

Trout Fishing Good In County Streams

By JOE GRATA

Male, female, beginner, amateur, and professional. When five o'clock Saturday morning draws near, anglers of all sorts will be flocking towards local streams and creeks to mark the official beginning of another trout fishing season.

Many students will probably rise well before daybreak to give their gear a last minute inspection before heading for "the old fishing hole." The sport is as old as man himself, and student enthusiasts who still practice the ancient cult should find fishing in Centre County among the best in Pennsylvania.

"All county streams will be well-stocked by opening day," said Howard Fox, superintendent of hatcheries for the Pennsylvania State Fish Commission.

THE SPECIES found in this area include the brook, brown, and rainbow trout. The minimum length is six inches, with the creel limit not to exceed eight of the combined species each day.

One of the most popular of nearby fishing spots is "Fisherman's Paradise," located on Spring Creek about six miles north of State College on the road to Bellefonte. Last year, the take-home limit was one trout per person, "but from rising costs in having to restock the stream so often," as it was put by Fox, "we've had to regulate the program."

He means that the Fish Commission has inaugurated a "Fish for Fun" program, by which no fish will be allowed to be taken from Fisherman's Paradise. Fox pointed out that no bait casting or spinning reels are to be used in this section of Spring Creek, only fly rods whose flies fill proper requirements in regard to hook size. He added that fishing is free, except that persons over sixteen are required to have a license.

"It's so easy to catch trout here," Fox said, "that even beginning girls have no difficulties."

FOX ALSO NOTED that the Lemont area of Spring Creek lies about two miles outside of State College on the road to Bellefonte.

"Pollution is hurting the fish below here," he said, "but the stream has exceptionally good fishing in the upper parts near Lemont. For the eager student fisherman, it's within walking distance of campus."

District Fish Warden Paul Antolosky of Bellefonte outlined all the trout fishing streams of the Centre County area in a recent report.

He also advised, "you'll find that fish are resting behind large rocks and logs but will venture into faster water when feeding time comes. Logs, under-cut banks, and large overhanging rocks will provide cover for fish. Good cover and an ample food supply indicate the best places to spend your time fishing."

TROUT STREAMS

BALD EAGLE CREEK—rated among best in country for large, trophy sized trout. Easily accessible entire length from Rt. 229. One of large streams in area.

SPRING CREEK—close to State College. Lemont section within walking distance of campus. Polluted in some lower areas. Fairly good fly fishing above. Spinners and night-crawlers good bait.

LOGAN BRANCH—a tributary of Spring Creek. Easily reached and near State College on Rt. 53 between Bellefonte and Pleasant Gap. Very heavily populated with brown trout.

LITTLE FISHING CREEK—noted for brook trout. Two miles south of Pleasant Gap on dirt road off Rt. 53. Worms deadly after quick rainfall.

PENNS CREEK—rated by nationally-known outdoors writers as one of the 100 best trout streams in the United States. Reached from Rt. 322, three miles east of Pottery Mills.

SMALL STREAMS in the immediate area where one will find mainly brook trout are Panther, Fields, Eddy Lick, and Wolf creeks, all of which can be reached from Rt. 144.

Track Workouts Stalled by Wind, Rain Conditions

By DENNIS KNECHT

Penn State's track team, trying to get in some hard work before the season's opening meet at Navy Saturday, fought a losing battle against the rough weather that invaded the area last week.

The Lion coaches have been holding light workouts on Beaver Field since the opening of the spring term and expected to start time trials and heavy work this week. Rain on Saturday ruined plans for trials in all the running events, but most of the field events were completed.

More rain and Monday's cold weather and high winds ruined another workout. However, coach Chick Werner was intent on seeing some results and timed his four top distance men — Gene Norman, Mike Miller, Howie Dear-dorff and Steve Moorhead — in the four-mile relay.

The weather also played havoc with the conditions of the track. Constant freezing and thawing temperatures have kept it soft and the runner's spikes have dug it up.

Navy, State's first opponent, prepared for the Lions with a triangular meet win at Quantico, Va., last Saturday. The Middies took the first three places in the shot put to roll up 70½ points against the Quantico Marines' 65 and Morgan State's 49½.

Sophomore Doug Tozour, who won the discus and hammer throws, was the only double winner for Navy. The Marines had two double winners, former Princeton star Dick Edmunds in the 220 and 440, and Gary Weisinger, former Duke ace, in the mile and two mile runs.

Sugar Ray, Downes Set For June Bout in London

NEW YORK (AP)—Sugar Ray Robinson just missed getting another world title fight as a present for his soon-due 42nd birthday, his adviser disclosed yesterday.

Instead the former welterweight and five-time middleweight king will have to celebrate with a fat purse for a 10-round bout with dethroned Terry Downes in London in late June.

If the cocky Cockney had retained his piece of the middleweight crown against Paul Pender last Saturday instead of losing it, Downes and Robinson would have fought for the title.

GEORGE GAINFORD, Robinson's adviser, and Sam Burns, Downes' manager, confirmed matchmaker Mickey Duff's an-

nouncement Tuesday that Robinson and the 25-year-old Downes have agreed in principle to the June clash in London. Some money matters still have to be ironed out.

"It would have been for the title all right," said Gainford. "That's why I was in Boston for the Pender-Downes fight. This will be real big in London anyway. Ray has a magic name overseas."

Robinson, who will be 42 on May 3 according to the record book, already has had 22 title fights in three divisions—welterweight (6), middleweight (15) and light heavyweight (1). The magnificent boxer-puncher was on the verge of taking the light heavyweight crown from Joey Maxim in 1953 when he collapsed in the 103-degree heat and couldn't come out for the 14th round.

The nicest present any "chick" could receive is a polka-dot package from BILL McMULLEN

A QUESTION TO 1962 ENGINEERING & SCIENCE GRADUATES:

Do you want to earn your living while continuing to learn?

If your answer is yes (and you didn't talk with GE when we were on campus), this message is addressed to you.

At The Knolls Atomic Power Laboratory, select opportunities are now open to hard-hitting engineering and science graduates who can qualify for one of the following work-study regimens:

KAPL-EMI PROGRAM
Openings for engineering and physics graduates. A 2½ to 3-year work-study Master's Degree Program conducted in conjunction with Rensselaer Polytechnic Institute. Offers Master's degree in field of choice — minor in Nuclear Engineering.

ADVANCED REACTOR ENGINEERING PROGRAM
Openings for holders of Master's degree or equivalent in graduate study and/or work experience. A 2-year program consisting of rotating work assignments, coupled with applied educational courses. Provides opportunity to learn reactor and power plant analysis and design through study and experience.

PROJECT TRAINING ASSIGNMENTS
Openings for engineering and science graduates with BS or MS, interested in intriguing opportunities to participate in fast paced teamwork, along with eminent engineers and scientists who help produce nuclear propulsion for surface and submersible naval vessels. Virtually every engineering and scientific discipline is represented in KAPL work.

Selection of candidates is now in progress. For further details, write (including your resume) to Mr. G. L. Smallwood—

This one goes to the head of the class—with the lowest wagon price in the U. S., the highest honors for top gas mileage, and the longest years of high resale value among all compacts. That's the Rambler American Deluxe 2-Door Wagon for you. And when you consider its clean, crisp styling that lives so smartly with the years (we don't make drastic changes merely for the sake of change), you really have a good and handy thing going for you. Try it on all counts—at your Rambler dealer's.
