

Shelter Survey To Begin Soon

By DOROTHY DRASHER

A survey of campus buildings which could be used as fallout shelters will begin "in the middle or latter part of next week," Stanley H. Campbell, vice president for business administration, said yesterday.

University officials met yesterday with officials from HRB-Singer, engineering consultant firm, which is conducting the survey both on campus and in a 10-county area in this region.

EVERY BUILDING on campus will be investigated by the 8-man survey team, Campbell said. This does not necessarily mean that they will enter each building, he added, since some buildings can be investigated by looking at drawings of them.

Each building must meet certain specifications, one being that the building can accommodate and protect 50 people adequately, Campbell said.

Other considerations will be the type of construction, the number of floors, the material used between floors (wood, concrete, etc.) and the size of the central core (classrooms, halls, etc.) of the building, Campbell explained.

FORMS WITH this information and other details must be completed for each building on campus.

The job of surveying this campus, Campbell said, is more extensive than most of the team conducted, since there are more large buildings on campus than

in any other specific area in the county.

University officials besides Campbell attending the meeting were Walter H. Wiegand, director of the physical plant; Otto E. Mueller, director of housing and food services; Col. William G. Pelton, director of security, and J. William Wilson, administrative assistant to Campbell.

WRA Voting Regulations

Regulations for voting in the Women's Recreation Association elections were explained last night by Barbara Newman, president of WRA.

Freshman women may vote for all offices, and upperclass women may vote for all but the office of freshman representative.

Upon presentation of her matriculation and activity cards, a woman student will receive two ballots, one for Association of Woman Students candidates and one for WRA candidates. She will then sign a register. This is to prevent a person from voting more than once, Miss Newman said.

Primary elections for both AWS and WRA will be held Tuesday, and final elections, Thursday.

Ag College Given Grant

A contribution of \$200 has been made by the Pennsylvania Pest Control Association to the John Vogel Memorial Fund for support of pest control research in the College of Agriculture.

ROTC Report Presentation Delayed

No report concerning the Liberal Arts faculty proposal for voluntary ROTC program will be ready for presentation to the University Senate for at least six months, Joseph G. Rayback, chairman of the Senate Committee on Military Instruction, said yesterday.

At the informal meeting held Tuesday evening Dr. Robert G. Bernreuter, special assistant to the President for Student Affairs, said that the ROTC proposal had gone to the committee and would possibly be ready for presentation to the Senate by their March or April meeting.

"DR. BERNREUTER is very optimistic in thinking the report will be ready for presentation soon," Rayback said. "The Liberal Arts faculty had 18 months to work on the report and it will take the Military Instruction committee at least six months to investigate the report."

THE HISTORY of the Liberal Arts faculty ROTC proposal is a long one. On May 24, 1960, the liberal arts faculty passed a resolution to the effect that the military program should be made voluntary for students in the liberal arts college.

On June 2, 1960, Dean Ben E. Werna, dean of the College of Liberal Arts, submitted the report to University Senate. From the Senate, the report went to the Committee on Military Instruction for review.

The Committee returned the report to the Liberal Arts faculty

and told them that the report did not "show cause" for the proposed change.

After up-dating the report, the Liberal Arts faculty re-passed it in almost the same form on Nov. 2, 1961. In mid-January the faculty resubmitted the report to Bernreuter.
