

Series to Present Politicians, Newsmen

Four men who have been active in Washington affairs for most of their careers will speak on campus during this term and the spring term for the University Lecture Series.

The four speakers scheduled for this academic year are: Luther H. Hodges, secretary of commerce, Feb. 11; Eric Sevareid, news analyst for the Columbia Broadcasting System, Feb. 17; and Sen. Hubert Humphrey, D-Minn., and Sen. Karl Mundt, R-S.D., in a debate April 14. Topics of the lectures will be announced previous to each speaker's appearance.

Hodges has been secretary of commerce since President John F. Kennedy's inaugura-

tion. Before this appointment he served six years as North Carolina's governor and had been President Dwight D. Eisenhower's consultant to the State Department in the International Management Conference of 1951.

During World War II, Hodges headed the Textile Division of the Office of Price Administration and was consultant to the secretary of agriculture.

Sevareid has led a different type of career from the other speakers for the series. Starting as a copy boy for the Minneapolis Star, he then became city editor of the New York Herald Tribune's Paris edition, night editor of the United Press in Paris, and, finally, a correspondent for CBS in 1939.

IAU Sponsors Plan For Study Abroad

By BARB BROWN

(This is the third in a series explaining opportunities for study abroad.)

A year of study at the University of Aix-Marseille, the largest French university outside of Paris, is being offered to undergraduate students by the Institute of American Universities.

The IAU is a non-profit private educational organization designed to provide a service to American colleges and universities which have not established overseas facilities for their students.

This program features instruction similar to the standard American curricula. An American academic calendar will be followed offering three 50 minute sessions per week for 16 weeks for each course, granting three credit hours.

Course instruction will be in English. No student will be disqualified because of a foreign language requirement. The program includes courses in social studies, literature, language and the arts.

The cost, including trans-Atlantic travel, is designed to equal that of an average American college or university. The cost of such an academic year is estimated from \$1,650 to \$2,000.

Students will be lodged in the French homes or hotels. The homes are carefully chosen and a check is made on each during the year.

IAU program students are registered as students of the University of Aix-Marseille, part of the French state system, so as to have

access to all University facilities. Upon completion of the year's work, the IAU will recommend to the home college or university that 30 or more credit hours be assigned to the student. Because of variations in courses the student's own college must make the final decision in granting credits.

The IAU's academic year begins with a series of introductory lectures on French life and customs. The regular program of courses is intended to teach the student to appreciate the contributions of each country as well as the problems of international relations. Tours can be arranged during vacation periods upon the student's request.

Application for the program can be made by undergraduates in regular standing from any accredited or state approved college or university. Recommendations by the department head of the student's major course and the dean of his college must be obtained.

Further information on the program at the University of Aix-Marseille may be obtained from the International Student Affairs office, 108 Willard.

Ag Teams Win Honors

Five agriculture students have placed among the top in the nation in recent crop and poultry judging competition, while a University bred and raised steer captured second place in the last month's International Livestock Exposition.

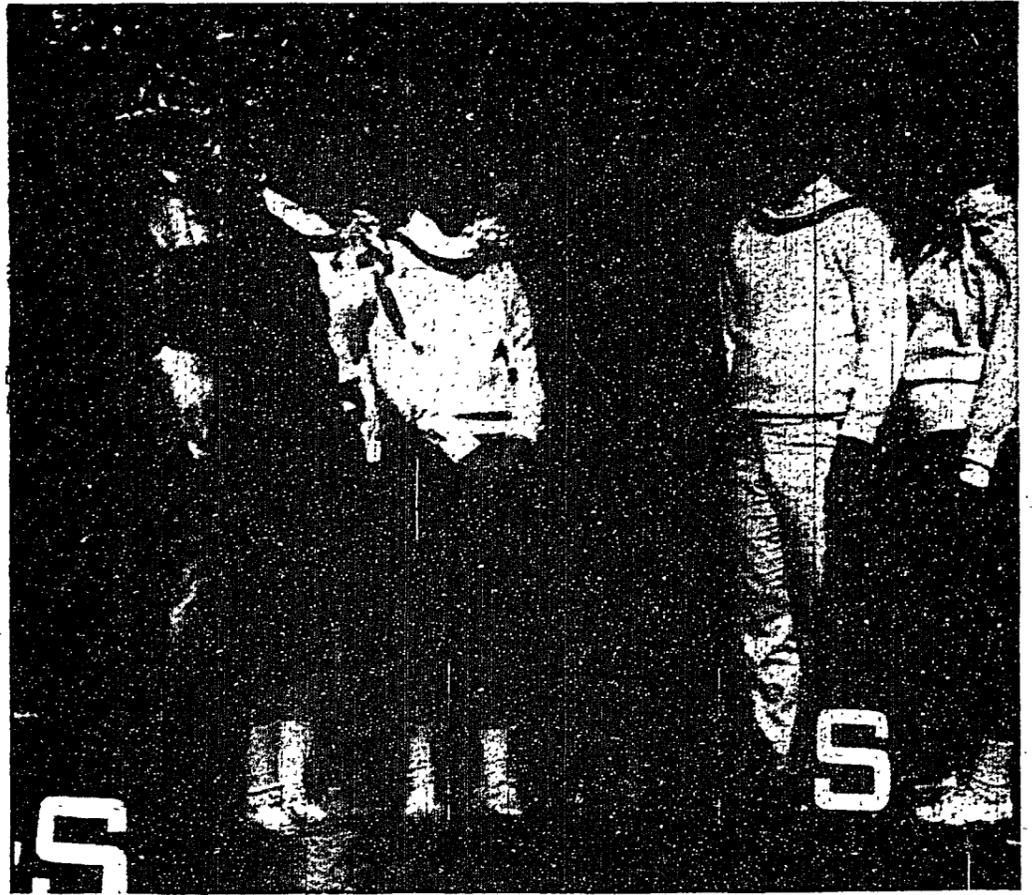

The crop judging team placed second in the National Collegiate Crops contest at Kansas City and third in the International Collegiate Crops Contest at Chicago.

Individual honors at the Chicago contest were won by Elwood White, senior in agronomy from Jermyn, third place; Glenn Buss, senior in agronomy from Bath, a ninth place; and Frank Resides, senior in agricultural economics

from State College, eleventh place.

The poultry judging team won third place in the 38th National Intercollegiate Poultry Judging Contest in Chicago. Carl Johnson, junior in poultry husbandry from Altoona tied for second in individual scoring and Charles Ackley, senior in agricultural education from Middleburg, placed fifth.

For the second consecutive year, the University has won the reserve grand championship for steers at the International Livestock Exposition in Chicago. The University also had two grand champions, 12 champion beef cattle, and 17 blue ribbon winners. The University exhibited a grand champion ram and two blue ribbon winners in the sheep show.

WHICH ONE IS MISS AMERICA? It is evidently not the guy dressed up as a lion. Four University cheerleaders and their friend "The Nittany Lion" are shown Saturday, as they

watched the Gator Bowl game with Miss America 1962, Maria Beal Fletcher of N. Carolina, third from right.
