

THE LADY AND THE GUITAR: Kathleen Kaharick (4th liberal arts-Johnstown) plays her guitar at the Folklore Society Sunday evening in the Hetzel Union Building.

Campbell Interview

Armory Space Needed

The razing of the Armory is necessary to provide space for additions to Willard and Electrical Engineering, Stanley H. Campbell, vice president for business administration, said Friday.

Campbell said the Armory occupies prime classroom space in the center of campus. The Board of Trustees' Committee on the Physical Plant has decided to build new classroom structures in this area for the convenience of students, he said.

CAMPBELL USED a wall map to show how the Armory would block the future additions.

The east face of Electrical Engineering, when it is constructed, will be on the site now occupied by the southern portion of the Armory. The Willard extension is to be built to the south. There is no other direction in which the proposed additions could be built, he said.

To make the Armory a useful structure, even for an exposition hall as has been advocated by two architecture students, would probably cost about as much as

to build a new building, Campbell said.

David Mitchell and Wilson Pollock, fifth-year architecture students, submitted a proposal to use the Armory as an exposition hall to The Daily Collegian on Wednesday.

In reply to their statement that the Hetzel Union gallery "is most inadequate" as an exposition hall, Campbell said the exposition area may be enlarged when the HUB undergoes expansion.

The two students also asked: "What does one do with older buildings when they appear to

have outlived their original purpose? Should they be thrown away without a second thought, or should they be investigated for their present potential and possibilities?"

IN REPLY, Campbell said the trustees' committee had considered possible uses of the Armory, but they conflicted with the University's expansion plans.

He also said that the Board of Trustees had decided that certain areas, such as the Mall, will be kept in their present state. No construction will be permitted in the areas so designated.

L.A. Council to Sponsor Model U.N. in February

The first Model United Nations General Assembly on this campus will be sponsored by the Liberal Arts Student Council during the weekend of Feb. 1, 1963.

Over 1,000 students are expected to participate in the assembly, which is being held to promote a better understanding of the roles, functions and aspirations of the United Nations, as well as to create an appreciation for its work.

The weekend will begin with a meeting in Schwab of the General Assembly, which will be addressed by a speaker, as yet unannounced.

ON SATURDAY, the delegates will meet in five committees to discuss such topics as disarmament and the question of Cuba (political committees), technical assistance programs to the world's underdeveloped areas (economic and financial committee), the question of Southwest Africa (trusteeship committee) and the re-organization of the Secretariat (administration and budget committee).

An "International Night" of relaxation will follow the committee meetings, and the weekend will culminate on Sunday with another meeting of the General Assembly. At this time, the delegations will vote for or against the committee resolutions.

Applications for both individuals and organizations interested in participating in the Model General Assembly are now available at the Hetzel Union desk and are due by Nov. 2. Applications are being distributed personally to various

campus organizations, and there are two types of individual applications which may be picked up at the HUB desk.

ONE TYPE of individual application is for those wishing to form a group to represent a particular country; the other is for individual students wishing to be part of specific delegations.

Delegations will consist of five members and from three to five alternates. A delegation fee of \$5 is to be enclosed with each group application.

La Vie Receives Honor in Yearbook Competition

The 1962 La Vie received an honor score of "A" in the annual competition of the National School Yearbook Association in Memphis, Tenn.

The book received special mention for the "Campus Life" section. Photographs for this section were the work of photography editor Charles Jacques (Natrona Heights), who co-edited the book with Diane Gimber (Norfolk, Va.)

The art work and main dividers, done by art editor Mary Latta (Pittsburgh), also received special mention.

Euwema to Edit Journal

Ben Euwema, dean of the College of the Liberal Arts, has been named managing editor of the Journal of General Education.

He succeeds Howard A. Cutler, now academic vice president of the University of Alaska.

Parker Monster Rally Contest Sponsored by Block 'S' Club

By TONY FOGLIO

All kinds of lists of names are circulating on campus—lists aimed at saving Froth from itself and the administration, lists aimed at saving the Armory and now lists aimed at winning a contest—a monster rally contest.

THE BLOCK "S" Club, known for pep rally sponsorship and its card section work at football games, has gone into the name-collecting business for the duration—that is until Nov. 9, when the contest ends.

To get into the contest, Block "S" first brought three Parker Arrow pens—a requisite for

entering. It now has to use these names to qualify for first prize.

To be considered eligible for competition, the list must contain at least 200 signatures. Contest rules state "the names need not be perfectly legible and we'll even accept artful aliases."

When one considers that only 20 first prizes will be awarded and that there are hundreds of colleges and universities in this country, one gets a general idea of how many a "sufficient number" is.

Cheerleader Lillian Leis hopes to get enough signatures by strategic use of the pens. They will be available during the day at the Hetzel Union desk. At other times,

the lists will be circulated at pep rallies and football games as well as in dining halls, residence halls and fraternities.

FIRST PRIZE, is a monster rally kit. The kit contains one bull horn, 20 megaphones, 50 noisemakers, 60 yards of bunting, 300 blank buttons ("fill in your own cause") and one "do-it-yourself effigy... a baldheaded store dummy who can look like almost anybody."

Miss Leis said there is no reason why people should not sign.

"After all, it will only benefit the students and the University if we do win the prize," she said. Block "S" plans to use the kit in future pep rallies.

Theater Ticket Sale Continues

Season tickets for campus drama productions are now being sold in Schwab by the Department of Theater Arts. Ticket orders may also be made by calling UN 5-6309.

The tickets, which sell at a reduced rate of \$1.50 for five performances, may be used by five people for one performance or in any combination of five plays and performances. Walter H. Walters, department head, explained. Regular tickets sell at \$1 for Monday through Thursday performances and \$1.25 for weekends.

"The Egg," a satiric comedy by Felicien Marceau, will open the season Thursday at Center Stage

and will continue until Nov. 3. Richard Sheridan's "The Rivals" will play Nov. 15-17 in Schwab.

During the winter term, Center Stage will have "The Fantasticks," from Feb. 7-16. "The Visit" will be presented in Schwab on Feb. 28 and March 1-2.

Two arena-style plays will be performed at Center Stage this year, two in Schwab and one in the Pavilion Theatre next May. Center Stage productions will run nine consecutive evenings (with the exception of Sunday) this year instead of successive weekends as in the past.

Ambrosius Reappointed

Edgar E. Ambrosius, professor of mechanical engineering, has been appointed to another five-year term as a member of the American Society of Mechanical Engineers Research Committee on Fluid Meters.

He has been serving on the committee since 1945.

Discuss Current Openings with RAYTHEON

CAMPUS INTERVIEWS
November 2, 1962

See your placement director now to arrange an interview with the Raytheon representative.

Raytheon offers challenging assignments for BS and MS candidates in EE, ME, Mathematics and Physics. Openings are in the areas of:

RADAR, INFRARED, MISSILE & SPACE SYSTEMS, COMMUNICATIONS & DATA PROCESSING, SOLID STATE, SONAR, ELECTRON TUBE & COMPONENTS TECHNOLOGY, MICROWAVE ELECTRONICS, MANUFACTURING & FIELD SERVICE ENGINEERING

Facilities are located in New England, California and Tennessee. If an interview is not convenient on above date, forward your resume to Mr. G. W. Lewis, Manager of College Relations, Raytheon Company, Lexington 73, Massachusetts.
