

Pursley Leads Skating; Bid Made for Warriors

BOSTON (AP) — Barbara Roles Pursley, a 28-year-old mother from Arcadia, Calif., outclassed five rivals in the intricate school designs yesterday and virtually clinched the women's senior national figure skating championship.

Rated one of the world's best free skaters, the Olympic bronze medalist is expected to solidify her superiority in the final free skating competition tomorrow.

SCHOOL FIGURES count 60 per cent in the judging and free skating 40 per cent.

While her 7-month-old daughter, Shelly, snoozed peacefully in a corner of the Boston Skating Club rink, Mrs. Pursley gave a dazzling exhibition on six compulsory figures.

She took a lead in ordinal points over Frances S. Gold, 18, of Norwalk, Conn., who was second and Lorraine Hanlon, 18, of Boston, third.

PHILADELPHIA (AP) — A group of New York and Los Angeles businessmen have made a "serious offer" of \$850,000 for the Philadelphia Warriors of the National Basketball Association, the club's attorney said yesterday. The statement confirmed a re-

port by Melvin Durslag of the Los Angeles Herald-Examiner that such an offer had been made.

The offer won't be considered in detail by club owner Eddie Gottlieb until after the NBA season, attorney Ike Richman said. He denied a report the prospective buyers already have an option on the Warriors.

The prospective buyers are Bernard Solomon of Los Angeles, and Matthew Simmons and Leo Mogul of New York, Richman said. They probably would take the team to San Francisco, giving the NBA two West Coast clubs.

Richmond has said the Warriors receive frequent bids for the franchise. The latest, he said, is the most serious one.

NY Commission Extends Deadline for Of Archie

NEW YORK (AP) — Archie Moore, who holds a share of the world light-heavyweight boxing crown, was given another week to sign for a title defense by the New York State Athletic Commission yesterday.

Moore, who is recognized in New York, Massachusetts and Europe, previously had been warned to have signed contracts by noon yesterday. The commission conferred by telephone with Moore and his attorney in San Diego, Calif., and gave him a one-week reprieve.

Schaeffer's 31 Points Highlights IM Cage Action

Ed Schaeffer, Nittany 42 (4-0), scored 31 points to lead his team to a 60-19 rout over Nittany 33 (1-3) in an IM cage game played Tuesday night. It was the highest individual score recorded thus far this season.

The stocky freshman also had a hand in previous victories over Nittanians 39, 35 and 23, scoring better than 10 points in each game.

Schaeffer played his high school basketball at Pine Grove, leading his team to the playoffs of the

South Schuylkill County League the two years he played on the varsity.

Nittany 42 has yet to play Nittanians 31, 29 and 21, this season, but is expected to be a strong contender for the IM Independent Championship.

Tough Home Schedule

Penn State's 1962 football squad is scheduled for home games against Navy, Air Force, Syracuse, West Virginia, and Maryland.

Pole Vaulter Leaps To Indoor Record

BULLETIN NEW YORK (AP) — John Uelses, a crew-cut Marine from Quantico, Va., last night became the first pole vaulter in history to clear 16 feet when he vaulted 16-1/4 in the Millrose Games in Madison Square Garden.

The crowd of more than 15,000 watched hushed as Uelses, who never got over 15 feet until a year ago, raced down the runway on his third try.

His fiberglass pole caught exactly right. It bent almost in half as he soared up and up. Over he went with room to spare and the crowd let out a mighty roar.

Uelses stole the show from Gary Gubner, a towering 255-pound New York University sophomore who broke the indoor shotput record with a heave of 63 feet, 10 1/4 inches.

Only last week, the German-born Uelses broke Don Bragg's indoor mark of 15-9 1/4 in Washington when he topped 15-10 1/4. At that time, he promptly predicted he would make the magic 16-foot mark before long.

It took him just a week. Since it was made indoors, it cannot be accepted as a world record, however.

Big Things are happening here...

Pennsylvania investor-owned electric light and power companies take the lead in nuclear power progress with three of the nation's 17 plants, in operation, under construction or planned.

The aggregate capacity of these three Pennsylvania nuclear power plants will be 145,000 kilowatts. In contrast, in all of Russia there is only one nuclear plant devoted to power production, and that has a capacity of only 5,000 kilowatts!

SHIPPINGPORT ATOMIC POWER STATION—the world's first large-scale nuclear power station devoted solely to peaceful uses. In addition to producing power by means of the pressurized water reactor, this station has provided extensive invaluable information on uranium oxide fuel element performance, core reactivity changes and associated control factors, and on problems of health physics, radio chemistry and waste disposal.

SAXTON NUCLEAR POWER PROJECT—now under construction. This is basically a research project which will explore the most promising concept of the pressurized water reactor for economic production of nuclear power: This facility has been designed and constructed so securely that it is extremely unlikely that storms, floods, earthquakes, fire, or even a missile hit would produce a nuclear accident. The Saxton plant is

being built at an estimated cost of \$8,520,000 to participating investor-owned electric companies.

PEACH BOTTOM ATOMIC POWER STATION—scheduled for completion late in 1963. High Temperature Reactor Development Associates, Inc., including 53 electric power and light companies in the country, have contracted for this nuclear power project at a cost of \$26 million. Employing a high temperature, helium gas-cooled, graphite-moderated, solid-homogeneous reactor system, this project represents the first application of a new high performance concept. Its purpose is to serve as an effective prototype for future full-scale plants designed to produce electric power competitive in price with conventional power.

Big things are happening throughout Pennsylvania's progressive electric industry; and there are exceptional opportunities for the capable engineering graduate to be a part of this vital movement.
