

# 'Dinny' To Open at Pavilion Theatre

By JANET McDONALD  
University Theatre will open its winter season at 8 p.m. Tuesday with "Dinny and the Witches," by William Gibson. The play will run for five consecutive performances at the Pavilion Theatre.

Tickets are now available at the Pavilion box office, from 10 a.m. to 6 p.m. Monday through Saturday and on performance evenings until 10 p.m.

"Dinny," a recent off-Broadway success by the author of "Two for the Seesaw" and "The Miracle Worker," has been termed by critics "unique" due to its combination of ironic humor and serious comment.

**Adult Twist**

"Dinny" definitely puts an adult twist on the familiar. Its hero is Dinny Jones, a tenth-rate jazz man working in a cheap bar near Central Park, who sets out on a "pilgrimage" through life. On his journey he meets many strange people including the kings of the world, strumpets, a banker who makes double entry book-keeping and three witches — conceived for the atomic age.

**The Cast**

The cast includes Nanette Anslinger, Charles Bell, Sallie Diamond, Noah Fasten, Pamela Gilbert, James Godwin, Henry Hartman, Lorraine Light, John MacDonald, Judy Miller, John North, G. John Place, Patricia Salema, Lana Smith, Robert Sowers and Doreen Vogel.

The production will be directed by theatre arts instructor Ellis Grove with choreography by G. John Place, musical direction by Prudence della Cioppa, and scenic design by William Addison.

MACBETH'S THREE WITCHES? No, Judy Miller (left), Sallie Diamond and Patricia Salema are the three witches in "Dinny and the Witches," which will be produced at the Pavilion Theatre beginning next Tuesday. Tony Pierce is the harassed Dinny.

# Nobel Prize Winner To Talk Here

A young Nobel Prize winner whose fundamental discovery has had far-reaching effects from solid state physics to general relativity will visit the University Friday and Saturday for a series of lectures and conferences.

Rudolf L. Mossbauer, guest professor of physics at the California Institute of Technology and co-winner of the 1961 Nobel Prize in physics for his discovery of the "Mossbauer Effect," will lecture at 4 p.m. Friday in the Mineral Industries Auditorium on "Electronic Shielding in Rare Earth Salts."

The Mossbauer effect refers to the property of certain radioactive atoms, if tightly bound in the lattice of a crystal, to emit gamma radiation of extremely sharp, unvarying wavelength and frequency.

**No Recoil**

This is possible because there is no recoil of the emitting nucleus such as would occur when the atom is not locked in a crystal lattice.

The momentum of the gamma quantum may be taken up by the crystal as a whole instead by the emitting nucleus alone. When the emitting atom recoils, both wavelength and frequency are affected.

Moreover, when atoms of the same species are bound in the crystal lattice, they will absorb this gamma radiation, and in turn emit a gamma ray at random at exactly the same wavelength.

Mossbauer found that gamma rays resulting from this recoil-free emission were invariable to one part in a trillion, and a new research method of unparalleled power was available.

# Ku Klux Klan

# Heyman Attacked in Georgia

A former Penn State student was beaten last week by members of the Ku Klux Klan while engaging in a voter registration drive in Atlanta, Ga.

Jacob Heyman, former president of the Student Union for Racial Equality at the University, was later arrested, according to James Conaham, SURE president.

**Condition Unknown**

Conaham added that Heyman's present condition is unknown, but that he expects to hear from him soon.

Heyman withdrew from the University this term in order to help with voter registration in the South.

In campus activity, members

of SURE will soon initiate a new voluntary program in which they will "live in" with families in the poorer sections of several large cities throughout the country.

According to Conaham, the program is open to students in all colleges of the University. The group will concentrate at first on the Philadelphia and Washington, D.C. areas and will later expand to other cities.

Volunteers will spend vacation time tutoring high school

students in the two cities. Expenses will be partially paid by SURE funds.

**Voter Registration**

Besides the tutoring program the group is carrying on a campaign to recruit volunteers for help with voter registration in the South. SURE hopes to pay them approximately \$12 per week.

The organization will hold its second membership meeting this evening at 7 p.m. at the Wesley Foundation.

**Scranton Calls Meeting To Study Unemployment**

HARRISBURG (P) — Gov. Scranton said yesterday he will call a special session of the legislature sometime next week to tackle unemployment compensation, Project 70 and two other subjects.

Scranton announced his plans after a half-hour meeting with Republican legislative leaders from the House and Senate.

The exact date for start of the special session is expected to be fixed later this week.

Other subjects to be considered are eminent domain reforms modernizing Pennsylvania's land condemnation process and liberalization of the blind veterans compensation program adopted in 1963.

The regular session of the 1964 legislature, in recess until next Monday, is limited by law to fiscal matters.

**Blind Veterans Included**

A. James Reichley, the governor's legislative secretary, said the blind veteran's program would be included in the special session to correct an oversight.

Under the present law, he explained, only those blinded by wounds are eligible for compensation.

The Scranton Administration proposes to extend this coverage to include veterans blinded by disease and sickness such as malaria.

Unemployment compensation is expected to be the most explosive legislative issue of 1964—even more than the administration's proposed \$1.168 billion spending program.

Basically, the administration proposal would boost the unemployment compensation tax on employers by \$5 million a year and cut payments by a similar amount.

**Labor Opposed**

The proposals died last year in the General Assembly when organized labor lined up in solid opposition.

A special legislative task force of the Joint State Government Commission held hearings on the subject, but once again labor opposed while business and industry pledged its support.

**Dent May Oppose Scott For Senate Nomination**

WASHINGTON (P) — Rep. John H. Dent (D-Pa.) opened the door yesterday to a possible fight for the Democratic senatorial nomination to oppose the expected re-election bid of Sen. Hugh Scott (R-Pa.).

Dent said in an interview he will decide whether to enter the primary after party leaders pick their candidate at a meeting scheduled for Friday.

# Macan To Speak On Sales Career

The Engineering Student Council will sponsor a program at 7:30 p.m. tomorrow in 215 Hammond for all engineering students, featuring W. A. Macan III, Philadelphia district representative of Leeds and Northrup Company.

Macan will speak to the group on "Sales Engineering—Today's Challenge." The speaker, a 1936 graduate of Haverford College, has spent his entire career with the company in sales engineering and management positions.

As a sales engineer, Macan has worked for the company in cities throughout the eastern United States and Canada.
