

2 Escape Injury in Auto Crash

Two students driving to Philadelphia Friday night came close to death when the right front wheel of their car flew off.

The students, David Sigman, senior in psychology from Philadelphia and Resa Axelrod, freshman in elementary education from Springfield, were in Sigman's car approximately five miles from the Harrisburg East entrance to the Turnpike on the route 22 bypass. Sigman said he was driving at a little less than 50 miles

an hour when he felt the front of the car fall. At first he thought he had a flat tire, he said. Then a large spray of sparks began streaming along the right side of the car from under the right front fender, and the car began a short spin to the right.

Sigman said that he got the car straightened out on the shoulder of the road but was not able to stop it because of brake failure. He estimated that he skidded one-half mile before the car was stopped by a wooden barrier. The wheel was later found, with

the brake drum still attached to it, three-quarters of a mile from the car.

A state trooper on the scene said that he had seen several similar accidents, but that he had never seen anyone walk away from one, Sigman said.

OPERATION ELAFLOR: Workmen install an elevated floor in the Computation Center in Boucke Building. Upon completion of the aluminum and wooden tile floor, electrical wiring and air conditioning for IBM computers will run between the new and old floors.

Four Engines Donated To Undergrad Projects

Donations of four engines for use in senior undergraduate projects in the Department of Mechanical Engineering have been made by two industrial firms.

Cushman Motors, of Lincoln, Neb., has given the department three air-cooled single cylinder engines valued at \$195. The Outboard Marine Corporation has donated an outboard motor engine for laboratory use. This engine is worth \$110.

Mares Says Tito Made Yugoslavia 'Welfare State'

By MEL AXILBUND

In the years since his assumption of power as the head of the Federal People's Republic of Yugoslavia, Marshall Tito has transformed that nation from an industrial infant to a growing welfare state, Dr. Vaclav Mares, associate professor of economics said Sunday night.

Mares spoke at the Slavic Center in the Myra Dock home management house on "Yugoslavia, Tito's Welfare State." He has recently returned from Yugoslavia where he spent part of a sabbatical leave.

Yugoslavia's social security system is "one of the broadest and most generous in Europe," Mares said. It provides benefits to the sick, to invalids and to the aged.

In addition, he said, families receive an allowance for each child. He said ten per cent of the total national income is redistributed by the state.

Mares said money wages remain low, averaging 11.5 cents per hour. However, he added, the prices the Yugoslav pays are also low. A bus ride costs 3 to 4 cents and a three room apartment rents for 8 to 10 dollars a month.

When Tito gained control he had two tasks before him, Mares said. He had to build up an economically weak nation, and in so doing he had to eliminate economic inequalities between east and west sections of the country.

"A transportation system has been developed," Mares said, "that has aided in the economic equalization by making whole areas accessible which were previously isolated."

Directory Names Richard 251381M

What's in a name? Names are often a touchy point with students. When pronounced incorrectly by profs, students assume a most indignant attitude, taking infinite pains to correct him. If misspelled, the same process is repeated.

Many students have names that sound alike, or are alike, but there is only one Richard 251381M.

Fated to be listed in this manner in the new student directory, Robert's true identity will remain a secret to those unable to decipher the cryptic code of the IBM machine.

The last page of the directory carries the code. Who knows? Maybe we will all lose our identity and become merely numbers during our years at the University. There is only one person who knows the effect of this anonymity.

His name is Richard 251381M.

Girl Watcher's Guide

Presented by Pall Mall Famous Cigarettes

The nudge is permitted when a beautiful girl is sighted in an unusual place or at an unusual time.

LESSON 3 - Concerning self-control

Although we believe that girl watching has it all over bird watching, we feel that these two hobbies do share one important characteristic. They are both genteel. They both respect the rights of the watched. A girl watcher who asks a beautiful stranger for her name and phone number is like a bird watcher who steals eggs. (If the

stranger happens to have a pack of Pall Mall Famous Cigarettes, and you're dying for a good, natural smoke, you may break this rule.) Normally, the girl watcher's pleasure is warm, quiet and internal. However, there are cases when a discovery is so dazzling it must be shared. Such a case is illustrated above.

WHY BE AN AMATEUR? JOIN THE AMERICAN SOCIETY OF GIRL WATCHERS NOW!

FREE MEMBERSHIP CARD. Visit the editorial office of this publication for a free membership card in the world's only society devoted to discreet, but relentless, girl watching. Constitution of the society on reverse side of card.
