

U.N. Urges Moscow To Halt Bomb Test

UNITED NATIONS, N.Y. (AP)—A resolution urging Moscow to cancel a 50-megaton H-bomb blast was rammed through the U.N. Political Committee last night over bitter Soviet opposition.

By a vote of 75 to 10 with one abstention (Mali) the committee approved an eight-nation resolution recommending that the U.N. General Assembly confront Moscow with a solemn appeal to refrain from testing the big bomb scheduled before the end of this month.

Taylor Reports Viet Nam Set-up Looks Hopeful

BANGKOK, Thailand (AP)—Gen. Maxwell D. Taylor brought his fact-finding mission to Thailand yesterday and declared he is "quite encouraged" about South Viet Nam's chances of beating down the Communist threat in that pro-Western country.

President Kennedy's special military adviser flew here from Saigon for two days of talks with Marshal Sarit Thanarat, premier of Western-allied Thailand, and with officials of the Southeast Asia Treaty Organization—SEATO.

Taylor is expected to brief Sarit today on his firsthand look at the trouble in South Viet Nam, where President Ngo Dinh Diem's government is sorely pressed by the Communist Viet Cong guerrillas.

Taylor told newsmen SEATO has a role to play in the Vietnamese crisis, because, like the United States, it is a "friend" of Viet Nam. There has been speculation that if the United States decides to send troops to bolster South Viet Nam's army it would prefer to send them as part of a SEATO force.

Berlin--

(Continued from page one) argued with the border guards, the U.S. commandant in Berlin, Maj. Gen. Albert Watson II, drove past them into East Berlin unmolested to see the Soviet commandant, Col. Andrei I. Solovyev. Watson spent two hours at the Soviet headquarters in the East Berlin suburb of Karlshorst.

The U.S. command later announced that Watson warned Solovyev of the serious consequences of the "illegal and unacceptable" Communist restrictions on Allied access to East Berlin.

Kennedy Okays Nuclear Testing For Peaceful Use

WASHINGTON (AP)—President Kennedy gave the go-ahead yesterday for a long-planned underground nuclear explosion in the salt beds of New Mexico to launch a new search for peaceful uses of atomic power.

The pioneer explosion, about 25 miles southeast of Carlsbad, probably will take place during the second week of December, the Atomic Energy Commission said. It will be in a salt shaft, some 1,200 feet below the surface, that cost about \$1 million to dig over the past year.

The total cost of the test was put at \$5.5 million.

The power of the explosion, the AEC said, will be five kilotons—equal to the power of 5,000 tons of TNT and about one-fourth that of the atomic bombs dropped on Japan in World War II. Originally, the AEC had planned a 10-kiloton shot.

Although only this single explosion was approved by the President, it is expected to provide guideposts for a myriad of other proposals for peaceful uses of the atom—some in advanced stages, others merely dreams.

Highest Cost of Living Reported in September

WASHINGTON (AP) A greater than expected increase in clothing prices shoved the nation's September living cost level to the highest point ever reached.
