## Schulman to Select 90 Students For Encampment at Mont Alto

A select group of outstanding student leaders is the aim of Melvin Schulman, Encampment chairman, for the 1962 Fall Encampment, to be held Sept. 12-14 at the Mont Alto Center.

Applications are now available at the Hetzel Union desk and are due Friday. From the applications received, 90 students will be chosen to attend, Schulman said. Thirty members of the faculty and administration will also be in attendance, he said.

He explained that there will probably be a ratio of 2-1, men to women. The reason for this is that there are two residence halls at Mont Alto, one which houses 74 (where men will stay) and the other which houses 36 (where the women will reside for the three-day period).

FIVE WORKSHOPS will be held at which various student

problems will be discussed. Recommendations from the workshops will be made concerning University policies in the coming year.

Topics for discussion within the workshops include on-campus problems, off-campus problems, the judicial system, the four-term system, and the Undergraduate Student Government.

Schulman said the workshop chairmen will be named by the end of this week, and encampment applicants will be interviewed probably the latter part of next week.

IN PLANNING the affair, business manager Paul McPherson will be working under the USG-allocated budget of \$1,000.

Last year Encampment was held at University Park in order to allow more students to attend.

## Veon Named '62 Editor Of Business Yearbook

Dorothy H. Veon, professor of education, is the editor for the 1962 Yearbook for American Business Education, published by the National Business Teachers Association and the Eastern Business Teachers Association.

The yearbook directs its attention to business education with a future, incorporating trends evidenced by changes in manpower, technology and curricu-

lum improvement. It will be released May 20.

## Leete to House Ag Library

The main part of the Agricultural Library, now housed in Patterson, will be moved to the basement of Leete this summer, Ralph W. McComb, University librarian, said recently.

The move is due to planned remodeling of Patterson.

# Student Kills Snake Near Whipple's Dam

One voyager to Whipple's encountered more than pleasure Sunday night when he came face-to-face with a 3-foot rattlesnake.

Gerald Logue, senior in engineering science from Parker, was driving home slowly from a picnic in the Whipple's area when he heard the snake "strike against the side of the car."

"The window was open and when I heard the thump, I thought it might be a snake," he said.

Logue said that when he heard the noise, he stopped the car, got out, picked up a stick and stunned the snake with the stick.

"Then I cut off its head with a machete which I had used to cut wood at the picnic," he said.

Logue said that the snake was apparently a young one because of its unusually short length and because it only had eight rattles.

He said that he took the rattlesnake home in the trunk of his

car and later skinned it. The only problem now, he said is what to do with the skin in order to keep it.

Logue said that he fried the meat yesterday and added that "it tasted pretty good."

He said that it was the first snake that he had ever killed and he has also kept the rattles.

Fred B. Lonberger, ranger in the Bear Meadows section, said that rattlesnakes are not common around Whipple's.

He said that snakes come down from Greenlee Mountains because of the hot weather.

"We ordinarily see only one snake every two or three years," he said, "and we are more apt to see them in July or August."

Another ranger, commenting on the snake situation, said that the area around Whipple's was rattlesnake country but that it was "nothing to be alarmed about."

## Language Programs Discussed

A major effort must be made to install long-term language courses in elementary and high schools,

William B. Edgerton, Chairman of the Indiana University Department of Slavic Languages, told a conference of Pennsylvania Teachers of Russian on Saturday.

"In the Soviet Union students spend six years of study on one language," Edgerton said. "This country is lagging behind others in making language learning available to students in its educational systems," he added.

The conference, which was sponsored by the Department of Slavic Languages included panel discussions and demonstrations on elementary and post-elementary levels and special reports on teach-

ing materials and language laboratories.

"The very fact of this conference is a striking indication of the rapid growth of Russian in Pennsylvania and the nation," Thomas F. Magner, professor of Russian and director of the conference said.

"Ten years ago Russian was taught only in the major universities. Today it is spreading rapidly and is now taught in 50 high schools and practically all the colleges in Pennsylvania," he said.

The University has one of the largest Russian enrollments—300 students—in the country, he added. This is greater than many of the major universities, Magner said.
