

Preliminary Plans Begun Foianini Challenge— On New Science Building

By DAVE BOLBACH

Preliminary plans are currently underway for the proposed \$3,187,500 earth sciences building, which was recently approved by the General State Authority Board.

No date has been set for the start of construction, Woodrow Bierly, public information news editor, said, because the GSA

Post Office To Reroute Stray Mail

About 450 pounds of incorrectly addressed mail was delivered to the Campus Mail Service for rerouting one day last week, William F. Ackerman, news editor of the University Public Information Department, said yesterday.

"The volumes of incorrectly addressed mail received by the mail service have caused quite a bit of work for the department," Ackerman said.

He said that the service had clipped addresses from second-class mail and sent publishers notification of the correct addresses. Ackerman said that these publications were not destroyed but were sent to the persons to whom they had been addressed.

Ackerman said that the mail service will send cards next week to departments and individuals asking them to inform publishers and correspondents of their correct addresses.

"The post office in State College will deliver any mail that is correctly addressed," Ackerman said. "The post office does not have to redirect mail with incorrect addresses."

Wilbur F. Deihl, supervisor of mail and telephone services, said that the growing volume of mail in State College prompted the town post office to ask the University last August to assume the responsibility of rerouting incorrectly and incompletely addressed mail.

He said that all addresses would contain both the building name and the room number.

Foianini Will Talk At OSGA Meeting

SGA President Dennis Foianini will open the fall meeting of the Organization of Student Government Associations with an address on "Student Government at University Park," when the body convenes on campus tomorrow.

Robert Fisher, OSGA president, said yesterday that David Trager, student insurance chairman, will present a report on the possibilities of extending student insurance to the University's 13 commonwealth campuses.

Workshops on "Evaluation of Summer Conference" and "Extension of Inter-campus Tournaments" will be held tomorrow night following the general session. Paul Miller, of Hazleton Campus, and Stanley Love, of Wyomissing Center, have been appointed workshop chairmen.

(Continued from page one) nothing major remaining. These little things would lead only to eternal confusion.

"Some of the students on the committees just couldn't take the confusion which characterized SGA last year and so we withdrew the constitution from consideration," he said.

Foianini said that he and David McKinley, associate dean of business administration, will work together to write a less specific constitution which will bring a solid SGA into effect—one that will last for a long time and eliminate the confusion which has arisen every year.

Foianini also commented on the addresses of Richard Pigossi, IFC president; George Henning, MRC president; and Robert Fry, TIM president, made to the two committees on Monday night.

Pigossi, Henning and Fry expressed opposition to political parties in SGA elections. Pigossi said they were acting as interested students, not as representatives of their organizations.

"These three men did more than speak against the use of political parties in Assembly elections. They transferred the nomination of SGA candidates to their own specific groups: IFC, TIM and MRC. This is clearly a case of a selfish motive prompting them to speak," he said.

Concluding his challenge to administration sincerity, Foianini hit upon the question of whether a 3-day Thanksgiving vacation

should replace the one day vacation scheduled by the University.

"People all over the United States stand up and say 'Red China is undermining the concept of the family.' What is Penn State doing? We claim to place an emphasis on tradition and yet the University is undermining the very things we value."

Laurence H. Lattman, chairman of the student affairs committee, was out-of-town last night and unavailable for comment.

Robert G. Bernreuter, special assistant to the president for student affairs, did not comment on Foianini's statements last night, but said, "I feel Mr. Foianini can express his opinion on anything he believes."

Pi Omega Pi Will Hold Faculty, Student Tea

Pi Omega Pi, business education honorary fraternity, will sponsor an informal tea for all business education students and faculty members at 3 p.m. today in Simmons lounge.

Dr. F. W. House, newly appointed professor of education, will be introduced at the tea. Prior to assuming his new duties here this fall, House was chairman of the Department of Business Education at the University of Nebraska.

must first approve the preliminary plans and then assign an architect to draw up the final plans.

Definite plans for the facilities to be included in the building are not yet known. C. S. Wyand, vice-president for development, is in charge of the proposed facilities and was unavailable for comment.

The project, originally part of the University's proposed 1963 program, was moved up by the board in order to obtain a \$600,000 grant from the National Science Foundation. Bierly said.

The reason for the grant, he said, was because of the outstanding work being done in the fields of research and graduate study.

Approval of the project will cancel an allocation of \$279,093 approved by the board for conversion of the service building facilities to laboratories and classrooms for work in earth sciences. These laboratories and classrooms will be included in the new building, Bierly explained.

The new building will be constructed south of the present Mineral Sciences building and will necessitate the removal of the Continuing Education building, he said.

Top priority has also been assigned to a proposed life sciences building which will be constructed in the vicinity of Frear Laboratory.

The project was approved by the 1961 legislature, but was given top priority because of a grant of \$831,690 from the National Institute of Health. The grant, coupled with the \$2,179,593 already allocated by the GSA, will allow for additional construction to the original project.

The GSA also recently awarded a contract for construction of nuclear research and study facilities to Earl L. Crump Inc., of Chambersburg, for \$1,150,800. The project will include an addition to the present research reactor building.

Teacher Placements
Interviews are being held tomorrow by the Teacher Placement Division of the University Placement Service.
All tenth, eleventh and twelfth term seniors who will receive a teaching certificate upon graduation are eligible for these interviews.
All interviewees must make appointments for interviews with the Teacher Placement office, 105-A Burrowes.
