

Irish Actor to Give Wilde Monologue

By ROCHELLE MICHAELS

The noted Irish actor Micheal MacLiammoir will display the "wit, triumph and tragedy of Oscar Wilde" when he presents his dramatic monologue, "The Importance of Being Oscar," at 8:30 p.m. tomorrow and Saturday in Schwab.

The play is the second presentation of the University Artists' Series for the 1961-62 season.

2 Groups Send First Constitutions To Sub-committee

The constitutions of the Organization of Student Government Associations and the Keystone Society, an offspring of the former, are slated for review by the Senate sub-committee on Organizational Control at 4:15 p.m. today.

OSGA President Robert Fisher, junior in education from Pottsville, and chairman of the constitution committee for the Keystone Society, will present the constitutions, along with Merle E. Campbell, dean of Student Affairs for Commonwealth Campuses, who is also a member of the OSGA Advisory Board.

OSGA was created in October of 1960, and was headed by Richard Haber, last year's SGA president.

Though it has eight definite purposes, as outlined in the constitution, it serves primarily as a sounding board for ideas which might benefit the University's 14 campuses, and as a medium for developing student leadership.

The Keystone Society is the first attempt to establish a University wide method of recognition for the freshmen and sophomores at the 14 campuses including University Park. The society's constitution also provides for honorary membership for faculty and administrative members "... who make a significant contribution to the student activities program of the University."

OSGA will hold its fall meeting on campus November 3-4.

Alpern Says--

(Continued from page one) Mysterious middle initial, "X", Miss Alpern said that during the campaign this "X" stands for an "X" on the ballot next to her name. This middle name has always been a closely guarded secret, Miss Alpern confided.

She promised, however, to reveal the name when she writes her book. "I will write a book after my election," she explained.

The dramatic monologue was written by MacLiammoir from the works of Oscar Wilde and from his own views on the British playwright of the 1890's.

MacLiammoir spends only part of the play impersonating Wilde and other characters in the story. Between these dramatic moments, he plays the role of reporter, observer and critic of Wilde who had a much-disputed moral reputation.

The play has been divided into two sections. Part I, "The Happy Prince and The Green Carnation" describes Wilde's sensitivity to the beauty of things about him and his characteristic sense of humor. It closes with the now famous charges of immorality against the playwright.

Wilde's trial presumably takes place during the intermission since Part II, "De Profundis," opens with a soul-searching letter of that title which Wilde wrote to a friend while he (Wilde) was in prison.

All the information which MacLiammoir used to assemble this monologue comes directly from Wilde's letter and other writings, and a great deal of it is read verbatim. Most of the remaining time is spent on MacLiammoir's comments on Wilde.

Howard Taubman, New York Times drama critic said, "Mr. MacLiammoir does not spare Wilde, nor does he judge him. He reveals him affectionately ... (as an) ... Irishman proudly proclaiming a compatriot's expression of the spirit of Ireland."

Tickets are available at the HUB desk from 9 a.m. to 12 noon and 1 to 5 p.m. today through Friday. Students may obtain them upon presentation of their matriculation cards, general admission tickets will also be sold for \$1.25.

Crystalline Solid Study

A theoretical study of changes that occur in important crystalline solids, such as quartz and barium titanate, is being conducted by Dr. Rustom Roy, professor of geochemistry.

Complexity of World Problems Is Subject of Series Speech

The easy "never, never land of three wishes" will not solve any world problem in the increasing complexity of international events, Dr. Robert T. Oliver, head of the speech department, said last night.

His talk, "American Foreign Policy in the Midst of World Revolution," was the first of the Liberal Arts Student Council's Lecture Series for the fall term.

Oliver said that in the world today people cannot "sit tight until the periodical crises blow over." Oliver told a capacity audience in the Hetzel Union Ballroom. And complaining about current events will not accomplish anything constructive, he added.

Oliver cited the Cuban invasion, the Laos guerilla war, the recent erection of the East-West Berlin concrete wall, and the Congo situation as examples of failures in American Foreign Policy.

Two-thirds of humanity has usually been uneducated and undernourished but the difference today is that these people are becoming aware of that fact and

are restless and dissatisfied, he said.

The new nations of the world still insist on denouncing the United States as a colonialist power because it is, he said. That is, the United States thinks as a colonialist power and that thought creeps into its action, Oliver added.

He said the United States must realize that "the time has literally come when the world cannot exist one-fifth white and four-fifths other races," he said.

Four other areas which should be recognized and strengthened, Oliver said, are a stronger world federation, more foreign aid, more evangelism about our democratic way of life and a continuing military strength.
