But this time they were not from Syracuse or Pitt. They were members of the University crew and the paint wasn't orange or blue but a transparent color.

The stone symbols were painter, Clinton L. Davis, custodial supervisor said yesterday, to protect them from moisture, but it is hoped that the paint will also repel other paints. "This remains to be seen," he said.

The lion was sandblasted this summer, he said, but all of the stains could not be removed without ruining the architect's lines.

M. Jerome Weiss

Dr. M. Jerome Weiss, assistant professor of education, has resigned to accept a position with Jersey State College in Jersey City, N.J.

Teaching Methods--

(continued from page six) equations.

He said that no one can say the programming technique will replace the classroom teacher or whether it would be an advantage to do so. The programming should, however, help instructors improve their teaching methods, he said.

Although it may not be an advantage to replace instructors, the system will save money should this become necessary, Quackenbush said. Reducing the time needed to learn a subject could be particularly helpful to the military, he added, because our armed forces could be trained faster.

Graduate Square Dance

The Graduate Student Association will hold a square dance at 9 p.m. Saturday in the Hetzel Union ballroom.

The dance is open to all graduate students and faculty members.

October Date Set For Third Exam For Peace Corps

The third nation-wide Peace Corps examinations will be given Peace Corps applicants and those interested in serving in the Peace Corps may take the examination at 8:30 a.m. Saturday, Oct. 7, in the civil service examination room of the State College Post Office, Peace Corps officials announced.

The examinations will take approximately six hours with an additional hour for a noon-time break.

Two types of examinations will be given. One of the tests will be for men and women interested in positions as secondary school or college instructors. The second test is for applicants for all other types of service, the officials explained.

A bachelor's degree is required for those who would like to take the test for positions as teachers, but the applicants are not required to be accredited teachers.

Peace Corps officials said there is no rigid passing grade because test results are considered along with character references, background and special skills.

Recent requests from other countries for Peace Corps volunteers have asked primarily for persons skilled in the fields of agriculture and industry.

Those skilled in these areas are especially encouraged to take the Peace Corps examination and file applications, a Peace Corps spokesman said.

It is not necessary to have an application on file with the Peace Corps in order to take the examination, officials said.

ATTENTION

MARRIED STUDENTS

Young married couples will be especially interested in a Provident Mutual Hospital Policy. Under this unique policy, only the wife need be covered to take advantage of full family benefits... including maternity, hospital care, and surgery. This is particularly advantageous when the husband is covered under another policy. New additions to the family are covered, without extra cost, from the age of 15 days until the following anniversary date of the policy. Payments for sickness and accident begin from the first day of coverage. This policy has no deductible. This is important to the student family. You are protected... beginning with the first dollar of covered expense you incur. And that's just the beginning. For more details, call George Borosque at ADams 8-0544... or stop in at our office, 103 E. Beaver Ave., State College.

VELVETEEN MAKE-UP

CREAMY! SMOOTH! MILDLY MEDICATED!

New fragrant Velveteen Foundation covers complexion flaws beautifully, gives you an all-day medicated beauty treatment... doesn't look, feel, or smell medicated. Your complexion looks lovely, fresh, natural. Comes in 1-oz. tube. 5 glowing shades. \$1.00. Use medicated Velveteen in the Pressed Powder Compact, too, for touch-ups.
