## the fourth dimension: TIME

...still a mysterious concept to science. Time is only an idea, an abstraction... an area of shadow, speculation—and surprise.

SEPT. 5, 1752, NEVER HAPPENED!... Nor did any date from Sept. 3 to 13, at least in England and the American Colonies. Why? The King decreed that these days would be skipped to correct a discrepancy between the Old English calendar and the newly adopted Gregorian calendar. This left puzzled Englishmen and colonists with one 19-day month and a 355-day year.

IT TAKES TIME TO MAKE TIME. Hamilton's extremely precise version of a timepiece takes from 6 to 9 months to produce. Half of the more than 2000 production steps are quality inspections which assure Hamilton accuracy.

Are you a person who likes to stand out? A Hamilton is both attractive and distinctive, a touch of excellent taste that you can wear every hour of a lifetime. They start as low as \$35. Ask your favorite gift-giver. Hamilton Watch Co., Lancaster, Pa.
