## Student Killed In Cycle Mishap

By TONY FOGLIO

Paul E. Zock, Jr. (10th-mechanical engineering-Warren) was killed about 3:30 p.m. yesterday when his motorcycle went out of control and collided with a dump truck at W. College Avenue and N. Barnard Street. Police said it was the first fatality in the borough since Oct. 7, 1947.

The truck driver, Joseph S. McClellan, was driving west on College Avenue when he said he saw the motorcycle jump the curb at the intersection. The motorcycle then hit the right door and step of the truck. McClellan was unhurt.

W. Robert Neff, county coroner, said death was apparently instantaneous and due to a broken neck, fractured skull, crushed chest and other injuries. The coroner said there would not be an autopsy.

Two witnesses to the accident, C. D. Slagle, 439 W. College Ave.,

and Robert Sprankle, 120 N. Barnard St., said that Zock tried to jump off the cycle when he realized he couldn't control it.

Zock had difficulty in starting it when he left his apartment at 439 W. College Ave., they said. He lost control of the motorcycle after turning in to Barnard Street from his parking lot, they added. He jumped the curb on the west side of the street and collided with McClellan's heavily-loaded truck.

DAVID GETTIG (10th-mechanical engineering-Birch), one of Zock's three roommates, said that the motorcycle Zock was driving belonged to Dale Schmidt (7th-mechanical engineering-Somerset), another roommate.

Zock, who would have been 22 years old on Jan. 22, graduated from Warren High School in 1958. He attended Behrend Campus in Erie for three semesters, and transferred to University Park in the summer of 1961.

Gettig said Zock was a member of the American Society of Mechanical Engineers and was to be initiated into Pi Tau Sigma, the mechanical engineering honorary society.

Paul E. Zock, Jr.

## Lions Host Terps In 'Must' Game

By JOHN MORRIS  
Sports Editor

Penn State hosts Maryland in Beaver Stadium this afternoon at 1:30 in what ranks as a "must" game for both teams.

The Lions and Terps sport identical 5-1 records going into this afternoon's clash and several post-season bowls have shown more than a passing interest in both teams.

Scouts from the Cotton, Orange and Gator Bowls are expected to be on hand to witness today's game. The winner could very easily land in any of these annual extravaganzas.

Coach Rip Engle's Lions have an added incentive to win. The Nittanies still remember Maryland's 21-17 victory at College Park last year and are determined not to let it happen again.

IN THAT GAME, Maryland quarterback Dick Shiner led the Terps to three early scores and

then the defense took over to hold the Lions in check the rest of the way.

Shiner, a junior, is at the controls again this season and his presence in the lineup makes Maryland one of the best passing teams in the country.

The Terp quarterback is the nation's leading collegiate passer with 87 completions in 131 attempts for 1,034 yards and four touchdowns.

Shiner has been hampered by a pulled muscle in the Terps' last three outings, but should be ready to go full speed this afternoon.

"He got hurt against North Carolina State," Maryland coach Tom Nugent said yesterday, "but he'll be ready to go. We saw films of Craig Morton (California quarterback) but I think Shiner is better."

That's bad news for Penn State fans. Morton was little short of sensational against the Nittanies last week, completing 20 of 28 passes for 274 yards.

ENGLE HAS been putting the Lions through pass defense drills all week in preparation for Shiner's expected aerial barrage.

"We have to stop Shiner," State scout Sever Toretta said after watching the Terp quarterback against South Carolina last week.

"If we don't stop Shiner, we won't beat Maryland."

Nugent agreed with Toretta, "This game is going to be decided by the defenses. Both teams have team that can stop the other will come out on top."

The game may develop into a passing duel between Shiner and Pete Liske, currently ranked as the 10th best passer in the country.

Shiner's favorite targets this year have been wingback Tom Brown, halfback Ernie Arizzi and end Mike Funk.

BROWN IS the nation's fourth best pass receiver with 34 catches for 431 yards. The Maryland speedster has caught 28 Shiner heaves in the last four games.

Arizzi has replaced Funk as the second best Terp receiver. Arizzi has 18 grabs for 203 yards while Funk has picked up 192 yards on 16 catches.

Funk has been nursing a pulled muscle and probably won't start this afternoon, but he will see some action on offense.

Liske's favorite receivers have been Junior Powell and the Lions' two All-American candidates—halfback Roger Kochman and end Dave Robinson.

Powell, the right halfback on

## Dismantling Begins in Cuba

WASHINGTON (AP) — President Kennedy told the American people last night the Soviet rocket bases in Cuba are being dismantled, the missiles are being crated and "progress is now being made towards the restoration of peace in the Caribbean."

The President appeared on radio and television, after little more than an hour's advance notice, with a brief progress report on settlement of the crisis that a week ago had the world teetering on the brink of nuclear war.

HE SAID it is "our firm hope and purpose" that the progress he said is being made will continue.

He said, "The United States intends to follow closely the completion of this work through a variety of means, including aerial surveillance, until such time as an equally satisfactory international means of verification is effected."

"While the quarantine remains in effect, we are hopeful that adequate procedures can be developed for international inspection of Cuba-bound cargoes. The International Committee of the Red Cross, in our view, would be an appropriate agent in this matter."

"The continuation of these measures in air and sea, until

the threat to peace posed by these offensive weapons is gone, is in keeping with our pledge to secure their withdrawal or elimination from this hemisphere. It is in keeping with the resolution of the Organization of American States, and it is in keeping with the exchange of letters with Chairman Khrushchev of Oct. 27th and 28th."

The proposal that the International Red Cross be asked to play a role in verifying removal of the missile bases was advanced by the Soviet Union.

The details of how this would be done would have to be worked out. Soviet troubleshooter Anastas I. Mikoyan flew to Havana yesterday to soothe the ruffled Prime Minister Fidel Castro amid the dismantling and withdrawal of Soviet rockets from Cuban soil.

The Soviet first deputy premier was greeted by Castro and other top Cuban officials upon his arrival at Havana Airport.

Before leaving New York, Mikoyan, en route from Moscow,

endorsed Castro's demand that the United States evacuate its Guantanamo naval base in Cuba as a condition for a Cuban settlement. Havana radio broadcast Mikoyan's New York statement.

However, it was believed Mikoyan would seek in Havana to persuade Castro to drop his opposition to international verification of Soviet Premier Khrushchev's promise to dismantle Soviet missiles in Cuba and ship them back to the Soviet Union.

CASTRO REFUSED in a broadcast Thursday night to permit any kind of U.N. inspection or verification on Cuban territory.

The Defense Department had announced that aerial reconnaissance photos showed work on dismantling the missile bases had started.

2 a.m. Permissions  
The Association of Women Students has granted 2 a.m. permissions for all women students tonight.

## Fertilization Tests to Use Effluent From Sewage Plant at University

Treated effluent, which previously had contributed to "fish-kills" in Spring Creek by reducing the amount of oxygen available for fish, will be used in a fertilizing demonstration in wooded tracts, David E. Davis, professor of zoology, said yesterday.

Work on the project will begin Monday or Tuesday, when a pipeline from the University's Sewage Plant south of Benner Pike to the test area is to be installed. The four miles of pipeline is expected to be completed in December or January, depending on the weather, Davis said.

THE TREATED SEWAGE piped into the creek had no disease-causing bacteria in it, he said, but it was full of fertilizer materials. These materials helped increase the growth of algae in the water, which in turn deprived

fish of sufficient oxygen to live, Davis said.

The area which is to be fertilized by the effluent is a 180-acre tract of woods north of Beaver Stadium.

Davis said the long-range objective involved is to develop this area into a conservation and recreation area within 25 years. Tentative plans include a series of ponds for boating and fishing and use of forest lands for picnicking, hiking and hunting.

TWO YEARS of planning went into the project, with the Colleges of Agriculture, Engineering and Mineral Industries contributing to the overall program.

Davis said that Richard R. Parizek, assistant professor of geology, spent a year in studying the geologic formation under the forest area to determine where the water table lay and what was the danger of fertilizer nutrients getting into wells in the area.

Davis said that the water would not be polluted by these materials even though it might appear polluted. These materials do not contain disease-causing bacteria.

## Occasional Rain Expected Today

Dismal weather conditions may test the hardiness of Penn State football fans this afternoon.

Occasional rain and cold weather is forecast for today and temperatures are expected to be no higher than the upper 40's at gametime.

The rain isn't expected to be heavy, but it may be annoying to the 42,000 persons expected to watch today's game with Maryland.

The circulation pattern across the Northern hemisphere continues to favor unseasonably cold weather in the eastern states, and no important change in this picture is likely for several days.

Skies are likely to remain mostly cloudy tonight and tomorrow, but only a few light showers possibly mixed with snow flurries are indicated for tonight.

A low temperature of 34 is expected tonight, and a high of 48 is seen for tomorrow.

SEASON'S FIRST FORMAL: Viewed from the projection room of the Hetzel Union ballroom formally clad students danced to the music of the 17-piece Ronn Metcalfe Orchestra at the

Junior Prom last night. Dubbed "The Most Exciting Dance Band in the Land" this is the orchestra's first campus appearance. The dance was attended by about 200 couples.

## Phi Sig Delta Retains Trophy

Phi Sigma Delta fraternity retained its trophy for "fostering the most school spirit" last night by having the most cars in the pre-rally motorcade.

Donald Morabito, master of ceremonies for the Block "S" Club-sponsored pep rally, said the fraternity turned out with 18 cars. Two other groups had one car each.

The University Glee Club, directed by Frank Gullo, sang "Hail to the Lions," "Hail, O Hail Pennsylvania State," and other Penn State songs during the 35-minute rally for the Penn State-Maryland game tomorrow in Beaver Stadium.

Block "S" President Paul Krow estimated that 250 to 300 people attended the rally. Cheerleader Lillian Leis attributed the relatively small turn-out of students to the "big weekend and the cold weather."
