

BOB CAMPBELL, the Lions' leading rusher and the nation's leading punter turned the Miami game around last week. This week, Campbell and the Lions play host to the nation's third ranked team, UCLA. Sports Editor Paul Levine describes the many talents of State's tailback in "Bob Campbell: Mr. Big Play" on page four.

## Williams Hints Bosox Will Win

BOSTON (AP) — Dick Williams, the Boston Red Sox' rookie manager, played a cat-and-mouse game and, without actually saying so, predicted victory yesterday on the eve of the World Series opener with the St. Louis Cardinals.

"Like I said all year, I think we'll win more than we lose," Williams said with an impish grin when questioned during the Red Sox' workout under a hot sun at Fenway Park.

The 38-year-old Williams first made the statement, "We'll win more than we lose," when he took over the Red Sox last spring. The team posted a 92-70 record en route to the American League pennant—after finishing ninth with a 72-90 mark in 1966.

### Won't Quit

"This is a good ball club—it doesn't know the meaning of the word quit," Williams said. "I think the entire club was downgraded at the start of the year, and with some good reason. Basically, it is the same club as in 1966. However, our pitching came through better than most people expected. And the front office helped plenty in getting Jerry Adair and Gary Bell in trades."

Before taking the field, the Red Sox spent nearly an hour getting a rundown on the Cardinals. Frank Malzone, Eddie Kasko, Tommy Thomas and Don Lenhardt provided scouting reports on the National League champions.

"They come off the bench swinging," Williams said in summing up the scouting reports. "They don't look for a walk. They got up there ripping."

### Ran Drills

After the clubhouse session, the Red Sox took the field for hitting and running drills before the Cardinals worked out.

Russ Gibson, a 28-year-old catcher who kicked around the minor leagues for 10 years before getting a shot with the Red Sox, summed up the general feeling on the team.

"Nervous? I don't think anyone is very nervous," Gibson said. "After those last two games with Minnesota during the weekend, how can we be nervous? No pressure can be that tough. We had to win both those games and we did."

Gibson, who spent a brief period at Pittsfield of the Eastern League as the Red Sox juggled their roster in late August, finds himself in a starting role.

### Really Terrific

"Things are happening so fast I can't believe it," Gibson, a resident of Fall River, Mass., said. "This is terrific—really great. Imagine it. Playing at home in the World Series after all those years in the minors."

## ECAC Picks Kwalick As All-East End

Penn State tight end Ted Kwalick, who has shown phenomenal gridiron ability in his first two games for the Nittany Lions, was named yesterday to this week's first team of the Eastern Collegiate Athletic Association's All-East squad.

The 6-3, 225-pound potential All-American received the honor for his outstanding performance in last Friday's upset at Miami. He caught nine passes for 89 yards and one touchdown. He also returned two punts for 19 yards.

Over two games, Kwalick has hauled down 17 aerials for 199 yards, an average of 11.6 per pass. He hails from McKees Rocks, where he played high school football at Montour High.

Figures released today also indicated that Bob Campbell, State's do-everything tailback, is No. 1 in the nation in punting.

In the Navy and Miami games, he kicked seven times for 342 yards, his longest a 61-yard punt last Friday night. Campbell's average is 48.9 yards per boot.

In addition, Campbell is the Lions' number one rusher with 21 carries for 158 yards in two games. He has also caught six passes for 52 yards, has returned three punts and four kickoffs. Last year, Campbell was the first sophomore to lead Penn State in rushing since Lenny Moore.

## Cards-Sox Lineups For Series Opener

### ST. LOUIS

## Reid Will Undergo Knee Surgery Monday

Mike Reid, the Penn State linebacker who aggravated a knee injury in the Navy football opener two weeks ago and thus will be unable to play this year, is scheduled to undergo surgery Monday.

In further unfortunate developments involving Nittany Lion players, offensive tackle Jack Sain will also miss the entire season due to a knee injury, and Jim Kollar, linebacker from Bethel Park, left the team this week for personal reasons. Both are seniors.

Coach Joe Paterno said it also appears two other players will miss Saturday's game against UCLA because of injuries sustained in last week's upset win at Miami.

Linebacker Jim McCormick, a 6-0, 197-pound senior, will be replaced by sophomore Jim Kates, who is 6-1, 220 pounds. Defensive tackle Tom McGrath, also a senior at 6-3, 223, will relinquish his position to another sophomore.

## SRO Crowd At Boston

BOSTON (AP) — Jose Santiago, a talented graduate of Boston's bullpen, will face the favored St. Louis Cardinals' Bob Gibson Wednesday at ancient Fenway Park in the opening game of the Red Sox's first World Series since 1946.

A standing room crowd of over 35,000 will shoehorn into the old park in cloudy 70-degree weather.

## CLEVELAND

HAS AN ENGINEERING CHALLENGE WAITING FOR YOU

Expansion and development programs of The Cleveland Twist Drill Co., offer immediate placement for Engineering graduates in ME, IE, and Metallurgy.

The Cleveland Twist Drill Co. is a medium sized, multi-plant internationally known leader in the manufacture of metal cutting tools, having foreign as well as domestic manufacturing operations.

Openings at the headquarters plant in Cleveland include the following positions:

### PRODUCT DESIGN ENGINEER

Individual and group project responsibility in design, application and development of metal cutting and threading tools. Customer engineering as required by the development of new tooling programs by industry. Some travel.

### MANUFACTURING ENGINEER

Determination of new or improved manufacturing processes, economic justification of machinery, writing machine tool specifications, debugging and cycling of equipment.

### MACHINE DESIGN ENGINEER

Creative assignments in design of special metal cutting and forming machines, includes writing specifications, making preliminary layouts, supervising designs and draftsmen and follow-up debugging.

### METALLURGICAL ENGINEER

Product and process development, product performance and evaluation, applied research in tool materials and other laboratory and engineering projects concerned primarily with high speed steel, tungsten carbide and related alloys.

These are challenging positions offering immediate responsibility and advancement opportunity to B.S. and M.S. graduates.

Principal fringe benefits include profit sharing, relocation assistance, retirement program and full reimbursement of education tuition.

Make an appointment today to meet our representatives when they visit Penn State on October 13.
