

95 More Available

New Fellowships Authorized

Ninety-five graduate fellowships in 32 areas of study have been authorized for the University under the provisions of Title IV of the National Defense Education Act of 1958.

The purposes of the program are to assist qualified students to enter graduate school and prepare to teach in the nation's colleges and universities and to increase facilities for graduate study.

The new fellowships will become effective next September. At least 75 per cent of them must be awarded to students who have completed not more than 15 credits of graduate work by then, and 25 per cent are available to students who have completed not more than two years of study.

How Much

The fellowship, it is explained, is normally a three-year award, depending upon continued satisfactory scholarship and congressional appropriations each year. The stipend is

\$2,000 for the first academic year, \$2,200 for the second, and \$2,400 for the third plus \$400 per year for each approved dependent.

Because of an institutional allowance received, the University will give a grant-in-aid to cover tuition.

To qualify for one of the fellowships, a student must show promise of high academic achievement, must have acquired the bachelor's degree not later than September, 1966; and must apply for admission to a graduate program leading to the doctor of philosophy or equivalent degree and be accepted before tenure of the fellowship begins. He must also be interested in, or plan to continue in, an academic career of teaching in colleges and universities. There are also citizenship requirements.

While applications for admission to the Graduate School are obtained through the Graduate School, the fellowship application forms must be obtained through the departments which have been approved as areas of study.

University Artist Gives One-Man Show

Forty new intaglio prints are single-color and white. Harold Altman, internationally known printmaker and associate professor of art at the University, will be exhibited at Wechsler Gallery, New York, N.Y., from where all of the prints were shipped to Jan. 11 to Jan. 29.

The artist has received numerous awards and fellowships, some of which were in Paris where the artist spent the last twelve months as a Fulbright-Hays Research Scholar, 1961-62; a National Institute of Arts and Letters Grant of \$2500 a minuscule of less than 3 by in 1963 and the Fulbright-Hays Research Scholar Fellowship in 1964-65.

many public and private collections including:

- The National Gallery of Art: The Philadelphia Museum of Art; The Art Gallery of Greater Victoria, Canada; The Art Institute of Chicago; The Bibliotheque Nationale, Paris; The Stedelijk Museum of Amsterdam; The Victoria and Albert Museum, London; The Whitney Museum of Art; Governor Nelson Rockefeller; Mrs. Bliss Parkinson; The Container Corporation of America; The New York Hilton; The Lytton Savings and Loan Association of California; Mr. Richard Brown Baker; Mr. Walter C. Baker; Mr. Lessing J. Rosenwald; The First Minneapolis Bank; and The I.B.M. Corporation.

'Testy' Atmosphere In Russell's Course

Intelligence tests. Achievement tests. Complete tests. Russell's attitude, to evaluate aptitudes, are divided into several parts — the test, the manual It takes more than 100 file boxes to contain all the examinations which describe how to administer it, and how it was developed, and the answers.

The boxes repose in a test resource center assembled by David W. Russell, professor of education. He uses them in connection with a course he teaches, Measurement of Achievement in the Elementary School.

"Prospective teachers need to see and analyze actual tests," he believes, "for better understanding of their content construction and use. Testing can be overdone, or misused so that it supersedes teaching itself."

"Its value lies along diagnostic avenues. A well-designed test should spotlight pupil weaknesses of which the teacher might otherwise not be aware. Suppose," he continues, "a child tests quite high for reasoning abilities in arithmetic, while his computation is very poor. We don't accept this result unquestioningly. Perhaps the child was not paying attention during the computation part of the test. Retesting would settle this."

"Too often, teachers and administrators are averse by tests. Some school districts even gear their teachers' salaries to the results of their pupils' achievement tests. This is obviously unfair to a teacher who happens that year to have a slow class, or to one who is more concerned with developing attitudes among

Graduate Centers Give New Course Schedules

Eight graduate courses have been scheduled for the winter term by the King of Prussia Graduate Center and seven graduate courses by the University of Susquehanna Valley Graduate Center.

The courses offered by the King of Prussia Center are: Engineering 435, engineering analysis; Engineering Mechanics 524, mathematical methods in engineering; Engineering Mechanics 530, solid state mechanics; Mechanical Engineering 412, heat transfer.

Also, Electrical Engineering 426, transistors; Electrical Engineering 528, theory of vibrations; Mathematics 409-410, introduction to mathematical statistics; and Mathematics 451, function of several variables.

The courses scheduled for the Susquehanna Valley Center are: Civil Engineering 446, advanced soil mechanics; Industrial Engineering 511, experimental design in engineering; Mathematics 409 and 451, introduction to mathematical statistics and functions of several variables; Physics 412, introduction to state physics and Engineering Mechanics 524A, mathematical methods in engineering.

the newest Detroit sound comes from a combo called 4-4-2

Up-tempo all the way. With a 400-cube V-8 and 4-barrel carb to carry the lead. Heavy-duty front and rear suspension to smooth the beat. Acoustically tuned twin pipes to modulate the sound. And red-line tires to keep the whole score on track. That's 4-4-2. Try about four bars today. It's your kind of music! LOOK TO OLDS FOR THE NEW!
