FIVE CENTS

Miller Appointed U.S., U.K. Orbit Satellite To USG Court

By ROCHELLE MICHAELS

The first of two appointments to the Undergraduate Student Government Supreme Court was approved by the USG Congress last night.

Richard Miller, sophomore in arts and letters from Harrisburg, was approved by Congress without discussion after being named to the post of USG President Denis Foianini.

A SECOND Foianini appointment to the court, Fred Good, sophomore in business administration from New Holland, was rejected by a voice vote because he is presently a member of Congress. Good represents the fraternity area in Congress.

John Witmer (fraternity area) said he did not approve of a member of Congress sitting on the Court because "the judicial branch is a check on the legislative and they should be kept separate."

Witmer suggested that Good resign before his appointment was considered further, but Good did not reply to this suggestion.

THE CONGRESS also discussed and approved a report by Kurt Simons, editor of the USG newspaper.

Simons said that the first issue of the USG Record, which was distributed yesterday, had cost only \$50 for 3,000 copies. It was previously estimated that it would cost \$50 for 2,000 copies.

In discussing the newspaper, Lois Affleck (Pollock) said she thought an editorial on the role of USG which appeared in the paper was in poor taste since the

Record's purpose is to promote good public relations.

Bruce Harrison (town area) disagreed with Miss Affleck, saying, "It (the editorial) is the truth about us—why doesn't it belong in our paper?"

NO DECISION was reached after a half-hour discussion and Simon's report was adopted without amendment.

The following were absent from the meeting: Kent Fuller (town area), Katherine Johnson (South Halls), Harry McHenry (town area), Thomas Paton (fraternity area), Randall Scheib (town area) and Allan White (West Halls).

Voter Percentage Nears Goal As 1,450 Cast USG Ballots

By WINNIE BOYLE

As 1,450 additional students went to the polls yesterday, the Elections Commission moved nearer its goal of a 40 per cent turnout of eligible voters in the Undergraduate Student Government elections. When polls closed last night, 25.7 per cent of the eligible student body had voted.

ALLEN FEINGOLD, elections Commission chairman, said Wednesday that 1,927 students had voted the first day of elections. Last night he said that he had later discovered four additional sheets of voters' signatures and ballot numbers. This discovery raised the first day's total to 2,057. The 3,507 students who have thus far cast their ballots represent approximately 25 per cent of potential voting student body.

Commenting on the floating polls which circulated last night

CAPE CANAVERAL, Fla. (AP)—The United States and the United Kingdom teamed together yesterday and launched a scientific satellite.

This feat, coupled with a joint U.S.-Japanese rocket launching at Wallops Island, Va., signaled a new era in international space cooperation.

The two firings came amid these other developments:

• America's spacecraft Ranger 4 crashed-landed on the far side of the moon after a 64-hour, 231,486 mile journey through space.

• The Soviet Union announced

the launching of their fourth Sputnik in six weeks. The new earth satellite, Cosmos 4, was described by the Russians as packed with instruments to measure radiation and other space-probing gear.

• The U.S. Air Force fired two mystery satellites a few hours apart from Point Arguello, Calif. The first employed a Blue Scout booster combination. These have been used for high-altitude research.

THE SECOND had an Atlas-Agena B booster, such as have been used for the Samos military reconnaissance satellite series and for the Midas missile alarm satellite series. Other details were kept secret.

British Prime Minister Harold Macmillan, visiting in the United States, is expected to announce a name for the British-U.S. satellite launched from Cape Canaveral.

Meanwhile, it was known by its program number, S51. British newsmen dubbed it UK1, for United Kingdom.

The gold-plated satellite was boosted into orbit by a Thor-Delta rocket—the most reliable U.S. booster—which scored its eighth satellite-launching success in a row.

Jubilant officials of both countries announced the 132-pound payload was in orbit when a tracking team at Cape Canaveral picked up signals from it after it completed one two-hour whirl around the world.

The 23-inch cylinder, bristling with solar cell panels, experiment booms and antenna, was sent aloft to explore the ionosphere and cosmic radiation.

THE ANGLO-AMERICAN effort may speed the time when the two great powers—the United States and the Soviet Union—combine their talents for manned and unmanned exploration of the universe.

President Kennedy and Premier Khrushchev have exchanged messages on the subject since the successful orbital flight of American astronaut John H. Glenn Jr. in February.

through the town area, Feingold said: "I think that tonight a new idea was inaugurated and it came off smoothly."

This is the first time an Elections Commission has taken polls to the voters through a floating poll system.

He said the new method was successful enough to continue next year, but he added that he thought elections could be condensed into a two-day period rather than the present three days of voting.

THE FIRST DAY, he said, there could be a rally to vote on campus, while on the second there could be a rally off-campus. He said he felt just as many students would vote if this type of election procedure were adopted.

The floating polls were successful, but they were a "limited success," Feingold said. They would have been even more suc-

cessful, he added, if there were more loudspeakers, more cars and more lighting on the cars.

He said he expects a heavy day of voting today since it is a full day of classes. Students will realize it is their last chance to have a voice in determining their student government leaders for the remainder of this year and next year, he added.

Hot Weather to Continue

By JOEL MYERS

The mercury came within three degrees of April's all-time high temperature record yesterday afternoon when the temperature touched 87 degrees at the University weather station.

Bright sunshine and unseasonably warm weather is expected again today and the University thermometer may approach 90 degrees, which is the highest April temperature ever recorded in the State College area.

NEARLY PERFECT weather is forecast for tomorrow evening's carnival. Skies should be mostly clear and temperatures will be pleasantly warm.

After reaching the upper 80's under partly cloudy skies tomorrow afternoon, the mercury is expected to fall slowly. At sunset the temperature is expected to be near 75 degrees. It should continue

falling slowly through the evening hours, but it will probably remain above 67 degrees until midnight.

Clear skies were also observed at last year's carnival, but temperatures were near record-minimums for the season instead of record maximums.

GUSTY NORTHWESTERLY winds and temperatures in the upper 30's forced most carnival patrons to wear jackets and overcoats.

Since the weather pattern across the United States has become nearly stagnant, little day-to-day change is expected until Monday or Tuesday.

An increasing southwesterly flow of moist air should cause the humidity to begin increasing tomorrow, and a slow increase in cloudiness is forecast to begin tomorrow afternoon.

Contenders for 'Miss Penn State,' He-Man, Queen of Hearts Named

Barbara Isaacson, Linda Krumboldt, Billie Dee McIlroy, Carole Wagner and Allison Woodall were chosen as the finalists for the Miss Penn State contest late Wednesday night.

THE FIVE finalists will attend a banquet next Tuesday at the Nittany Lion Inn where they will meet the contest judges, Carol Connelly, chairman of the contest, said.

The finalists will also be interviewed by Laurence H. Lattman, emcee at Tuesday's Awards Night, at 8 p.m. in Recreation Hall. The queen will be crowned that night by Mrs. Eric A. Walker.

Miss Isaacson was sponsored by Phi Sigma Sigma and Sigma Chi; Miss Krumboldt by Kappa Alpha Theta and Phi Gamma Delta; Miss McIlroy by Delta Gamma and Phi Kappa Psi; Miss Woodall by Chi Omega and Beta Theta Pi; and Miss Wagner by Pi Beta Phi and Phi Delta Theta.

The contestants were judged on activities and scholarship plus the interview conducted Wednesday night.

In other Spring Week activities, Thea Gerber, Sarah Shultz, Marilyn Sauer, Rosalyn Ewan and

Deborah Salzburg were named as finalists of the Queen of Hearts Contest last night.

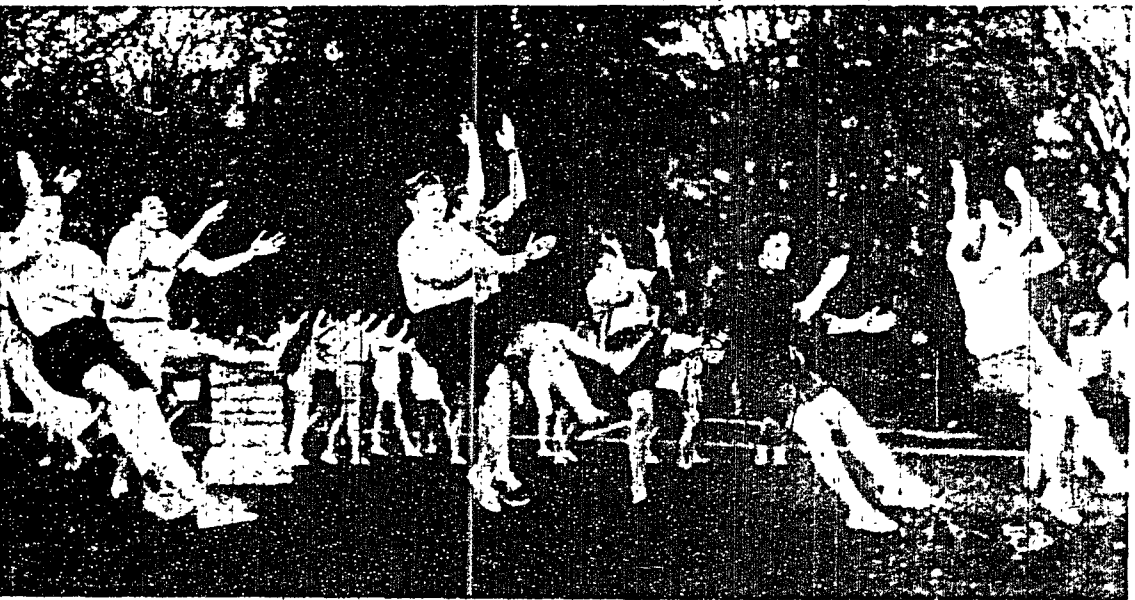

Eugene Rinkus, William Caulauris, Bud Williams, Morton Cross and Charles Hilbish were named the finalists for the He-Man contest also held last night.

THE SPRING WEEK partners of the finalists of the Queen of Hearts contest and the He-Man contest are eligible to compete in the finals scheduled for 2 p.m. Sunday on the Hetzel Union lawn.

The partners are: Miss Gerber of Kappa Alpha Theta and Robert Cole of Delta Chi; Miss Stultz, Alpha Omicron Pi, and William Semmel, Delta Chi; Miss Sauer, Delta Delta Delta and Edward Lewis, Sigma Alpha Epsilon; Miss Ewan, Simmons Hall and David Maize, Kappa Sigma; and Miss Salzburg, Delta Phi Epsilon, and Howard Hughes, Theta Xi.

Jenaud Schwartz, Phi Mu and Rinkus, Kappa Delta Rho; Jane Hoffman, Delta Gamma, and Chulauris, Phi Kappa Psi; Margie Wellener, Ewing, and Williams, Alpha Zeta; Rochelle Sakoleky, Sigma Delta Tau, and Cross, Phi Epsilon; Pi; and Carol Mowers, Atherton Hall West, and Hilbish, Town Independent Men.

2 A.M. Permissions
All coeds will have 2 a.m. permissions tomorrow night. Coeds will have regular 1 a.m. permissions tonight.

Top — HOPES JUMP HIGH as cheerleading practices begins on the lawn of Old Main. From this group the finalists will be chosen who will go on to compete for the freshman positions.

Bottom — A CHILDREN'S LITERATURE class on Ag Hill escapes from the warm buildings to the breezy lawns as the afternoon's temperatures soar.
