

Thinclads To Face Slippery Rock

Nearly one month ago Slippery Rock State College put the finishing touches on a new type track, allegedly the fastest in the world. This new running surface, called Miracle Glasstex, is composed of soft macadem, cork and rubber. Through a process of fuel technology, these materials are combined and then poured over the surface.

Three days ago, after everything was completed, Ken Snowberger, coach of the Slippery Rock Rockets, invited John Lucas and 15 members of his Nittany Lion track team to compete in the inaugural

meeting. The clash between the schools is slated for tomorrow. Although Lucas' thinclads are not slated to open their winter season until Feb. 2, the Lion mentor considers this meet as the team's opener. "We're going to Slippery Rock for the purpose of running," Lucas explained. "We're not going there just to jog around."

Parker Inks Steeler Pact
PITTSBURGH (AP) — Buddy Parker, the likeable but unpredictable Texan, agreed to a new contract with the Pittsburgh Steelers yesterday and said he'll be shooting for a National Football League championship next season.

Liston Balks at Fight With Floyd

NEW YORK (AP) — Heavyweight champion Sonny Liston tossed his weight (220 pounds) into the oratorical battle yesterday and said flatly there would be no title rematch with Floyd Patterson in Miami Beach on April 4.

Furthermore, the champ said, the fight will have to be in Baltimore, in May. But not before Championships Sports, Inc., pay him the \$207,000 he says he still has coming to him for flattening Patterson in the first round in Chicago Sept. 25.

SCRAMBLE—FOR FREEDOM!

At a dead run the crew board their new B-58 supersonic bomber. This is a practice alert—a practice of freedom's defense. Every American's taxes are needed these days to keep our defenses strong and our communities secure. Yet some people insist that the federal government spend millions of your tax dollars for more federal electric power plants. This is needless spending. Along with the nation's more than 200 other investor-owned electric light and power companies, we can provide all the electricity our growing nation will need. This is no time for needless tax spending.
