

'BMOC's' Invited To Matrix Dinner; Everitt to Speak

Helen Everitt, associate editor of The Ladies' Home Journal, will be guest speaker at the 1961 Matrix Dinner to be held Wednesday.

The dinner is sponsored annually by Theta Sigma Phi, women's professional journalism society. Faculty and student guests have been invited on the basis of outstanding achievement in campus activities.

The deadline for picking up tickets has been extended until 3 p.m. Monday

Mrs. Everitt, who has published in Atlantic Monthly, Harper's and the Journal, has also been head of the magazine department of Curtis Brown, Ltd., a New York literary agency, as well as the New York editor for Houghton Mifflin Company book publishers, Boston, Mass.

Three outstanding women will receive awards at the dinner. A "Quill Girl" will be selected from women who have never been recognized by a hat society. A "Cap Girl" will be chosen as the outstanding representative of the four women's hat societies.

Both selections are made by members of Theta Sigma Phi.

The presidents of AWS, WRA, ISA, Scrolls, Morlar Board and Panhellenic Council are eligible for the Matrix Girl award. Those attending the dinner will select the Matrix Girl by secret ballot.

OSGA to Meet Tonight

The opening session of the fall meeting of the Organization of Student Government Associations will be held at 7 tonight on the second floor of the Hetzel Union Building.

SGA President Dennis Foianini will address the group, speaking on "Student Government at University Park."

Workshops on "Evaluation of Summer Conference" and "Extension of Inter-campus Tournaments" will be held tomorrow night after the general session.

Merger of Libraries Discussed For Chem-Phys, Mathematics

A merger of the chemistry-physic and mathematics libraries is under discussion, Ralph W. McComb, University librarian, said yesterday.

The proposed site for the joint library is McAllister. The chemistry-physic library is presently located in Whitmore. The mathematics library is now part of Pattee Library.

There are several reasons for the proposal, McComb said. It is a logical development in the growth of the University's library system, he said. The location of McAllister is central to all students who would want to use the facilities.

Also, he said, the chemistry-physic and mathematics libraries are being pressured for space and there is sufficient room in McAllister for both.

There are several problems for the proposal to overcome, he said. The problems include the acceptance of general feasibility of the project and the fact that the area is presently occupied by other agencies. Money has been made available by the General State Authority for remodeling McAllister, but this money may not be

sufficient for a library, McComb said.

The final decision will be made by the faculty, administration and library staffs.

WHO...

WHO in this nation believes the federal government should spend more billions of dollars on government electric systems when the investor-owned electric light and power companies can supply all the additional electric power that America will ever need?

WHO can justify such needless strain on a federal budget that is already hard-pressed to meet the nation's defense needs?

WHO are the few people that want to see government get still further into competition with its own citizens by needlessly building federal transmission lines, instead of using existing and planned facilities of the investor-owned electric companies?

WHO among American taxpayers wants the government to spend money needlessly when it can get money instead—through the additional taxes the investor-owned electric companies will produce if they supply all of the power for the future?

WHO can reasonably dispute the basic principle that American industry should be permitted to do the jobs it can do best—and that government should concentrate on those matters which are properly the concern of government?

The "WHO" is certainly not the American public! In a recent study, the vote was predominantly for investor ownership of the electric power business over federal government ownership.
