USG to give rides to voter registration

By TERESA VILLA
Collegian Senior Reporter

The Undergraduate Student Government is one organization students will run into this week at registration. One of USG's big projects this year is a voter registration drive in Centre County, according to USG Senator Bob Brimont.

The USG Department of Political Affairs will sponsor free bus and car rides from Rec Hall registration to the county courthouse in Bellefonte tomorrow, Thursday and Friday.

Brimont said registering to vote in Centre County is important because all students will be canvassed and included in Centre County tax rolls and will have to pay local taxes. No proof of residence is required for voter registration, he said.

USG has worked for two years to make voter registration this easy for students. Student government also had a say last year in the new State College bus terminal site.

This year USG will work with other universities in establishing a student lobby in the state legislature, Brimont said. "We'll be back to business as usual," he added.

USG consists of three branches: executive, legislative and judicial. Its president is Mark Jinks, assisted by Vice President Frank Muraca. The executive branch also includes

the departments of Political Affairs, Academic Affairs, Commonwealth Campuses, Legal Affairs and Student Welfare.

The legislative branch includes the Senate, with representatives from the dorms and downtown, and the Academic Assembly, with members from the 10 colleges who discuss academic affairs.

Supreme Court members are appointed by the USG president, as are heads of the executive departments. All Senators are elected by their constituencies. As USG president, Jinks heads the Executive Council, which includes the presidents of all major campus organizations.

Students with problems or questions can contact their USG Senator or the USG office in 218 HUB.

The USG Supreme Court registers student organizations. Without a USG charter an organization cannot receive University funds.

The court also hears grievances from students and groups. Last year a student brought suit against the University Union Board for sexual discrimination in the Homecoming selection of outstanding University women.

Convoy reaches capital

PHNOM PENH — A 14-boat Cambodian navy convoy reached the besieged provincial capital of Kompong Cham yesterday with troop reinforcements and badly needed U.S. arms and ammunition including 105mm howitzers, the Cambodian command said.

Col. Am Rong, chief command spokesman, said the convoy was "cheered by the people all along the banks of the Mekong River because they hadn't seen one for more than a year."

He said it completed the voyage from Phnom Penh up to the Mekong River in 25 hours with little resistance.

Kompong Cham, Cambodia's third largest city, lies on the western banks of the Mekong 47 miles northeast of Phnom Penh.

The town, on east-west Highway 7, is cut off by road and only helicopters can land. The airfield, about 3 and one-half miles northwest of the city, is zeroed in by insurgent artillerymen using 105mm howitzers captured earlier in their drive from the town of Skoun eastward toward Kompong Cham.

Cholera spreads north

ROME — Cholera spread north to Rome yesterday with one death reported in an outlying district of the capital. The death toll in the southern cities of Naples and Bari rose to 13.

The Roman victim reportedly became ill after eating sea snails brought to him from a town near Naples where cholera cases have been reported.

Mussels, eaten raw, are a popular dish in both Naples and Bari, and are raised commercially in the polluted waters of the Gulf of Naples. Doctors ordered the mussel beds closed and said they and other shell fish probably were responsible for the spreading disease.

Vaccine and other anticholera drugs were running short in Italy. The government dispatched a military plane to London to bring back 1.6 million doses of British-produced serum.

Gas prices may rise

WASHINGTON — Petroleum industry figures indicate that removal of federal regulation from natural gas prices would increase the average household gas bill anywhere from 16 to 32 per cent by 1980.

The 16 per cent increase, however, may occur even if prices remain regulated, since the Federal Power Commission has been preparing to raise the ceilings.

The industry has said that higher prices and removal of price regulation are needed to stimulate exploration for new gas fields and relieve the growing gas shortage.

The American Petroleum Institute Monday released a 150-page study prepared for it by Foster Associates, a Washington consulting firm, analyzing the possible impact of price-deregulation.

Most of the detailed figures were not spelled out by the report but could be calculated from the tables provided.

Fire-fighting halted

NEW ORLEANS — Increasing danger of an explosion forced a halt to Coast Guard efforts yesterday to bombard a flaming ship with fire-extinguishing chemicals dropped by helicopters.

The 306-foot Liberian freighter Key Largo, abandoned by its crew, burned fiercely at anchor 50 miles downstream from New Orleans. Touchy calcium carbide fed the fire which threatened barrels of tetra-ethyl lead, which spews off a poisonous gas when burned.

Choppers dropped 10 tons of chemical fire extinguisher on the ship before being ordered away.

A Coast Guard spokesman said fire fighting was complicated by the fact that calcium carbide, when mixed with water, creates explosive acetylene gas.

The fire, and the calcium carbide, was in the aft hold of the ship. Forward on deck were barrels containing eight tons of the tetra-ethyl lead.

Delia heading for La.

MIAMI, Fla. — Tropical Storm Delia moved toward the Louisiana coast yesterday and forecasters said they expected the storm to reach hurricane force before it arrived.

The National Hurricane Center here said Delia was expected to hit hurricane strength — sustained winds of more than 74 miles per hour — by late yesterday. The storm already registered winds of 60 miles an hour.

Meanwhile, Tropical Storm Christine regained strength in the Atlantic Ocean as it pushed toward the Leeward Islands. It too had maximum sustained winds of 60 m.p.h.

Yesterday afternoon, Delia was reported about 240 miles south of New Orleans and was moving northwest at 12 m.p.h.

An area east of Lake Charles, La., extending to the mouth of the Mississippi River was placed on hurricane alert. Gale warnings were also in effect.

Food costs fall slightly

NEW YORK—Grocery prices have fallen a bit from their mid-August peaks, but are still about seven per cent higher than they were six months ago, an Associated Press marketbasket survey shows.

The AP surveyed the prices of 15 food and nonfood items in 12 cities on March 1 and has rechecked them at the beginning of each succeeding month. An additional check was made on Aug. 13, the day after the Phase 4 economic program began.

During the six-month period, price ceilings were first imposed and then lifted on virtually all foods. The only food still under a ceiling is beef which will remain limited in price until Sept. 12.

The Sept. 1 check showed that pork chops and eggs, which rose sharply during late July and early August, have declined in most cities. In every city, however, egg prices — which topped a dollar a dozen in some areas on Aug. 13 — were higher on Sept. 1 than they were on March 1.

Congress to reconvene

WASHINGTON — Congress returns to work tomorrow after a month's vacation and prospects appear slim for passage this year of key measures sought by President Nixon.

Congressional leaders say the White House is giving top priority to a trade bill which would give the President substantial new authority in this field.

Negotiations with America's principal trading partners are to start in Tokyo later this month.

But the Nixon bill has not yet cleared the House Ways and Means Committee and, even if it can pass the House in October, it still faces highly uncertain Senate prospects.

Other major presidential initiatives for revenue-sharing plans in the fields of education and housing seem to have little chance of enactment in 1973.

Teacher talks stalling

PITTSBURGH — Teacher contract talks have moved down to the wire as thousands of school children await the outcome of weekend negotiations.

Teachers and other school employes have threatened to strike in 11 western Pennsylvania school districts while walkouts continued in five others.

In Allegheny County, negotiations were stalled in five school districts, involving 1,300 teachers and 25,000 pupils. State mediators were called in on talks between McKeesport, Carlynton and West Mifflin boards and representatives of the Pennsylvania State Education Association.

Talks were progressing in West Jefferson Hills and Allegheny Intermediate Unit districts and no mediation was scheduled. Meanwhile, 13 secretaries threatened to strike the Babcock school system.
