

Kappa Alpha Psi Tries to Reactivate

Kappa Alpha Psi, national social fraternity, is making efforts to reactivate its Delta Theta chapter at the University, Robert Grantham, one of the three active undergraduate members on campus, said recently.

The Delta Theta chapter became inactive in 1958 because it lacked the minimum 12 members required of student organizations by the University, Wilmer E. Wise, assistant to the dean of men in charge of fraternity affairs, explained.

Efforts to reactivate are backed by the Delta Theta alumni chapter

of the National Grand Chapter, Grantham said.

THE LOCAL group has planned several activities for the future, Grantham said. Smokers will be held to acquaint rushees with the history, aims and purposes of the fraternity, he said. The first smoker is scheduled for Nov. 17.

In December the local chapter will present an evening with Ray Charles at the Latin Casino in Cherry Hill, N.J., to raise money for a scholarship fund, Grantham said.

Kappa Alpha Psi also presented an orientation program early in

September in Philadelphia for all students interested in attending the University, he said.

GRANTHAM said interest in the national chapter has been maintained through association with neighboring chapters in the Philadelphia, Harrisburg and Pittsburgh areas and the District of Columbia. The local group has been represented at provincial conferences, he added.

The principles of the fraternity are service, promoting the welfare of all mankind and encouraging achievement in all fields, Grantham said.

Discipline Concerns Education, Simes Tells OSGA Delegates

The dean of men's office and the men's tribunals are not solely concerned with punishment itself but are interested in educating the student who has misbehaved, Dean of Men Frank J. Simes said Saturday.

In an address to the Organization of Student Government Associations, Simes said that in a high majority of cases, disciplined students say they received fair treatment and were aided in the education process.

"The important part of dealing with discipline cases is the concern for the student as an individual.

The purposes of discipline are to help the student improve his self-control as well as realize the reasons for his actions, and to show him that he is responsible for the consequences. The whole process, Simes added, must be administered in a way that is in accordance with modern methods.

if...

You have (or will have) your Ph.D. or Master's Degree

YOU MAY FIND THAT A MOVE TO MARTIN WILL BE A MOVE UP IN YOUR CAREER... A MOVE AHEAD TOWARD SIGNIFICANT ACCOMPLISHMENT

Important Martin positions for PHYSICISTS, ENGINEERS, APPLIED MATHEMATICIANS and SCIENTISTS with advanced degrees in:

AERONAUTICAL OR ASTRONAUTICS

- Dynamics Analysis
- Magneto-hydrodynamics
- Flatter, Turbulence
- Fluid Dynamics
- Wave Phenomena
- Re-entry Heating Problems
- Hyperonic-Rarefied Gas Flow

CIVIL

- Elasticity and Plasticity
- Random Loading
- Plate and Thin-shell Structures
- Experimental Stress Analysis of Structures at Elevated Temperatures

CHEMISTRY (Physical-Organic)

- Non-equilibrium or Aero-chemical aspects of very high-speed flight
- Radiochemistry
- Hi-temp chemical reactions
- Solid State Devices
- Kinetics of reaction
- Plastics

ELECTRICAL OR ELECTRONICS

- Data Processing
- Solid State Circuitry
- Infrared
- Microwave
- Guidance & Navigation
- Visual Presentation Systems
- Cryogenics
- Propagation Problems
- Command & Control
- Plasma Microwave Interactions
- Energy Conversion (Thermoelectric)
- Information Theory
- Semi-Conductor Studies
- Advanced Communication Systems Studies
- Automatic Control Systems
- Aerospace Vehicle Electrical Power Distribution Systems

PHYSICS, NUCLEAR PHYSICS & SCIENCE

- Energy Conversion (Thermionic & Magneto-hydrodynamics)
- Electron Optics
- Infrared
- Cryogenics
- Acoustic Power Prediction
- Advanced Reactor Studies
- Underwater Acoustics
- Thinfilms
- Radioisotope Fueled Generator Development
- Wave Propagation in Solids
- Plasma Microwave Interactions
- Guidance & Adaptive Control Processes

PROPULSION & THERMODYNAMICS

- Fluid Dynamics of multi-phase gases
- Liquid Rocket Studies
- Advanced Space Propulsion Systems
- Mechanical Aspects of Advanced Reactors
- Radiation heat transfer problems
- Environmental Systems (ultra-high vacuum)

MATHEMATICS (Applied)

- Classical Mechanics
- Orbital Mechanics
- Systems Evaluation of Reactors
- Theory of Dynamic Programming
- Systems Optimization & Nonlinear Methods
- Digital Logic & Adaptive Processes
- Random Signal Theory Studies
- Interplanetary Trajectories

METALLURGY

- Hi-temp Materials
- Solid-State Devices
- Advanced Welding Joining Techniques
- Effects of Metallurgical Structures (Creep & Stress Rupture behavior of super-alloy and refractory metals)

EXPERIMENTAL OR INDUSTRIAL PSYCHOLOGY (Ph.D.'s Only)

- Control-Display Research
- Decision-Making Studies
- Human Factors Field Evaluation & Analysis of Results

ON-CAMPUS INTERVIEWS NOVEMBER 7, 8 and 9

Please contact your College Placement Officer for an appointment. If you are unable to attend the interview, write to: J. J. Krstovic, Director, College Relations, Martin Company, Baltimore 8, Maryland.

MARTIN COMPANY

The Aerospace Division of **MARTIN**  **MARIETTA**
