

U.S. Blockades Cuba

The Daily Collegian

FOR A BETTER PENN STATE

VOL. 63, No. 24 UNIVERSITY PARK, PA., TUESDAY MORNING, OCTOBER 23, 1962 FIVE CENTS

RIGHT HALFBACK Frank Hershey, making his first start of the season, takes a pitchout from Penn State quarterback Pete Liske (24) and sets out around left end. Leading inter-

ference are Liske, Roger Kochman (46) and fullback Dave Hayes (34). The play, early in the first quarter, was good for three yards.

Nittanies Edge Syracuse On Late Touchdown Drive

By JOHN MORRIS

Sports Editor

All in all, this was a highly typical Penn State-Syracuse football game.

A continuation of one of the most exciting and closest football series in the country, the Nittanies' 20-19 victory over the Orange was as close as the score indicates.

What started out as a rout for Rip Engle's Lions quickly turned into a spine-tingler that had all 48,920 fans that jammed Beaver Stadium sitting on the edge of their seats.

AS THE TREMENDOUS Homecoming crowd cheered delightedly, the Lions jumped off to a 14-0 lead in the first five minutes on two perfectly executed plays.

But the Nittanies saved their finest efforts for the fourth and deciding quarter.

The Orangemen of Syracuse

slugged away at the large State line and assumed a 19-14 lead about half way through the last quarter.

Then came the Lions' greatest moment. On the brink of their second straight defeat, the Nittanies drove 58 yards in eight plays to clinch the win.

"That was a great fourth quarter effort," Engle declared as the smoke of battle lifted. "The boys really came through."

Quarterback Pete Liske got the Nittanies' scoring started when he grabbed a Syracuse fumble in mid-air on the Syracuse 43-yard line.

The Lion signal-caller whipped an 11-yard pass to halfback Frank Hershey to put the ball on the Syracuse 32.

On the next play, All-American halfback candidate Roger Kochman took a handoff from Liske, veered to the outside and waltzed

into the end zone untouched. Ron Coates' conversion made the score 7-6.

Following the kickoff, Syracuse quarterback Walley Mahle faded to pass and lofted a beautiful spiral right into the arms of Hershey on the Penn State 47.

Hershey, in his first starting assignment of the year, returned the ball to the Syracuse 41-yard stripe.

Two plays gained nine yards before Liske faked out the entire Syracuse team with a beautiful bit of deception and hit Kochman all alone around the ten-yard line. Again Kochman scored unmolested and Coates' conversion made it 14-0.

THE NITTANIES regained possession of the ball moments later on a short Syracuse punt to Liske on the Orange 48.

The Lions drove down to the Syracuse 18 before the Orange stiffened and Coates attempted a field goal. The kick was wide to right. The missed kick seemed unimportant at the time, but hardly anybody in the howling crowd expected the Orange to come back.

Early in the second quarter Syracuse started to move. Start-

Two Spectators Die During Game

The deaths of two fans marred the Homecoming festivities at the Penn State-Syracuse game Saturday.

Robert B. Bird, 56, of Shamokin, collapsed under the stands at halftime. He was taken to Rite-nour Health Center where he was pronounced dead on arrival. Bird had a history of heart trouble and died of a heart attack. W. Robert Neff, Centre County coroner, said last night.

Bird was circulation manager

of the Shamokin News-Dispatch.

Gerald V. George, 46, of Erie, father of Jerry George (8th-arts and letters-State College) died on University Drive while walking to the game. A field engineer for the Greenleaf Corp. in Pittsburgh, George's death was also due to a heart attack, Neff said.

Fourteen people were treated in the first aid room at Beaver Stadium and an additional five persons were taken to the health center for treatment.

HOMEcomings FESTIVITIES this weekend included a special salute to Homecoming Queen Shirlee Benjamin during halftime activities Saturday at the football game.

JFK Warns Nation Of Soviet Offensive

WASHINGTON (AP) — President Kennedy proclaimed a U.S. naval blockade against Cuba last night, saying the Soviets have started to turn Cuba into an offensive military base capable of raining nuclear destruction on all the Americas.

A defense department spokesman says the United States is ready to sink any communist bloc ship headed for Cuba, which refuses to stop and submit to search under the arms blockade. He said this country's blockade fleet, now being deployed, will order any ship of any nation obviously bound for Cuba to stop and undergo search by a boarding party — using force if necessary.

SAN JUAN, Puerto Rico (AP)

—The U.S. Navy announced last night that more than 40 ships and 20,000 men originally scheduled to participate in maneuvers near here now are sustaining the blockade of Cuba.

Speaking grimly to the nation in a suddenly called radio-television broadcast, Kennedy said the United States would wreak "a full retaliatory response upon the Soviet Union" if any nuclear missile is fired on any nation in this hemisphere.

Kennedy reported that within the past week the United States has received unmistakable evidence that—contrary to Soviet assurances—nuclear-type long-range missile sites and atomic-capable Soviet jet bombers are being established in Cuba.

Kennedy uttered what seemed an implied warning that the United States may have to bomb offensive sites in Cuba if the buildup continues.

And the President cautioned the

Soviets that, if they react by aggression somewhere else in the world, they "will be met with determination."

"ANY HOSTILE move anywhere in the world against the safety and freedom of peoples to whom we are committed—including the brave people of West Berlin—will be met by whatever action is needed," he said.

He emphasized, both in his prepared text and in his delivery, that the steps he was ordering now were only "initial" ones.

KENNEDY ACCUSED the Soviet Union and its foreign minister of lying in denying that Cuba was being transformed into a base capable of launching "weapons of sudden mass destruction."

Kennedy said the only purpose of a series of offensive missile sites that have been established in Cuba can be "to provide a nuclear strike capability against the Western Hemisphere."

Two distinct types of installations have been detected, he said. Several of them, he said, include medium-range ballistic missiles that could send a nuclear warhead more than 1,000 nautical miles—to such places as Washington, the Panama Canal, Cape Canaveral, Mexico City, or any other city in the Southeastern United States, Central America or the Caribbean area.

THE SIZE of the undertaking, he said, makes it evident that it was planned months ago. Yet only last month, Kennedy said, the Soviet government stated publicly, on Sept. 11, that the armaments sent to Cuba were designed exclusively for defensive purposes. "That statement also was false."

Snow Flurries Predicted Tonight

A winter-like arctic air mass is forecast to overspread Pennsylvania today, bringing snow flurries to this area tonight.

STRONG and gusty northwesterly winds will transport the Canadian air into the area, and temperatures should fall steadily during the day. A high of 52 is expected before noon.

Heavy snow squalls may deposit 2 to 5 inches of snow in northwestern Pennsylvania tonight, but little or no accumulation is expected locally.

Hurricane Ella moved out to sea Saturday without seriously damaging any part of the east coast. Although the mammoth tropical storm did not have any direct influence on the local weather, her movement into high latitudes helped to effect a major

change in the Northern Hemisphere's atmospheric circulation.

The new pattern favors very cold weather in the eastern states. Temperatures should average well below normal throughout the northeastern states this week.

Today should be mostly cloudy, windy and colder with light showers. As temperatures fall during the late afternoon, the showers may become mixed with snow flurries.

A mixture of snow flurries and light showers is seen for tonight. Temperatures will be much colder, and a low of 34 degrees is expected.

CONSIDERABLE amounts of cloudiness and chilly temperatures are seen for tomorrow. A high of 52 is expected.

A low of 29 degrees is forecast for tonight.

Froth Defends Position Today

By WINNIE BOYLE and AL BUTKUS

Froth representatives will be given adequate time to present their answer to the charges made against the magazine, George L. Donovan, chairman of the committee which is to determine the magazine's future, said yesterday.

Before the charges were officially presented by the dean of women and the dean of men at last week's initial meeting, a time limit of 20 minutes apiece for presentation was set. Donovan said yesterday, however, that if the time limit had to be extended for additional evidence, it would be if the request was within reason.

THE COMMITTEE on Student Organizations will reconvene at 8:30 a.m. today to hear Froth's answer to the charges made last week by Dorothy J. Lipp and Frank J. Simes. They have charged that the magazine has been publishing jokes and stories which were of a "salacious, irreverent, and libelous nature."

At the conclusion of the charges, they asked that the humor magazine's charter be suspended because it can not "continue to represent the University under whose name it is published."

The Undergraduate Student Government Student Opinion Bureau may conduct its first survey tomorrow night, Susan Krauss, chairman, said last night.

Approximately 1,000 students would be called and asked their opinions on the controversy concerning Froth, campus humor magazine, Miss Krauss said.

A minimum of 60 persons are needed to work on the survey, she said. All students who are interested in helping to conduct the poll should call Miss Krauss at UN 5-4380 before 11 p.m. tomorrow.

After being presented with these charges, the Froth editors and advisers asked additional time to prepare an adequate answer. The committee adjourned.

Donovan said yesterday that a

definite decision would be made today and he expressed the hope that the committee would be able to begin considering its decision by 10:30 a.m.

At any time during the hearing, either side may present additional evidence for the committee to consider, Donovan said.

He said that if Froth did submit the petitions that have been circulating since the editors were told they would have to appear before the committee, the documents certainly would be considered.

Before the initial hearing, Andrea Buscanics, co-editor of Froth, said she had several petitions with approximately 2,450 signatures, supporting Froth's continued publication. Last week she said she would present these and any other petitions she received to the committee today.

Robert M. Pockrass, Froth literary adviser, said he has prepared a seven-page statement in which possible solutions to the situation are proposed.
