

Profs Give Varied Views on Term Booklists Published For Winter Term

By SARALEE ORTON

This is the last article in a series on the reactions of professors in the various colleges to the 4-term system.

Opinions on the term system from three professors in the College of Physical Education ranged from strong dislike to hearty approval yesterday.

Eugene Wettstone, professor of physical education and coach of gymnastics, said that he is now against the system, but that "it is a little unfair to say this with any authority since the true test of the term system will come after a year."

For a student to absorb activities or athletics, time is needed to digest and assimilate the material, and to make it retainable in the brain and muscular system, he said.

"Quick learning often means memorization and quick forgetting," he added. "In physical education courses, it can also mean subjecting yourself to injury."

Wettstone said that constant repetition is the only way to gain skills in such courses as gymnastics, and this is impossible under the term system. In addition, the short time period often means by-passing instruction of many of the fundamentals which are the key to success.

The term system has created mental confusion in students because of the pressure of big assignments and constant rounds of bluebooks, he said.

Mildred A. Lucey, associate professor of physical education, said that she "likes the term system very much."

She said that in the courses she teaches, including tennis, field hockey and bowling, she can accomplish more in the longer period. Under the term system, there is a full hour available for activity after time is allotted for students to change clothes, she said, while under the old system only about 35 minutes remained. "Now we can complete projects and games during one period while before we had to modify the time period," she said.

George W. Harvey, associate professor of physical education, said that the term system hasn't affected men's required physical education courses greatly.

The longer class periods make it easier to teach activities like volleyball, bowling and outside team sports, he said. For example, under the new system, five more games of bowling can be completed in five weeks than under the 8-week program of last year.

"Last year, when the periods were only 38 minutes long after time was allowed for dressing, by the time you got outside to start playing sports like softball, there wasn't much time at all," he said.

Harvey said that as yet it is too early to tell if a greater number of class periods are more beneficial for teaching skills. He said he didn't know yet if skills could be taught as well in five weeks as in eight.

Booklists Published For Winter Term

(As a public service The Daily Collegian is printing the booklists for courses being offered in the nine colleges during the winter term. Omission of a course from this list does not necessarily mean it will not be offered, but that Collegian could not get the name of the text to be used.)

BUSINESS ADMINISTRATION

- Acctg 1, 2—Accounting for Business Decisions, Black & Champion, Prentice-Hall
- Acctg 3, 4—Intermediate Accounting—Comprehensive Volume, Karrenbrock & Simons, South-Western
- Acctg 4—Advanced Accounting—Comprehensive Volume, Karrenbrock & Simons, South-Western
- Acctg 5—Basic Cost Accounting, Practice Set and Forms to accompany Text, Specter, Prentice-Hall

Events of the Week

TODAY

Graduate Mining Seminar, J. Conway, speaking on "A Modification of the Mohr-Coulomb Theory of Fracture," 4 p.m., 304 MI

Meditation Chapel Choir, Festival of Lessons and Carols, 8 p.m., Eisenhower Chapel

TIM MOVIE, "Hemo — The Magnificent", 1 p.m., 6 p.m., HUB assembly

University Lecture Series, Archibald MacLeish, poet reading some of his works, 8:30 p.m., Schwab

TOMORROW

Architecture Lecture, Victor D. Gruen, professional architect and community planner, speaking on "Modern Problems in City Planning," 7:30 p.m., 121 Sparks

French Institute Film, "Caroline Cherie," 8 p.m., 209 Home Ec South

Psychology Colloquium, Dr. Robert P. Abelson, associate professor of psychology, Yale University, speaking on "Computer Simulation of the Attitude Processes," 8 p.m., 214 Bouke

THURSDAY

Biological Science Lecture Series, Dr. W. D. McElroy, chairman of the biology department and director of McCollum-Pratt Institute, John Hopkins University, speaking on "Bioluminescence," 4 p.m., 214 Bouke

Biophysics Seminar, Dr. J. Lowy, research associate, Kings College, London, speaking on "Fine Structure and Action of Muscle," 11:10 a.m., 300 Walker

Chemistry Colloquium, Dr. George Porter, University of Sheffield, England, speaking on "Kinetics of the Triplet State in Solution," 12:40 p.m., 302 Whitmore

English Colloquium, Edward Rosenheim, Jr., professor of English, speaking on "The Fifth Voyage of Lemuel Gulliver," 7:30 p.m., Nittany Lion Inn

International Film Series, "Ugetsu," 3 p.m., 7 p.m., HUB assembly

Metallurgy Graduate Seminar.

J. G. Harhai, speaking on "The Mechanism of Exothermic Oxidation of Hydrogen by Cold Worked Iron-Carbon Alloys," 1:10 p.m., 229 MI

Physics Colloquium, Dr. Johann D. Swartz, assistant professor of physics, University of Rochester and research associate at Fermi Institute for Nuclear Studies, speaking on "Hyperon-nucleon Interaction," 4:15 p.m., 117 Osmond

FRIDAY

Biophysics Seminar, Dr. Seymour S. Brody, IBM Watson Research Laboratory, Columbia University, speaking on "Mesomorphic State of Chlorophyll and its Possible Role in Photosynthesis," 11:10 a.m., 300 Walker

Center Stage, "The Cave Dwellers," 8 p.m.

Fluid Mechanics Seminar Movie, "Vorticity," 3:55 p.m., 301 Eng A

Mineral Industries Colloquium, Dr. W. R. Cole, visiting professor of ceramic technology, speaking on "The Work of the Division of Building Research of the CSIRO (Australia)," 4 p.m., MI Auditorium

SATURDAY

Center Stage, last showing of "The Cave Dwellers," 8 p.m.

Chapel Advent Services, 10:30 p.m., Schwab

SUNDAY

Chapel Services, Dr. Luther H. Harshbarger, University Chaplain, 10:55 a.m., Schwab

German Sing, 7:30 p.m., Schwab

Red Cross Unit Sends Thanks To University

President Eric A. Walker received a letter yesterday thanking the University for the use of its facilities for the recent Red Cross Bloodmobile drive.

The letter was sent by Mrs. L. W. Hu, chairman of the blood drive for State College.

"A total of 351 pints of blood was collected during this visit," Mrs. Hu said. "This was our best 2-day drive for the past several years."

"A campus bloodmobile drive not only provides Penn State students with an opportunity to perform a humanitarian and community service, but also provides an opportunity for many students to make 'directed donations' or 'blood replacements' for friends or relatives," Mrs. Hu commented. She cited as an example one student who recruited 25 friends to donate blood for his brother who has received 18 transfusions.

Froth Sells 1915 Poem

"Argosy" magazine of London has asked Froth for permission to print a poem that appeared in the November issue of Froth in 1915. Froth got one pound and one shilling from Fleetway Publications for its use. The poem is "Tobacco" by Graham Lee Hemminger.

Miss Linda Wooden of Chi Omega

a portrait for Christmas

- Your proofs will be available in one day
- Pre-Christmas delivery of finished portraits
- Appointments will not be needed on Mondays, Wednesdays and Fridays - - -
- EVENING Appointments are also available

all at - bill coleman's

OPPORTUNITIES

FOR EE, ME, PHYSICS AND MATH MAJORS AS FIELD SERVICE ENGINEERS IN THE MISSILE SYSTEMS FIELD

AC, the Electronics Division of General Motors, presently has positions available for Electrical Engineers, Mechanical Engineers, Physics and Math majors to work as Field Service Engineers on missile systems. You will work on AC's all-inertial guidance system utilizing digital computers for the TITAN II missile.

When you join us you will be given a three-month training course that includes these interesting subjects:

- WEAPONS SYSTEMS • THEORY OF GYROS • THEORY OF OPERATION OF GYROS IN A STABILIZED PLATFORM
- STABILIZATION AND MEASUREMENT LOOPS OF A PLATFORM • THEORY OF OPERATION OF ERECTION LOOPS • THEORY OF AIRBORNE DIGITAL COMPUTERS
- OVERALL SYSTEM CONCEPTS

Following this training period you will be responsible for installation and check-out of the guidance system for the TITAN II. Assignments will include positions at military installations or in Milwaukee.

Contact your College Placement Office regarding a General Motors-AC campus interview or send the form below to Mr. G. F. Raasch, Director of Scientific and Professional Employment, Dept. 5753, 7929 South Howell, Milwaukee 1, Wisconsin.

An Equal Opportunity Employer

AC SPARK PLUG

THE ELECTRONICS DIVISION OF GENERAL MOTORS MILWAUKEE • LOS ANGELES • BOSTON

ACHIEVER Inertial Guidance Systems for the TITAN II, THOR and MACE missiles . . . Bombing Navigational Systems for the B-52C&D and B-47 aircraft . . . ACHIEVER mobile radiotelephones

For more information regarding Field Service Engineering opportunities with AC, send this form to:

Mr. G. F. Raasch
Dept. 5753, AC Spark Plug Division
Milwaukee 1, Wisconsin
