

Few Greek Groups Enter Annual Sing

Only eight fraternities and six sororities have entered the IFC-Panhel Sing which begins on Oct. 22, Sally Leight, co-chairman of the sing, announced yesterday. The deadline for applications is tomorrow.

Quartets from seven fraternities and 12 sororities have entered the competition, she said.

Pollock 5 Is Falling Down, Falling Down

Since mid-summer students walking past the Pollock dorms have been witness to Penn State's version of the nursery rhyme, "London Bridge is Falling Down."

Sections of the brick and limestone facing above the ground floor of Pollock 5 are missing, creating what many area residents call an unsightly appearance.

Walter Wiegand, Director of the Physical Plant, said the damage does not stem from a structural defect, but was caused by improper installation of the brick and limestone by the contractor.

Director of Housing, Otto Mueller, said that damage stemmed from the contractor making an error in following the architect's specifications. The error caused an excessive amount of weight to be supported by the facing, causing it to crack. Due to the danger of the facing falling on passers-by it was removed, he said.

The contractor is reported to be waiting for new limestone to repair the damage but does not know when the repairs will be completed.

Cannon Writes Articles For Chemical Journals

Michael R. Cannon, professor emeritus of chemical engineering authored two articles and joined graduate students in the preparation of two others which were published by professional journals last month.

Three of the four were in his speciality — controlled cycling distillation. The fourth article, published in the Aug. 7 issue of Chemical Engineering, was titled "Some Common Errors in Thermodynamics." The others were published in the August issue of Industrial and Engineering Chemistry.

Miss Leight said she hoped many more groups would enter before tomorrow. She added that she would hate to see Greek Week fail, "and if the sing fails, I'm afraid Greek Week will also."

Preliminaries for sorority groups as a whole and fraternity quartets will be at 6:30 p.m. Oct. 22. On the following day the order will be reversed with the fraternities as a whole and the sorority quartets holding their preliminaries.

Final judging will be at 8 p.m., Oct. 27, in Schwab. No judges have been chosen yet, Miss Leight said.

The following fraternities have entered in the group singing: Alpha Zeta, Zeta Psi, Pi Kappa Phi, Sigma Phi Epsilon, Alpha Kappa Lambda, Phi Sigma Kappa, Alpha Chi Rho and Acacia.

The following sororities have entered in the group singing: Zeta Tau Alpha, Gamma Phi Beta, Alpha Omicron Pi, Delta Delta Delta, Phi Sigma Sigma and Alpha Chi Omega.

Fraternity quartets which are participating are Zeta Psi, Pi Kappa Phi, Sigma Phi Epsilon, Alpha Kappa Lambda, Theta Delta Chi, Phi Mu Delta and Acacia.

Sorority quartets which are participating are Zeta Tau Alpha, Alpha Omicron Pi, Alpha Colony, Delta Delta Delta, Kappa Delta, Pi Beta Phi, Phi Sigma Sigma, Delta Zeta, Alpha Kappa Alpha, Phi Mu, Theta Phi Alpha and Alpha Delta Pi.

Collision Causes Damage to Cars

A two-car collision at the E. College Ave. entrance to the University Saturday afternoon resulted in \$500 damage to the automobiles of two University students, State College police reported yesterday.

No injuries were sustained in the accident, police said.

Robert L. Neilsen, of Thompson Hall, had stopped at the entrance for a stop sign when his car was hit from behind by a vehicle operated by James Sterling, also of Thompson Hall, police said. Damage to the Neilsen car was estimated at \$150 and to the Sterling vehicle at \$350.

Red Cross Course Set

The State College chapter of the American Red Cross will hold an advanced first aid course today, Thursday, Oct. 10 and 12 at 330 W. Beaver Avenue.

Library Tour Scheduled For Graduate Students

The Pattee Library will conduct a tour of the building for graduate and special students and faculty members today.

The tour will cover materials relevant to graduate studies. Those who are interested may meet in Pattee Library either night.

Flame Kinetics Lecture

Dr. Arthur A. Westenberg, of the Applied Physics Laboratory at the Johns Hopkins University, will speak at 8 p.m. Thursday in 111 Boucke, on "In Situ Studies of Flame Kinetics."

His talk, which is open to the public, is sponsored by the Central Pennsylvania section of the American Chemistry Society.

LOCAL AD STAFF MEETING

TONIGHT

Rings—Pins—Charms—Keys

FOR THAT INDIVIDUAL TOUCH—

Yes, there are always those special people at home who would appreciate a gift from the University, especially crested jewelry.

So guys and gals why don't you come down and look at the complete line of crested jewelry and the other displays?

P.S. Guys, why not treat yourself to a new tie bar and gals, of course those Sterling Charms and \$3.25 Sterling Silver Rings are so popular.
