

U.S. Gives Warning on Cuban Shipping

WASHINGTON (AP)—The United States has served notice on countries whose ships go to Cuba that they risk losing American aid.

A State Department press officer, Joseph W. Reap, disclosed yesterday that the warnings have been conveyed in line with the new foreign aid law. Congress attached a proviso, as the spokesman put it, that "aid shall be cut off to countries whose ships carry goods to Cuba."

State Department authorities

made plain they hope to carry out the law by persuading aid-receiving nations to divert their vessels from Cuban ports, rather than imposing the no-aid penalty.

THEY SAID imposing such a heavy penalty could damage the violating country unduly and impair free world security.

Of nations which get U.S. aid, a number, like Great Britain, Norway and Greece, have large maritime fleets. Some maritime nations including Panama, Liberia, West Germany and Italy,

bar their vessels from Cuba.

State Department authorities said increasing cooperation has been forthcoming from other non-Communist countries and that Cuba's trade patterns show a dwindling number of non-Communist ships.

Reap said that since the aid law went on the books last October "steps have been taken by the department to notify countries whose ships have been in violation of the restriction."

The Congress-imposed restriction is apart from a series of shipping regulations which President Kennedy has said he will issue as part of his drive to isolate the regime of Fidel Castro. Informants said they expect these long-delayed regulations to be issued next week.

Khrushchev, Gomulka Confer; Raise Speculation in Poland

WARSAW, Poland (AP)—Premier Khrushchev packed off to the northern woods with Polish Communist leader Wladyslaw Gomulka yesterday amid speculation they were talking over Red China's challenge to Kremlin leadership.

Khrushchev is en route to East Berlin where he will star at the East German Communist party meeting opening Tuesday. Gomulka, regarded as the strongest party leader in Russia's Eastern European satellites, also will attend.

As Gomulka and Khrushchev conferred, the East Germans warmed up for the Soviet premier's visit by denouncing the "false, dogmatic ideas of those

who defend the Albanian leaders"—meaning the Red Chinese.

The statement by Hanna Wolf, a member of the East German party's Central Committee, was prominently displayed by Neues Deutschland, the official East German daily. Her declaration made it clear that the East Germans will line up against the Chinese Communists if the dispute erupts at the East Berlin meeting.

Raid Nets Drugs in Fraternity House

CARLISLE, Pa. (AP) — State police said they raided a fraternity house at Dickinson College last night and arrested two students, including the son of a state legislator, on illegal drug charges.

The students were identified as Thomas M. Jacks, 21, a senior from Hummelstown, and Hubert Maxwell, 24, a first year law student from Monessen.

Maxwell was identified as the

son of State Rep. H. J. Maxwell, D-Westmoreland.

Jacks was arrested in his room at the Phi Kappa Psi fraternity house on the campus.

Biphentamine pep pills were found in the possession of both students when they were arrested.
